Alternative Media Amplifies as Mainstream Gatekeepers Decline

Paul Joseph Watson & Alex Jones | August 7 2005

The number of individuals worldwide who acknowledge that there is a hidden hand shaping world events is growing at a faster rate than ever before.

This is directly due to the burgeoning power of the alternative media and the declining influence of the establishment media. Mainstream media has been caught so many times colluding with government in order to sell major domestic and foreign policy initiatives on a foundation of lies. People are voting with their feet and turning away from the mainstream and seeking the truth.

The alternative media is by no means perfect, we make mistakes just as the mainstream does. The difference is that the alternative media actively attempts to tell the truth rather than actively attempting to hide it or misdirect the reader. Furthermore, when we make a mistake we also make the retraction clear, rather than burying it in small type on page 27.

The consistent reports of reducing newspaper subscribers is mirrored on the Internet, as alternative news websites begin to surpass big city newspapers in readership.

Using the Alexa web rankings as a benchmark, we compared a number of popular alternative websites to big city newspaper websites. The results are very encouraging.

The Alexa system has several different filters for measuring traffic to a particular site but the base number appears at the top of the page for every website URL. The lower the number, the more visitors the website gets. For example, Yahoo.com is number one.

Let's take a look at two major market big city newspapers, the Las Vegas Sun and the Daily Oklahoman. The Sun comes in at 13,699.

The Oklahoman Online
 newsok.com
 Includes news, sports, business, entertainment, weather, classifieds and lifestyle articles.

Traffic Rank for newsok.com: **10,312**

The Oklahoman comes in at 10,312. Bear in mind that the websites for these kind of newspapers are run by a staff of anything from five to twenty people.

And that's just the people putting the website together. If you add in the writers who contribute then the number is even greater.

Alternative media websites like Prison Planet.com, WhatReallyHappened.com and Rense.com are run by two people apiece, and in some cases just one.

If the journalists who wrote for the establishment papers went back to the old school mentality of muck-raking journalism then more people would read their articles. The fact that the raw truth is infinitely more popular means more and more of these establishment journalists are having to move further over to our side and be more honest in their reporting.

Traffic Rank for prisonplanet.com: **11,655**

Prison Planet.com comes in at 11,655, but the very latest figures show our traffic trend to be around 8,000-9,000. This means that more people are reading Prison Planet.com than are reading Oklahoma's biggest newspaper online.

Furthermore, a paper like the Oklahoman has many different sections, for example classifieds, which attract people for different reasons than just wanting to read the news. Our websites are solely focused on news. So if you compared the websites just on people who visited to read the news, we'd be even further ahead.
