

Photo Suggests Bombs In Ceiling Of Jordan Hotel

WhatReallyHappened.com
11-14-5

The above is a photo of damage to the Hyatt from the recent bombing. We are being told that this bombing attack was carried out by "suicide bombers" wearing explosive belts. We are being told there is no truth to initial reports that the bombs were hidden above the ceilings (or that Israelis were yet again given advance warnings to leave).

Take a look at this photo. Does that look like a bomb went off about waist-high, or in fact exploded downward from the ceiling.

Where is the blood splatter? If you wrap a belt around yourself like the one they

claim and detonate it, you make a really big gooey bloody mess. The wall is clean.

Is the "confession" a repeat of the infamous phony "[Kuwaiti nurse](#)"?
