

updated 23 Dec 2005

**Daryl Bradford Smith is the Black
Mamba of the Truth Movement**

"Don't tread on me"

America and Europe are being destroyed,
and if you lack the intelligence to join with
me and help me, get out of my way, or be
considered one of my enemies.

**A closer look at
Jon Carlson's articles**

The successful disinformationalist starts a
relationship by treating us with decency in order

to earn our trust. After we trust them, they cheat us.

This is the pattern I see with Tom Flocco. He started writing articles that seemed sensible, and after a large number of people trusted him, he began writing idiotic articles.

Jon Carlson seems to be following the same pattern. Some of Carlson's early articles were primarily photos, so there was nothing to complain about. For example, there are only four sentences in this entire article, not counting the title:

<http://www.rense.com/general63/unob.htm>

The photos are related to the 9-11 attack, so the article makes Carlson appear to be a true 9/11 researcher who was helping us understand what happened that day.

This article also makes Carlson appear to be an honest, 9/11 investigator who speculates on the model of engine and landing gear:

<http://www.rense.com/general63/hiding.htm>

In this article Carlson appears to be defending the 9/11 investigators:

<http://www.rense.com/general63/pm.htm>

Carlson is a wonderful man who wants to expose 9-11, right? **Wrong.**

Carlson is a disinformationalist

His latest articles are absurd and poorly written. Look at this article, for example:

<http://www.rense.com/general69/911hh.htm>

He complains that my web site is promoting an Israeli connection to 9/11, and he states:

There is no evidence of a Israel connection to 9/11.

However, he does not offer any evidence that my research of the Israeli connection is flawed. I suppose he thinks that he has built up such a

strong reputation as an honest 9/11 investigator that he can fool people into trusting him without asking for evidence.

He then goes on to mention a radio interview I had with Eric Hufschmid. He starts the paragraph with:

He pushes Peak Oil.

Who pushes Peak Oil? Certainly not me or Hufschmid. Judging by the rest of Carlson's paragraph, it appears that he glanced at the first chapter of Hufschmid's book in which there is a quote from Mortimer Zuckerman, who promoted the idea that we are running out of oil and that we must get access to the oil in the Caspian Sea area before the Russians get it.

Did Carlson really miss the reason Hufschmid included Zuckerman's remarks about oil? **I think not.** I suspect that Carlson assumes that he can use his reputation as a 9/11 researcher to turn people away from me, Hufschmid, and other people who are exposing the truth about the 9/11 attack.

If a high school student had written that article, virtually every teacher would complain. For example, Carlson starts a paragraph with this sentence:

Wrapping himself in Jimmy Walter.

What does that mean? It appears as if he is trying to criticize Hufschmid. However, in this article:

<http://www.rense.com/general68/911jh.htm>

Carlson holds up Andreas von Bulow for solving the 9/11 attack. The ironic aspect of this is that von Bulow wrote a book about 9/11, and he references Hufschmid's book to explain that the towers were demolished with explosives, and he even includes some of Hufschmid's photos and drawings.

Carlson criticizes Kaminski

One of Carlson's newest articles criticizes John Kaminski:

<http://www.rense.com/general69/9112.htm>

There are good reasons to question Kaminski's true intentions because Kaminski depends on donations to support himself. It is acceptable to

question everybody who takes donations, even Daryl Bradford Smith, because they might be influenced by people who donate.

However, Carlson does not question where Kaminski's money comes from, nor whether Kaminski is influenced by the donations. Instead, we find vague criticism of Kaminski's implication that Israel was involved in 9-11. And we find the following remark in Carlson's article:

Jared Israel gets the honors for first connecting the Bush administration to 9/11.

This is one of the clues as to what Carlson is doing. He is supporting Jared Israel, and Jared Israel is one of the many "9-11 Truth Seekers" who denies any Israeli involvement in 9/11.

The pattern you should see with these people is that they are trying to put all of the blame for 9/11 on George Bush and/or Dick Cheney. Sometimes they blame the CIA. But they never blame Israel, and rarely mention Britain, the Rothschilds, the media executives, Larry Silverstein, or the Mossad.

Karl Schwarz; a grifter

Karl Schwarz is another person who is allowed to have his articles published at the Rense site, and Carlson promotes him frequently, also.

From personal conversations I have had with Schwarz, and from the research I and others have done, I can guarantee that Schwarz is a grifter who is lying to us about his personal wealth, lying about his Patmos company, and lying about his connections with wealthy and important people.

Before anybody promotes Schwarz, they should look into his company and his past.

<http://www.patmosnanotech.com/index.html>

<http://www.karlschwarz.com/>

Can you see a pattern with UFOs?

- Steven Greer is very active in promoting UFOs with his [Disclosure Project](#).

- [Stanton Friedman](#) claims to be one of the pioneers in UFO exposure.
- Art Bell has been promoting aliens and other ridiculous ideas for years on his [coast-to-coast radio show](#).

The pattern I see is that many of the people who are actively promoting UFOs have strong ties to Israel, or to other Zionists. How many **real** Jews promote UFOs?

Can you figure it out?

These UFO researchers claim to be truth seekers who want the government to stop lying about aliens, but they lie to us about Israel's role in 9/11, the attack on the USS Liberty, the assassination of President Kennedy, and other crimes.

Also, they lie to us about the role of the media, the banking families, and the Mossad, and they lie about the creation of Israel.

Some of these people, such as Art Bell, go even further by defending the government story of 9/11 and other crimes.

These people also promote one another, but they criticize or ignore people who are exposing the Israeli / Zionist connection to these crimes, such as myself, Eric Hufschmid, and Michael Collins Piper. Do you really think it is a coincidence that they don't like us?

Who is Jeff Rense?

Try to find information about this man. People will justify his secrecy on the grounds that he is afraid for his life, which is justifiable.

However, it is also possible that he is hiding something more sinister. His stepmother, [Paige Rense](#), is editor-in-chief of *Architectural Digest*. This is one of the magazines owned by Si Newhouse.

For all we know, Jeff Rense truly believes in UFOs, and associates of Si Newhouse or others are encouraging his UFO habit. See our [article about the media](#) if you never heard of Newhouse.

Why is Jeff Rense posting so many articles from

Jon Carlson, Karl Schwarz, and UFO supporters? Is this your idea of serious journalism? If not, please do not support him.

If you cannot help, get out of my way

I am calling for Jeff Rense to immediately stop promoting Jon Carlson. Carlson belongs on the list of suspects in the 9/11 disinformation campaign, and anybody -- including Rense -- who continues to promote this man after reading his latest articles should also be considered a suspect. And Karl Schwarz should also be investigated.

I also want Rense to stop promoting UFO theories. A photo that shows a blurry object in the sky is nothing more than a photo of a blurry object. Anybody who claims the blurry object is a spacecraft with aliens from Alpha Centauri is **incapable of proper reasoning**, or a disinformation agent who is trying to make conspiracy theories seem idiotic.

People who truly believe aliens are flying around the earth should get out of the 9/11 movement and stop pretending they they are 9/11 researchers. **We don't need idiots in this movement.** This is a serious fight against a lot of intelligent Zionists, and we don't need morons giving us a bad image.

We need to attract people who can think, not idiots who believe aliens are making crop circles, or lunatics who believe in [Paranormal Holiday Stories](#). We will not defeat the Zionists with a horde of morons.

If Rense wants to promote UFOs, then he should return to his previous web site, www.sightings.com

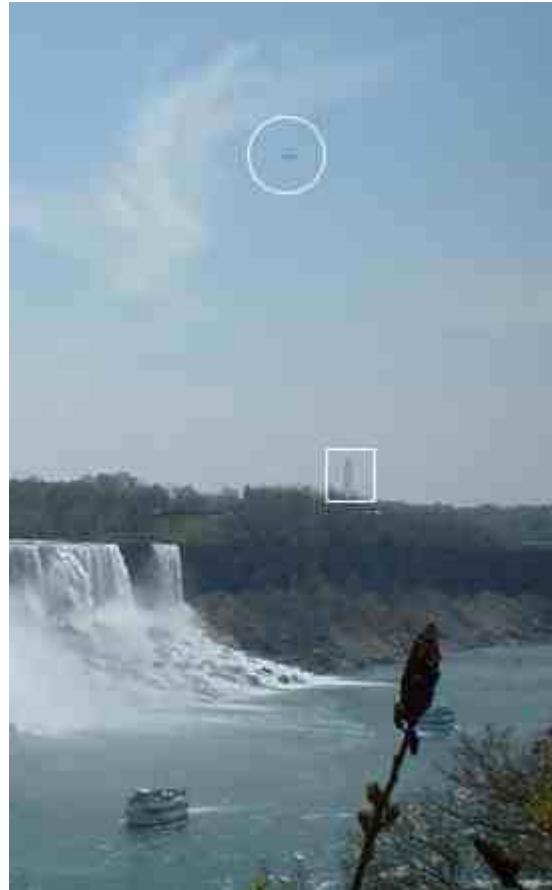

Daryl Bradford Smith has seen God

On a recent trip to Niagara Falls, Smith was enjoying the beautiful view when he noticed God high

up in the sky. Smith quickly took this photograph.

Smith drew a circle around God, and a square around an angel that is rising from the ground.

Smith is now trying to get God to autograph this photo. Please pray for Smith's success.

Seriously, ladies and gentlemen, imagine hundreds of web sites displaying photos of blurry objects and claiming, **"Look, here is a photo of God."**

Discussions are acceptable; Deception is a crime

It is acceptable to discuss the issue of whether there is a god, and whether there are several gods, but it is not acceptable to point to a blurry object in a photograph and claim that the blurry object is God.

Likewise, it is acceptable to discuss the issue of whether there are aliens on the earth, but it is not acceptable to point to a blurry object in a photograph and claim that the blurry object is an alien spacecraft.

Don't support UFO sites

Daryl Bradford Smith will no longer tolerate the contamination of evidence of Israel's complicity in world domination. They are mixing UFOs, crop circles, Remote Viewing, and other drivel to discredit the

hard evidence of Zionist crimes.

Do not post Smith's material on any site that promotes such nonsense, and don't support the radio hosts who promote it.

People who knowingly deceive people are **criminals; con artists; swindlers**. The UFO swindlers belong on the list to be **guillotined**. They are helping to give the subject of "conspiracies" a bad image, which in turn is allowing corruption to continue.

If you think UFOs are real, all you have to do is **Remote View** the people at Coast to Coast radio, and others like them, and watch them laugh at the Useful Idiots who believe their nonsense.

Here is an example: [Eight foot tall aliens](#) Why is this promoted?
