HEAVY SPIN CONTROL GOING INTO PLAY [Post [293940574](#)]

Category: News & Opinion (General) **Topic:** Crime & Corruption

Synopsis: It looks like a Plan is operation for New Orleans - to suppress the truth.

Source: [Liberty Forum](#)

Published: September 3, 2005 **Author:** Mariner

For Education and Discussion Only. Not for Commercial Use.

I've been watching the Spin Cycle go to work over the last day or so and there seem to be some definite patterns forming.

1. Reports of Cameras being confiscated by National Guard Troops.
2. Outside non-governmental help by Citizens is being turned away. The membership of the Florida Air Boat Pilots Association volunteered 500 Airboats and Pilots for the Rescue efforts. FEMA turned them down. Local people from a nearby Parish manned up and trailered up their boats and drove in a caravan to New Orleans to volunteer their efforts - they were turned away by uniformed Fish and Game Officers.
3. Ham Radio Wavelengths are being Jammed by someone.
4. Other attempts to bring in supplies and assistance have been turned away.

I suspect from the pattern forming that what is being done is a minimization of the number of witnesses as to what has occurred in New Orleans.

Information Control is being put into place to prevent an accurate picture from getting out. It is my guess that it is probably much more horrific than the Main Stream Media Whores are allowed to say.

So, what we are getting is a slow distortion of the picture with other elements of Propaganda being flooded out i.e., criticisms of people who might have erred, or confabulated stories to make it seem so, so as to deflect attention from Bush and his merry band of murdering incompetents.

With the introduction of Military Troops I think we can expect even tighter control as to who is allowed in - and out. This means tighter control of information in and out. I suspect that as one of the motivations for introducing armed Troops.

Watch for signs of the story starting to be slowly morphed in the Mainstream Major Media so as to change the image from one of Bush Administration incompetence to local incompetence, with suppression of any evidence as to the true scale of the numbers of dead.

Thank you. This could be our Canary - if some sort of information control plan is being implimented. I'm not sure there is, but as secretive as the Bush people are, and as badly as this is damaging them, they are very likely to try and keep control of information flow that could be "damaging".

Quote:

September 4, 2005 -- Reports continue that communications in and around New Orleans are being purposely jammed (and severed) by the US government (see Sep. 2 article below). The jamming is having an adverse impact on emergency, disaster recovery, and news media communications. The jamming is even affecting police radio frequencies in Jefferson Parish, according to an Australian news report. The President of Jefferson Parish Aaron Broussard told Meet the Press today that FEMA cut his parish's emergency communications lines and he had to have his sheriff restore the severed lines and post armed deputies to ensure that FEMA did not try to cut the communications lines again. Broussard's statement: "Yesterday--yesterday--FEMA comes in and cuts all of our emergency communication lines. They cut them without notice. Our sheriff, Harry Lee, goes back in, he reconnects the line. He posts armed guards on our line and says, 'No one is getting near these lines.'"

Jamming radio and other communications such as television signals is part of a Pentagon tactic called "information blockade" or "technology blockade." The tactic is one of a number of such operations that are part of the doctrine of "information warfare" and is one of the psychological operations (PSYOPS) methods used by the US Special Operations Command. Jamming is currently being used by US forces in Iraq and was used by the US Navy in the botched coup attempt against President Hugo Chavez in April 2002. US Navy ships off the Venezuelan coast jammed diplomatic, military, emergency services, police, and even taxi cab frequencies in Caracas and other large cities.

From "The Manchurian Printer," Simson L. Garfinkel [The Boston Sunday Globe, March 5, 1995, Focus Section, Page 83]:

"Not surprisingly, the unclassified version of the Pentagon's report barely mentions the offensive possibilities of Information Warfare---capabilities that the Pentagon currently has under development. Nevertheless, these capabilities are alluded to in several of the diagrams, which show a keen interest by the military in OOTW---Operations Other Than War. "They have things like information influence, perception management, and PSYOPS---psychological operations," says Wayne Madsen, a lead scientist at the Computer Sciences Corporation in northern Virginia, who has studied the summer study report. 'Basically, I think that what they are talking about is having the capability to censor and put out propoganda on the networks. That includes global news networks like CNN and BBC, your information services, like CompuServe and Prodigy,' and communications satellite networks. 'When they talk about 'technology blockade,' they want to be able to block data going into or out of a certain region of the world that they may be attacking.'"

... at first I was thinking maybe this was just taking the opportunity to innocently clear out all the poor people and take over their land and build beautiful condos and shopping malls.

But with the army coming in and taking over reeks of a larger plan in mind.

The above article revealed how strategically important New Orleans is to, let us say... commerce minded people.

So this innocent 'we are just clearing out the poor colored people' may itself just be a ruse to a larger deception were the losers will be the bigger fish and could very well be the middle and upper class of whites who are the present owners currently in control of all the trade and commerce.

In the old days kings didn't wage war just for the simple reason of kicking peasants off their land and stealing their vineyards.

Real estate was involved but it was more to seize control of markets, resources, trade routes industry and commerce.

New Orleans is edging closer and closer to a precipice of total asset and commerce take over. Control the port of New Orleans and you could very well control the lion's share of US Trade. Now that is something someone in history has started a shooting war over.

But a shooting war may not be necessary.

After Katrina, all you would need to do is flood the joint, smash every business in the city, destroy by burning the assets of any body whose wealth would cause a problem or put up resistance, destabilize the population by turning them on to each other and then come along and pick the eyes out of it after prices have collapsed.

That sounds more in line with human nature, don't you think?

We could be witnessing the slow decay of national government and the slowly creep towards the feudalization of the United States of America.

I wonder who the King of New Orleans will be?

The concept of precedence as a method of legal process is like a whore house on wheels. You can wheel it where you want.

There are so many obvious shortcomings of the administration on different levels, so this will have HUGE political impact on the US.
