📖 **The Israelis get a wall and New Orleans gets flooded** [ Post [293936138](#) ]

## The Israeli wall is 455 miles

To put a wall around New Orleans would be 50 miles

American taxpayers gave \$10 billion in 1991 to relocate millions of Russian Jews. The American taxpayer gave Israel an apartheid-enforcing wall, built them scores of house in Gaza, and now they get \$2.2 billion to move out of their illegal settlements.

Now, federal troops are sent in with 'Shoot to kill' orders because people are stealing blankets and baby food and other necessities from Zionist-owned Walmart stores..

What is happening in New Orleans comes as no surprise to the informed because for years proposals to upgrade the sinking levee system were being denied due to lack of funding. The federal government will SEND BILLIONS of dollars to Israel, and BILLIONS of dollars to Egypt for not going to war with Israel, and then spend OVER \$300 BILLION dollars for a regime change in Iraq because OF ISRAEL. It is about time folks started asking our government why they can't find the money to maintain the levee systems in New Orleans --

Quote:

"Washington knew exactly what needed to be done to protect the citizens of New Orleans from disasters like Katrina. Yet federal funding for Louisiana flood control projects was diverted to pay for the war in Iraq".

September 1, 2005

## ***Why The Levee Broke***

**By Will Bunch**

Even though Hurricane Katrina has moved well north of the city, the waters continue to rise in New Orleans on Wednesday. That's because Lake Pontchartrain continues to pour through a two-block-long break in the main levee, near the city's 17th Street Canal. With much of the Crescent City some 10 feet below sea level, the rising tide will not stop until it's level with the massive lake.

There have been numerous reports of bodies floating in the poorest neighborhoods of this poverty-plagued city, but the truth is that the death toll may not be known for days, because the conditions continue to frustrate rescue efforts.

New Orleans had long known it was highly vulnerable to flooding and a direct hit from a hurricane. In fact, the federal government has been working with state and local officials in the region since the late 1960s on major hurricane and flood relief efforts. When flooding from a massive rainstorm in May 1995 killed six people, Congress authorized the Southeast Louisiana Urban Flood Control Project, or SELA.

Over the next 10 years, the Army Corps of Engineers, tasked with carrying out SELA, spent \$430 million on shoring up levees and building pumping stations, with \$50 million in local aid. But at least \$250 million in crucial projects remained, even as hurricane activity in the Atlantic Basin increased dramatically and the levees surrounding New Orleans continued to subside.

Yet after 2003, the flow of federal dollars toward SELA dropped to a trickle. The Corps never tried to hide the fact that the spending pressures of the war in Iraq, as well as homeland security -- coming at the same time as federal tax cuts -- was the reason for the strain. At least nine articles in the Times-Picayune from 2004 and 2005 specifically cite the cost of Iraq as a reason for the lack of hurricane- and flood-control dollars.....

Had our priorities been straight, the money needed to maintain the levee would have been available. Instead, our priority has been on propping up ISRAEL and waging wars on ALL of Israel's enemies and these costs have resulted in serious cutbacks. The Army Corps. of Engineers wanted \$62.5 million to fix the levee. Apparently they got \$10.5 million instead. That's about \$52 million short, or the equivalent expense of about SEVEN HOURS OF THE IRAQ WAR!!

 **New Orleans has 350 miles of levees designed for Cat. 3 hurricanes**  [ To: [The\\_Skunk](#) | Post [293939109](#), reply to [293936138](#) ] (Score: 1)

"Levee Upgrade

Until the day before Katrina's arrival, New Orleans's 350 miles (560 kilometers) of levees were undergoing a feasibility study to examine the possibility of upgrading them to withstand a Category Four or Five storm.

Corps officials say the study, which began in 2000, will take several years to complete.

Upgrading the system would take as long as 20 to 25 years, according to Al Naomi, the Corps' senior project manager for the New Orleans District"
