

Marines Question The Sophistication Of Latest Attacks

Tanks and armored vehicles aren't easy to take out.

Shape Charges Planted Under The Road

A Shape Charge Fires A Depleted Uranium Projectile

The projectile is followed by the entire top of the mine

Marines Are Questioning Advanced Weapons

These are [highly advanced](#) and powerful weapons. They aren't being made out of old ammunition stockpiles, as the press says. You don't flip a 70-ton battle tank on its back that easy.

The Attacks On Specific Targets Come Into Question

The odd part is that the targets seem to be hand-picked. They range from an SUV with six snipers, to an APC carrying [female Marines](#) to a checkpoint.

The [attack targets](#) seem to be hand-picked, in order to cause maximum psychological effect and angering of the US military, as well as the American people at home. Only the Zionists benefit from such anger.

The Detonators Are The Key

Marines suspect laser detonators, or proximity fuses. The vehicle will have a transmitter planted on it. A laser receiver then sends an impulse to a detonator as the vehicle crosses the beam. The bombs are under the roadways' center lanes, and pick off only the targeted vehicles.

How It Works

A shape charge is planted under the road, on the route the tank will take. A friendly IDF advisor, or Israeli intelligence agent working as a [contractor](#), plants the transmitter on the tank. As the tank passes the laser reader/receiver, an impulse is sent to the detonator.

How Complicated?

Like railroad cars being scanned by a bar code, or the grocery clerk scanning your corn flakes at the checkout counter and getting the

price via UPC Code.

IDF Bomb Experts

It seems that an IDF "advisor", or civilian contractor, is 'Johnnie on the spot'. [Israel Defense Industries](#) makes shape charges.

Or how about those Israeli contractors at Abu Ghraib prison?

Rumsfeld Blames Iran

WASHINGTON ([CNN](#)) -- U.S. Defense Secretary Donald Rumsfeld said Tuesday that weapons recently confiscated in Iraq were "clearly, unambiguously from Iran" and admonished Tehran for allowing the explosives to cross the border.

Israelis Plant A Bogus Story

In this story, they say that the Marines suspected the Iraqis have sophisticated devices that may have been similar to Israeli equipment. The story will slowly morph into stolen equipment that was duplicated in Iran.

It seems the story of the 19 Israeli mercenaries, who were bomb disposal experts that were arrested for firing on Marines, is now history.

So What's The Real Truth?

Israel put us in Iraq to kill off Iraq's military, leaders, and all possible future resistance. They have assured the provocations, and slaughters like Fallujah, through hand-picked Generals Franks and [Natonski](#), who are both Zionist Jews.

When an operation is about to commence, such as [Operation Matador](#), which will secure the Syria border towns, or Haditha, which provides the electrical power for western Iraq, the Mossad will pull a heinous act, that enrages the Marines.

In Haditha, Israeli intelligence hit a convoy with six snipers, and two days later, they took out a APC with 14 Marines. The Marines will now hit the town looking for blood, to avenge their fallen.
