

## About Those Nuclear Attack Speculations

Some rumors eventually prove to be accurate foreknowledge. I hope that this one turns out to be silly paranoia spawned by someone (me) who gets too much email and worries too much!

We hear it every day from our government officials: “It’s not a matter of if, but when!” This phrase of course refers to the domestic nuclear terrorism that our government tells us is inevitable. Naturally when our government tells us this we have to respect their words. But when similar information is sourced to independent media the “[conspiracy theory](#)” tag is immediately applied. Let’s all hope that we can look back at this note and tag it as well meaning alarm and not as foreknowledge.

### **Before I fill you in on the information rumor mill regarding supposed upcoming nuclear terror let’s keep a few things in mind:**

1. The US government is warning us that a nuclear terrorists attack is imminent. It is just a matter of time.
2. Nuclear weapons have only been manufactured by governments; with the US government being the most prolific producer.
3. The above 2 facts should lead you to realize that nuclear weapons do not get used without some kind of government involvement. Governments are the only entities that have the ability to manufacture nuclear weapons and they have always been in complete control of these weapons.
4. The fact is that no nuclear device has or will ever go off without the knowledge of at least one government that has a nuclear weapons program. We all know about the official nuclear capable nations and we all know that Israel is the unofficial nation to have nuclear capabilities. What is taking place, as was the case with Iraq, is that Iran is being set up as a nuclear threat in the event of a nuclear terror incident. Iran is not a nuclear WMD producer and if they were their technology would be so primitive that they would not be able to produce a small nuclear device that can be delivered by a terrorist. Nations do not jump from having no nuclear capabilities to producing the state of the art miniature nuclear devices. It just does not happen. Only the Soviet Union, the US and Israel would have that capability at this time. Perhaps some of the other nuclear nations can produce such devices but it is unlikely. What is surely unlikely is that Iran can produce them. Keep that in mind.

**More background:** Any president worth his salt is supposed to try to make the citizens feel safe and secure. George W. Bush and his [PNAC warriors](#) have done nothing but try to keep us frightened to death. Without even throwing a rock, by

keeping us scared, this administration has terrorized the citizens of our nation and of the world. They are terrorists by virtue of the fact that they keep us in a continual state of fear. George W. Bush and [his PNAC handlers use fear as tool to garner support for their otherwise unacceptable agenda](#). Any time they want to go after some person or some nation they raise the country's fear factor in relation to that person or nation to an unrealistic level so that Americans are frightened enough to permit the administration to do anything and everything to protect us. All this occurs even though the rationale for the fear is unfounded.

As professed by the members of the Bush administration who have taken part in the agenda of the Project for a New American Century (PNAC), events the likes of "Pearl Harbor" can frighten the people of this nation into supporting even the most radical agenda of their group. It is the old adage of being protected from a perceived enemy that is at play here. Even though issues such as environmental pollutants pose a far greater risk to the lives of Americans, the perceived threat posed by the media created bogey man known as the terrorist, is being used to scare the people into supporting Bush the "Protector." Operation Northwoods is a perfect historic documentation of this strategy. This operation was designed to utilize the fear factor to garner support for unnecessary military interventions. [Operation Northwoods](#) was a government plan to conduct false flag terror operations on our own nation and blame these events on a foreign country; in this case the country was Castro's Cuba. The US planned to conduct state engineered terrorism which would then be blamed on Cuba. The result of this operation would be public support for protection by any means necessary against a perceived threat (Cuba in this case). This is not a new concept, and has been used for centuries. [Hitler's self inflicted Reichstag Fire](#) is the perfect example of such state sponsored terrorism. Of course the examples are numerous. . If the 9/11 researchers are correct in their suspicions [those attacks served as a perfect example of a false flag operation](#). It had motive, means and response all fitting the blueprints for such a scheme.

**THE RUMORS:** I get a ton of email each day. I also read a great deal of news from a many sources. What I am hearing these days is very frightening, although it is VERY difficult to believe. It is for this reason I do not post all my information on the main web site. However I do want to share some of the chatter because if any of this information is accurate I want the real story to be heard BEFORE any official cover stories get out.

**I repeat this is all chatter...none of which I can corroborate.** There is quite a lot of information coming in so I will share some of it with you.

It is believed that [Dick Cheney, a known PNAC kingpin, has ordered plans to be drawn up preparing for a launch of a nuclear attack on Iran](#) to be used as a retaliation for a massive terror attack on the US. This information has come from several rather reliable sources. At the same time a stepped up PR campaign to make the public think Iran is developing nuclear weapons is underway.

Obviously Cheney can not launch an attack of any kind on Iran without provocation. I doubt that this nation will allow another Iraq to take place. So according to the rumor mill there are terror events planned that will provide the justification for a new military and perhaps nuclear strike by the PNAC crew.

My sources tell me that there will be one or more events taking place to justify such actions. The events are as follows: **(AGAIN, I REITERATE THAT THIS IS UNCORROBORATED RUMOR!)**

1. Terror attacks, perhaps in the form of perceived suicide bombings, will take place at venues that represent the heart of America, such as a baseball game or holiday celebration.
2. A US warship will come under attack in the Persian Gulf.
3. Nuclear terror will reach American shores. Small nuclear devices will go off in one or more American cities. These cities are to be large but not key cities like New York or LA. Death tolls of 200,000 per event are predicted.
4. I have received information from 2 sources (both sources claim CIA connections), that Mossad has started to pull their agents out of the US in anticipation of the nuclear events.

Some facts to go along with the rumors:

1. The events of 9/11 took place on a day and at the same time of day that [hijacking and terror drills in the northeast \(NY specifically\) were taking place](#).
2. The London bombings took place as [drills to deal with the exact kind of event were taking place](#).
3. Nuclear preparedness drills are to [take place in the US in August of this year](#).

Again...this is all just crazy rumor right now. But some rumors turn out to be legitimate foreknowledge. If these or similar events do take place, the word on the street as we know it today indicates that these events would have been state sponsored false flag operations. We should keep that in mind...but hopefully you will be able look back at this little blurb as paranoid induced hysteria.

From the rumor mill...
