THE HANKY-PANKY AROUND THE RECOVERING OF WTC-HARD DRIVES

Posted By: [FarSight3](#) <[Send E-Mail](#)>

In Response To: THE MOST IMPORTANT QUESTION OF 9/11: THE "PUT-OPTIONS"! (FarSight3)

Moments before the World Trade Towers collapsed, \$100 million in credit card transactions were sent through the computers inside the doomed buildings, transactions that should have vanished when the buildings collapsed.

But a German company was able to recover data from the hard drives pointing to WHO, armed with advance knowledge, executed this monstrous fraud. **But the company doing the data recovery was bought out, the project halted, while the FBI as usual does not look where it is told not to look.**

"PIRMASENS, Germany (Reuters) - German computer experts are working round the clock to unlock the truth behind an unexplained surge in financial transactions made just before two hijacked planes crashed into New York's World Trade Center on September 11.

Were criminals responsible for the sharp rise in credit card

transactions that moved through some computer systems at the WTC shortly before the planes hit the twin towers?

Or was it coincidence that unusually large sums of money, perhaps more than \$100 million, were rushed through the computers as the disaster unfolded?

A world leader in retrieving data, German-based firm Convar is trying to answer those questions and help credit card companies, telecommunications firms and accountants in New York recover their records from computer hard drives that have been partially damaged by fire, water or fine dust... – [here](#)

The CONVAR data salvage has made it completely clear that more than \$100 million in insider credit card transactions took place in the hours and minutes before the twin towers collapsed. The mainframe computers in the towers processed these transactions; and the credit card data would have been lost forever had it not been for the successful data reconstruction of the CONVAR specialists.

A German company, CONVAR of Pirmasens near the French border, was given more than 400 computer hard drives from the wreckage of the World Trade Center. These are extremely sensitive computer components that went through the collapse of the World Trade Center. Using blue laser technology, CONVAR succeeded in reconstructing all the data from the computer debris. This includes diverse financial data and telecommunication protocols up to a few seconds before the collapse of each tower. (Source: e-mail from CONVAR Germany on October 16, 2003.) The U.S. government's blatant lie about the allegedly missing black boxes is outright made ludicrous by this fact.

The reconstructed data was given by CONVAR to the FBI. The FBI was held by law to investigate, based on the reconstructed data, who placed the inside transactions. The FBI is doing no such thing. – [here](#)

GFP would like to inform, that in June 2002, Ontrack/Convar

was aquired by Kroll Inc. (Kroll O'gara Eisenhardt), which has strong with the US Government. One of their former employees, Jerome Hauer, organised a security job for ex-FBI anti-terror chief John O'Neill in the Twin Towers, where he died on Sep11th.

Kroll O' Gara Eisenhardt is one of the oldest security companies in the United States and, some say, responsible for every U.S. President since the end of WW2. What does an upstanding, powerful company like Kroll do in its spare time? Why it trains local forces in Saudi Arabia, of course!

One partner of Kroll, Cable & Wireless provides training in Counter-Terrorism and Urban Warfare in Saudi Arabia. In August 2001, former Kroll employee, Jerome Hauer, arranged a security job in the Twin Towers for FBI Agent John O'Neill. At the time, O'Neill had been investigating ENRON's business deals with the Taliban and was subsequently pulled from that investigation. Neither Kroll nor Hauer was asked to testify about this coincidence. – here Jerry Hauer has been around a bit – Batelle, Dyncorp, SAIC (note DAVID KAY'S (of Iraq WMD fame) MENTION of him) ...
