A monumental new scientific opinion poll has emerged which declares that only 16% of people in America now believe the official government explanation of the September 11th 2001 terror attacks.

According to the new **New York Times/CBS News poll**, only 16% of Americans think the government is telling the truth about 9/11 and the intelligence prior to the attacks:

*"Do you think members of the Bush Administration are telling the truth, are mostly telling the truth but hiding something, or are they mostly lying?"*

Telling the truth 16%

Hiding something 53%

Mostly lying 28%

Not sure 3%"

The 84% figure mirrors other recent polls on the same issue. A **Canadian Poll** put the figure at 85%. A **CNN poll** had the figure at 89%. **Over 80% supported the stance of Charlie Sheen** when he went public with his opinions on 9/11 as an inside job.

A recent CNN poll found that the percentage of Americans who blame the Bush administration for the September 11, 2001, attacks on New York and Washington **rose from almost a third to almost half** over the past four years. This latest poll shows that that figure has again risen exponentially and now stands at well over three quarters of the population.
