**ChemTrails - 80% population reduction of earth !!!**

**STOP  
CHEMTRAILS**

**LOOK UP IN THE SKIES  
PLANES ARE SPRAYING CHEMICALS  
CAUSING SEVERE SICKNESS  
LOOK ON INTERNET: CHEMTRAILS**

THIS IS WORTH YOUR TIME TO READ !! It's long! This page is comprised of a collection of articles on this issue. There is more to this than you think. For many of you this is going to seem pretty far fetched. For those of us who have been researching and studying this issue for some time to see if it is true or not ; we knew this IS happening, just didn't know why until now. It's a worldwide population reduction action starting with the US, Canada, and Mexico. Read the article further down about the airplane mechanic who discovered how the planes are fitted with this equipment and just how the chemicals are put aboard without anyone's knowledge. We now know WHY they are doing this. They want to reduce the population by 80%, starting with the US, by infecting us with a deadly Spanish Flu virus which they will give us along with a required or flu vaccination for something else. The airplanes are spewing out materials that will coat your lungs and make you much more susceptible to this new LIVE virus that will be included in the same shot as the dead virus. DON'T take flu vaccinations! All the info is right here folks; you just have to read it.

---

**CHEMTRAILS:  
THE BIGGEST NEWS STORY THE WORLD HAS EVER YET  
TO SEE**

DMN Editors Note: Be aware that vaccines have been proven to be deadly. Be very cautious about rushing out to find a vaccine for any reason!

**THE BIGGEST NEWS STORY THE WORLD HAS EVER YET  
TO SEE:**

Chem Trails (why?) / Eugenics / New World Order plans to kill the population off with a strain of Influenza-A (a deadly flu virus) starting in the US soon first.

(why?)

[ preamble: Sometimes there are messages that the whole internet community shares with one another (like the Palm Beach ballot cartoon); I deeply pray that this message

becomes one of those... it is not about anything else but the \*hope\* that this emergency broadcast message will get transmitted around the world and to many millions of people, hopefully the billions of us. It is far more important than "voting" - this letter is about "living". YOUR OWN LIFE MAY BE IN DANGER IF YOU DO NOT GET THIS MESSAGE AND PLAN TO REACT.

This letter has absolutely nothing to do with "money" - it has everything to do with your "life".

I pray you never catch the discussed deadly NWO/H1N1 Influenza-A flu virus now in stock to be soon released to the majority of the Earth's population which includes you! That is what this recent rash of high altitude chemical spraying above densely populated areas in the US/Canada/Mexico that you may be starting to become aware of is all about - to get microfibers in your lungs to make the virus spread like an unstoppable wildfire. They wanted all of us to build this entire world for them; now they want to claim it for themselves. Nobody with these microfibers stuck to the linings in their lungs will be able to escape certain death without an appropriate inoculation against the H1N1 "Spanish Flu"-strain virus when it starts becoming an epidemic here in the US first. I am taking a personal day from my other work to get this message out. It is not my intent to fruitlessly scare you or anybody. It is my intent to report these facts to you and inform you! ]

People of the world,

This is the most frightening news. It is quite unbelievable. I will say that first. It seems that no matter how much the world's most outspoken freedom loving and patriotic activists, notably our most beloved Alex Jones of [www.infowars.com](http://www.infowars.com), try to stay on top of all this recent New World Order activity and machination - we seem to be always one step behind the most awful plans. If I am wrong, so be it - if I am right - we must stop it at all costs. Please judge for yourselves. In my case, I have just become victim of it last night in Austin Texas. A

dense cloud layer of Ethylene Bromide and microfiber dust was jettisoned out of KC-135 tankers above Austin Texas in record amounts last night - as reported not in the least by the local or national media - but shouted out at America to "Wake Up" through cable access TV out of Austin Texas. I am still coughing due to my first exposure to it - just like I was informed last night - an hour before I become congested (I usually do not go downtown where the concentration of the chem trail substances is heaviest). I am still congested this Thursday morning, Feb 28th as I type this emergency broadcast letter out. This is not \*laryngitis\* floating around folks - as your officemates might be complaining about recently... I have just learned late last night/early this morning about of the rash of chem trail spraying across the rest of America as reported on the CACTUS (Citizens against Chem Trails in the US), <http://www.geocities.com/cactusmailbox/CACTUS.html> , site and others.

Chem Trails were sprayed heavily over Austin Texas (my home town) last night. Perhaps you have seen these chemical trails aloft in your own city/hometown. I learned of it as I sat in on a public access show, Common Sense, at a local studio here in Austin Texas -> the same studio that Alex Jones uses to broadcast his show and latest series 9/11 - The Road to Tyranny, see: [www.infowars.com](http://www.infowars.com) . However I don't even think Alex is, at this moment - prior to sending the message, fully aware of the unbelievable horrible scheme being enacted on the American populous right now. Please send this e-mail out far and wide - or at least the important parts of it. (at the very least pass the article or the link below around). The global elite (yes, about 9 people control over 50% of the world's wealth) want to kill you and your families off very soon (in a historical perspective) with a deadly strain of "THE FLU" - genetically engineered and known as H1N1 Influenza-A. WHAT!?! Why? These globalists think a population between 400-500 million is best for our planet. 9/10 are desired to be killed off by the New World Order Global elitists. You may have heard rumors of this already. However, they are not intending to use Anthrax

bacillus spores - for they stay around too long and are too hard to get rid of... If you think I am crazy, then judge if I am an intelligent person by looking at my resume:

[www.next-commerce.com/resume](http://www.next-commerce.com/resume)

. (of course this is a risk to release that to the public - but I am only one person - and I concerned about the other 5-6 billion of us at the moment!) Basically I am pretty/fairly smart/literate/informed and I like to be aware of what is really going on. I pray I can deliver the message now.

\*\*\*\*\* ->>> The purpose of all this chem-trail spraying is revealed in detail below - it is to make it easier for an airborne viruses to attach to the linings in your/our lungs. What it does is "sensitize" you to airborne viruses. It will make it easier for you to become infected - to "catch" the flu from others. That is the purpose of Ethylene Di-Bromide and the microfibers being reported and analyzed on the CACTUS website - and many hundreds of other sites. Just do a [www.google.com](http://www.google.com) search for "chem trails eugenics" - and make sure you at least read the article I have inserted below. (where a former government scientist is trying to warn us of this master eugenics plan through a posted letter to the public.)

It has become clear to me that the next wave of government sponsored terrorism will not be an airplane crashing, or an exploding building, or a tactical nuclear strike - but it will be the murdering of most of the great majority of the US civilian population one day soon - thru a cataclysmic flu epidemic/pandemic over a period of mere weeks - all while it is known that the populous will go into a state of mass confusion - and only the elite and portions of our own military will be properly inoculated against the deadly engineered H1N1 Influenza-A virus - those who have been/will be pre-selected to survive the "eugenic cleansing" of the Earth. (AIDS and EBOLA are just other examples of government created bio-terror that has been released in past decades - created for their top secret population control studies enacted by Henry Kissinger in the early 1960s.) (See the new book "Emerging Viruses". This is the real truth folks - not the stories of a black

man having sex with monkey in Africa in the early 80s!

So, to answer your most probable first question -> Why here in the US first? Because Americans would be the first to stage a massive revolt if we knew of this plan being put into action first anywhere else in the world. This is what the scientist also agrees upon in his report below. Therefore, the spraying is concentrating on us right now, US citizens first. This is not "corn meal" being sprayed over our most densely populated areas folks as the FAA has stated back recently to the CACTUS group. This is a chemical mixture mixed with microfiber particulate that will make a mass infection much more prominent (and rapid) when the deadly H1N1 Influenza-A Flu virus is released onto the public (an even more deadly engineered derivative of the Spanish-Flu virus that killed hundreds of thousands worldwide in the 1960s for those of you who can remember.)

The H1N1 influenza-A "Flu" that is planned to be released onto the world populous by the power elite will not be released by airborne spraying most likely - the eugenics plan now revealed will release it in this (or next?) years "flu shots"! Live H1N1 virus placed into the inoculation/"flu-shot" mixture folks! -> Safe to say, by the time Bush's first term comes up the global epidemics/pandemics will begin.

After that, the population will be reduced in just mere weeks. See, Smallpox can't be used - because everyone over 30 years old has already been inoculated against the smallpox virus - it is not as fatal as Influenza-A as well. Please read this scientist's report below (and hopefully weep). A government scientist has released the Bush/Eugenics/NWO (NEW WORLD ORDER) plan for America and the rest of the world. I am surprised everybody hasn't seen this website yet: <http://gulagamerika.homestead.com/guidestones.html> The goal: a world population less than 500 million. The goal in the US - and 80% reduction in the population. These are the facts folks - I just pulled it together from around the internet. I am not an "info-terrorist" as I will likely be labeled by the government. Although my house will likely be raided soon and

the computer I am typing on will be stolen.

->>>> A former government scientist has recently released this information, his own compiled research, to all of us as a warning. Also, now having much less significance remarkably, during my research tonight I learned that the War on Terror in Afghanistan is not mainly about Oil. It is about Opium - the profit margins are much higher in the opium trade. Afghan Farmers have been encouraged to grow opium instead of wheat! The 2002 crop was planted this last January - and opium poppies are growing all over Southern Afghanistan right now! WHY!?!?!?! The same reason folks! Total NEW WORLD ORDER Global control of all the people of the Earth! (for more information on that you can write me at [eric@allcheckout.com](mailto:eric@allcheckout.com))

I am not risking my reputation (or life) for nothing here folks. But I am one that has connected all the dots - and I am stunned about what I have just learned; when I went out to investigate what was making me choke and cough last night. Imagine what could be next! - a pandemic of a deadly flu virus that will wipe out the majority of the population of the United states, Mexico, Canada, etc until the whole world's population is reduced; where the chem trail spraying is happening more and more right now - today! Imagine all our wealth and property that will be left for the power elite to control after such a eugenic "cleansing" of over 5 billion people... Please don't fall and stumble here on your partisan Democrat/Republican pride! Let that go! This is way above American politics! Even Al Gore knows that this must be done to keep "Earth in the Balance" - and his own life would be threatened by the global elite if he came out with these substantiated facts. Al wants to live obviously and he wants Tipper to live also and the rest of his family. The "power elite" includes all of the Bush Family, The bin Laden family of Saudi Arabia, Bill (and Hillary?) Clinton, Al Gore and associates, the entire Bush cabinet/administration, Tony Blair, the European Union, the UN, the counsel of foreign relations, - all their friends and all those wanting to be saved and play a role in on the "New World Order". Killing 5000 or 5 billion - there is no real human

difference to these new World Order/Illuminati/power elite traitors to humanity! They actually think they are doing a \*good\* thing besides saving their own lives - they are "cleansing" the Earth's abundant population! China is in on this too Folks! They are controlling the Panama canal - and some of our seaports on the East Coast right now! America just gave the Panama Canal to the Chinese government for goodness sakes folks! - right under your nose! CONNECT THE DOTS!

If you only believe 1% of this, I ask that you inform others and let them judge these facts for themselves as well. It is a basic spiritual human trait to desire to protect others. There are other solutions than a massive extermination of the population of our planet; there has to be!... If you don't think the Bush family can be the principle "leaders" of this New World Order quest -> look no farther than the family history as it is exposed in the Bush Family Unauthorized Biography -> [http://www.padrak.com/alt/BUSHBOOK\\_INDEX.html](http://www.padrak.com/alt/BUSHBOOK_INDEX.html) See the former Bush/Nazi party dealing exposed. Prescott Bush was indicted by our own CIA shortly after WWII before his death for laundering money for the Nazi party!!!, the biggest eugenics group there has been so far. Then as you know - his son, George Herbert Walker Bush rose to the top of CIA leadership in the decades to follow! Then he become VP, then President, and now he is calling the shots for his son - who is now adroitly surrounded by the same Bush administration as before! ( There, I think I said everything I needed to say to whole world. I personally don't need any more proof folks. ) At the end of this letter I will include google searches for these keyword sets: BUSH EUGENICS and CHEM TRAIL EUGENICS. (you will find more Bush family history links in both those searches.) Another great compilation site for the truth about Bush/Nazi/Eugenics is [www.robertlederman.com](http://www.robertlederman.com) - a Jewish reporter in NY who was arrested 40 times by Rudy Guiliani over the past couple of years. I suggest everyone take a deep look.

MAY GOD BLESS YOU AND THE REST OF OUR WORLD!

-Eric Rainbolt Austin Texas 512-280-5835 (my number should never be infinitely busy or disconnected) Also you can contact Alex Jones at 512-292-0070 (I hope he includes this info in his next 9/11-The Road to Tyranny series) eric@allcheckout.com www.thatsonofabush.com (my previous Selection 2000/Enron/Bush/New World Order coverage site.)

p.s. one of the hosts of last nights cable access show "Common Sense", Bill, told me he is quickly selling his house here in Austin Texas and moving to Costa Rica as soon as he can. It was his last show. He talked at length about the chemicals being released over his neighborhood. He simply can't stand it anymore. He has taken some of the pictures of the chemical trails being released high above by US military aircraft. (You can see the actual chemical ports - the chemicals are not being "burnt" by the jet engines.) Now I know why. BTW, the release of these agents is otherwise secretly known as "Project Cloverleaf" - even top airline executives know about this!

CACTUS (Citizens Against Chemtrails U.S.)  
<http://www.geocities.com/cactusmailbox/CACTUS.html>

WELCOME! You've reached the official website of C.A.C.T.U.S. (Citizens Against Chemtrails U.S.), a grassroots group dedicated to halting the aerial spraying of America!

Since 1998, US Air Force tanker planes have been intensively spraying broad white plumes over virtually every major city and rural area in the United States and Canada. Chemtrail spray planes have also been sighted over England, Europe, Australia, Mexico, Bahamas, Brazil, Croatia, and Puerto Rico.

Contrail? Condensation trails form above 33,000 feet when hot engine exhaust momentarily condenses ice crystals into pencil-thin vapor trails that quickly vanish like the wake behind a boat, according to the U.S. Air Force. .... VS ..... Chemtrail? Chemtrails look like contrails, but are much thicker. Instead of quickly dissipating, chemtrails expend for hours, joining together to form a thin, white veil that persists all day.

Thousands of eyewitnesses - including pilots, police officers and military personnel - report seeing up to 8 or more tankers laying chemtrails in x-patterns, parallel rows, tic-tac-toe or cross-hatched lines.

The True Purpose of Chem Trails? 4-17-01

The following is reprinted from David Icke's Magazine  
(Special thanks to Ken Welch)

So you haven't yet figured out the airborne conditioning-agent release program that is being operated by the government. I'll give you some hints, but first I'll give you a little information about myself. I'm a retired government scientist with an advanced degree in one of the health-related disciplines. I do not use my real name for fear of retaliation, either against me, or against members of my family. I always try to route my e-mail communications so that they appear to come from another source, usually from one somewhere within the government. Sometimes I use the internet resources of the public library - whatever it takes to hide my true identity and confuse those who don't want the sort of information I possess to fall into the public's hands.

I have a small circle of friends who are, or were, in key positions within our military and several government agencies. These are not the very top level personnel, but mid to upper mid-level people, scientists and analysts, who are in positions where they can see the day-to-day activities of what's going on, who are charged with implementing the details, but who are never quite privy to the schemes behind the work they do. Each of my contacts has been able to supply me with a portion of the puzzle, but separately, none of them understands the whole story. I'll tell you what I've pieced together so far. But I have to admit that this information frightens me because there is no place I can go with it. What am I supposed to do - write my congressman? I believe that would be like signing my own death warrant.

This whole chemtrail issue is related to the plan for decreasing the world population to around 450-500 million -- and starting

with the US first. Why? The people of the US are the only ones with even the remotest chance of stopping this. That is, if they knew about it. That's why the US has to be the first to go. You have to understand that the world's elite covet the US for its geographic diversity - and they would love to return this country to its condition as it existed prior to Columbus setting foot here, but without the Native Americans this time of course.

You may have already heard how several national parks have been designated as world biospheres - that's the plan for all of North America, a giant nature park and playground that will be devoid of annoying human beings (that would be us). And the people actually involved in doing the spraying, as well as those who will take part in the rest of the plans, are being duped into believing they will be spared, that is, permitted to live and remain on this continent as administrators and caretakers of this vast nature preserve. I understand that about 150 to 200 thousand people are projected as necessary for maintenance purposes. But it's likely these people will not be Americans. Those in charge wouldn't want to risk the possibility of some sort of revolt, so the workers will probably be brought in from Europe and Asia.

There are rumors floating about the internet that the chemtrails are part of some sort of secret program the government is doing to protect the US from future biological attacks. Nothing could be further from the truth. The plan is to sensitize, or condition, the US population to being wiped out by influenza A. Over the past few years, people have been encouraged to get flu shots to protect them against the generally non-lethal strains that circulate through the population during flu season.

Each year the US government has guessed which strains were most likely to spread. They seem to always guess right - don't they? This flu season, the government protected people with a trivalent vaccine that included the A/Beijing/262/95-like (H1N1) and the A/Sydney/5/97-like (H3N2). It also contained the B/Beijing/184/93-like hemagglutinin antigens. For those

not familiar with virology, the H and N refer to proteins on the outside of the virus, the hemagglutinin and neuraminidase, which are responsible for the virus attaching to, and then invading, a host cell. The public has been quite pleased with the success of the vaccines offered so far. But that will change in the future.

Researchers at the US Army Medical Research Institute of Infectious Diseases (or USAMRIID) at Fort Detrick in Frederick MD have reconstructed and modified the H1N1 Spanish Flu virus, making it far more deadly than it ever was back when it was responsible for the 1918-1919 flu pandemic that killed over 20 million worldwide and over 500,000 here in the US. Consider that it could have killed many more, but back then, people couldn't hop on a jet and travel from New York to L.A. in five hours. Now, our ability to travel will increase the spread and will be our downfall.

The flu vaccines contain killed virus and protect the body well against challenge by that particular strain, but work poorly against other strains not included in the inoculation. At some point, the vaccine stockpile will include the more lethal modification of the 1918 H1N1 in its live form. Most people receiving this vaccine will simply be renewing their annual flu shot, and the vaccine will still include the inactivated version of the more benign form of H1N1 (as was included in this year's vaccine). The presence of the milder strain in the inoculum will slow down the progression of the more lethal H1N1 form, so people will become sick more slowly - but they will still eventually die. It will just take a few weeks longer.

In the meantime, they will be carriers for the lethal form of the virus, passing it on to everyone with whom they make contact. And as people hear that others are dropping dead from the flu, they will flock to get their own vaccination. And the entire population will be more receptive to infection because their lungs will have been pre-conditioned to guarantee it.

If you will remember back to 1968 and '69, the Hong Kong flu, which was influenza A type H3N2, killed over 30,000 people in

the U.S. alone. That was a fortuitous learning event for some because it taught them that the flu could still conceivably be used to wipe out a population. But at the same time, it pointed out the need to precondition the populace so that those who might normally be resistant could be rendered susceptible. Hence the development of the vaccine program and the aerial spraying procedures to condition the population. The purpose of the chemicals in the chemtrails is to help the viral envelope fuse with lung cells, permitting easier penetration and infection.

But what about those few individuals who don't succumb to the flu? Probability alone demands that there will be some who survive - pockets of the population that are either not reached or somehow (and this is less likely) are resistant to the lethal H1N1 strain. At this point you must also remember that our military personnel have been immunized against a variety of pathogens, including the anthrax bacillus.

For those geographically isolated areas where the flu doesn't do its job, it's a fairly simple matter to lay down anthrax spores and then send in what's left of the military to take care of anyone still breathing. The anthrax spraying will probably come under the guise of a flu protection program to save those still alive after the epidemic. And the military, having been exposed to civilians with the flu, will eagerly await their own flu shots. I should emphasize that this is a last resort scenario. Those orchestrating the plan will not want to use anthrax until all other possibilities are exhausted - this because of the long-term viability of anthrax spores. To scatter them over the countryside would mean the area would be dangerous for use by humans, at least those not vaccinated against the bacteria.

And think about this for a moment. Why do you suppose agencies like Fish and Wildlife are so eager to reintroduce wolves and other species into areas of the country which haven't seen these animals for generations. It's all part of the plan to restore this land to what the elite envision as its early paradise-like state, with wild animals freely roaming the

uninhabited plains and forests. Granted, it will take some time to clean up the place and to maybe destroy a lot of small towns that might otherwise be considered a blight on the landscape. But for the global elite it will be a small price for us to pay for their enjoyment.

## Sky Samples Analyzed

by William Thomas with Erminia Cassani

VICTORIA, British Columbia, Canada, April 22, 1999 (ENS) - As unmarked tanker-type aircraft continue spraying sky-obscuring chemtrails over regions of the U.S. and Canada, this writer and American journalist Erminia Cassani have obtained laboratory tests of fully-documented samples of aerial fallout. The samples were tested by a U.S. Environmental Protection Agency (EPA) licensed facility.

The two samples were taken from aluminum-sided structures in separate states nearly a year apart after their respective owners went outside in the wake of low-flying aircraft to find dwellings and outbuildings splattered with a brown, gel-like substance.

Trained in the health sciences, Cassani carefully took samples from the second incident which occurred at 2:00 pm on November 17, 1998. The samples were taken from property directly under the flight approach path to Thomasville airport, an old airport once used for commercial flights but now used only for small planes. However, the woman whose house and property the sample substance fell upon, observed that military aircraft have recently been using this airport for "test runs" circling the immediate area and returning to the Thomasville airfield. This facility is located a 45 minutes drive from the Harrisburg International Airport in Pennsylvania.

Noting nearby military hangars filled with big helicopters, Cassani videotaped a house splattered on all sides, as well as

the driveway. The reporter also interviewed a man living near the main runway who claimed that a similar goo had hit his house the previous October.

Cassani became ill with flu-like symptoms and was sick for four days after obtaining the sample. When a marine biologist at a nearby university started working with the gel material, he too immediately developed upper respiratory symptoms. The woman whose house had been struck also caught the "flu." Two weeks before Christmas 1998 she suffered a heart attack.

Coliform tests by the state Department of Health were negative. But when the university Ph.D. biologist turned his microscope to high power, he found the glass slide teeming with a protozoan life form he said was "very resilient to very cold temperatures."

The laboratory staff who eventually received our sample for a complete analysis had never seen cell cultures bloom so fast. Cell cultures normally take several days to grow; ours flowered into brilliant colors within 48 hours of being placed in petri dishes.

Exclaiming that, "It was all over the plate," the biologist who examined our first sample wanted to know where we had obtained this "bio-hazard" material.

No markers for jet fuel were evident. But the TNT and fuel-eating *Pseudomonas fluorescens* found in our sky sample is listed in 163 Pentagon patents for bioremediation.

Sometimes employed against oil spills, *Pseudomonas fluorescens* can consume jet fuel as a primary food source. This bacteria can cause upper respiratory illness and serious blood infections in humans.

Unlike *P. fluorescens*, the streptomycetes present in our sample is rarely found in outdoor samples. Used to make several antibiotics, this fungus can cause severe infections in humans.

Also isolated in our sample was a fluorescent-type of bacteria found in distant coral reefs, which can be used as a "marker" in lab tests.

Another bacillus contained a "restriction enzyme" used in research laboratories to "restrict" or cut DNA material for transfer to other organisms. A computer search for this usually benign bacteria turned up *Streptomyces* and *P. fluorescens* on the same reference page - as well as the American Type Tissue Culture Corporation. U.S. Senate documents show that this Maryland company made at least 72 shipments of germ warfare cultures to Saddam Hussein's scientists between October 1984 and October 1993.

Our second sample was obtained from the U.S. eastern seaboard after Cassani tracked down a woman whose house, barn, cars, lawn and driveway were covered by a similar brown gel on January 17, 1998. This homeowner noticed planes making "tic-tac-toe clouds" and "weird designs" in the sky before the goo fell - possibly from clogged spray nozzles.

She had been at church while neighbors watched a large aircraft circling so low it rattled windows and almost hit a barn, before climbing toward a disused commercial airfield recently renovated for military flights. When the homeowner took a scraping into the local lab, she was told of similar incidents in the vicinity.

The Federal Aviation Administration (FAA) dismissed the substance - which resisted power-washing and months of weathering - as "corn meal."

But despite being stored for a year at room temperature, our EPA registered lab found this second batch of dried-out gel teeming with the same bacilli present in our more recent sample. *Streptomyces* was again found, as well as a bacteria capable of causing a painful ear infection.

Three other molds in this second sample included a "black yeast" stockpiled by the U.S. Army as a "bioremediation organism" that thrives on TNT and petroleum spills. This black

yeast can also cause a nasty upper respiratory infection - as Cassani discovered when her left lung became painfully infected with black mold that could have come from the sample she handled.

We decided to withhold the name of our testing facility after an environmental lab in Ohio was besieged by calls from a militia organization claiming that a jet fuel additive identified by Aqua Tech Environmental Inc. was part of a conspiracy to cull the population.

Larry Harris brought the controversial sample to Aqua Tech for analysis. A registered microbiologist who once worked on top U.S. biowarfare projects, Harris says that a lab technician immediately identified his sample as JP-8 aviation fuel similar to dozens of samples being brought in by sick pilots and ground crew.

But after the harassing phone calls began, another chemtrails investigator who was with Harris when he submitted the fuel sample to Aqua Tech told ENS that the "lab went cold" and would no longer confer with them.

A copy of Aqua Tech's report on Harris' sample has been obtained by this reporter. Submitted on September 17, 1997 and labeled "Jet Fuel," lab report number MEL 97-1140 identifies more than 15 toxic petroleum products - including toluene and styrene, as well as traces of the banned pesticide ethylene dibromide (EDB). Currently used as a JP-8 jet fuel additive, EDB was banned by the EPA in the late 1970s as a known carcinogen capable of causing severe upper respiratory reactions at repeated low-level exposures.

Harris charges that Aqua Tech altered its test results to "almost undetectable amounts" of EDB in order to fend off crackpots, protect government contracts and discredit his investigation.

Aqua Tech insists its report is accurate.

Despite efforts to protect her identity, our own friendly biologist

turned edgy and cold after finding few references to our toxic samples in medical books or Internet databanks. When Cassani suggested that this lack of information seemed strange, the microbiologist laughed uneasily and said, "Well, the whole thing is strange, the samples, where they came from. So I'm not surprised."

Similar encounters with a gel clinging tenaciously to porches, pick-up trucks and patrol cars have been reported across the USA - from Arizona's remote Mogollon rim to Aptos and Fresno, California and North Seattle, Washington.

The most publicized incident occurred in August, 1994, when gelatinous globs began raining on Oakville, Washington about 80 miles southeast of Seattle.

After local residents became sick with vertigo, lethargy and severe shortness of breath, a lab technician found human white blood cells in the sky goo. At the Washington State Department of Health, registered microbiologist Mike McDowell also discovered the sample swarming with *Pseudomonas fluorescens* and *Enterobacter cloacae*.

*Serratia marcescens* was found in yet another gel sample obtained in Idaho in late March, 1999. Often causing upper respiratory infections resulting in pneumonia, *Serratia marcescens* was sprayed into the New York subway system in 1953, and over Dorset, England from early 1966 to 1971 by the military in both countries. *Serratia marcescens* was supposedly withdrawn as a biological warfare stimulant in the 1970s when this infectious agent was deemed too hazardous for use on friendly "test populations."

*E. coli*, *Serratia marcescens*, and *Bacillus globigii* were sprayed over UK population centers to stimulate biowarfare attacks in the 1960s and 1970s, the London Telegraph reported in May of 1998. All three agents can cause disease in humans including pneumonia and chest infections. According to recent admissions by the British Defense Ministry, a Canberra jet bomber was modified with spray tanks to "act as

a spray aircraft for research into defence against biological warfare."

Microscopic examination of spider web-like fallout obtained in Sallisaw, Oklahoma in October, 1997 also turned up enterobacteria, which can cause gastrointestinal illness.

Despite these findings, microbiologists caution that the Oakville, Idaho and Sallisaw samples could have been contaminated by "background" bacteria present in the soil.

Experimental lab material found in our samples remains unexplained. As outbreaks of staph, recurrent pneumonia and meningitis continue to be reported in hospitals by newspapers across the USA, Cassani and I note that staph-related organisms turning up in test samples of airborne spray can cause pneumonia and meningitis.

## CHEM TRAILS

<http://www.carnicom.com/contrails.htm>

<http://sonoguy.tripod.com/contrail.html> Stories about suspicious chemical trails in the sky have been floating about for months now, years actually.

It is all right here folks -> it is now right in your face. What are you going to do about it? Our Creator gave you, everyone) the power to care, to act, to affect change -> it is a divine gift, please use it!

From Holly Deyo

There are few issues today that have sparked the controversy inspired by chemtrails. It's a near-global event. Three main theories are circulating to account for the spraying:

1. weather modification
2. mass depopulation
3. mass inoculation

Frankly, Stan and I didn't know where to stand on this issue several years ago as there was too little factual information though we leaned toward the inoculation theory. This was during the time when our armed forces were being inoculated for anthrax and a holy furor ensued. We had, and still do, have a hard time believing our government is out to exterminate the citizens.

At least part of the spraying seems to be for weather modification and/or neutralizing global warming effects according to recent interviews with Will Thomas. He further

purports that this weather mod is being conducted due to pressure from insurance companies who see financial ruin on their horizon with continued high disaster-related claims. The catch? These weather modification tactics are further depleting the ozone hole and enhancing global warming. It is a short-term, "band-aid" answer with even worse consequences.

It appears there are two types of spraying conducted which would help account for several perceived scenarios. For those to whom this information is relatively new, here are some basic generalizations.

1. Chemtrails, as opposed to contrails, take three or more hours to dissipate. Regular contrails disappear in about 20 minutes.

2. Chemtrails tend to look flat.

3. Another feature different from ordinary contrails is that mature chemtrails display a vertical curtain of fall-off.

4. Intense chemtrail spraying is done in tic-tac-toe, "X" and grids patterns.

5. Spraying is generally done by these planes: KC-10A, KC-135 (707) and C-130 for the high altitude spraying and C-130 turboprop aircraft for the low-level spraying. The KC-10A is a three-engine aircraft and would normally leave three parallel contrails in its wake. The KC-135 is a smaller, four-engine aircraft that would typically display four parallel contrail lines. When used during chemtrail missions; however, these aircraft lay down only a single, thick, billowy chemtrail while simultaneously displaying no normal contrails. There are other planes which have been used in the spraying, but these are the main ones.

6. Two types of spraying are done: high altitude meaning 20,000 feet and above and low altitude spraying each with seemingly different purposes.

7. Low level spraying contains molds and fungi and produces

varying symptoms including: \* headaches worse than migraines \* heartburn \* heart conditions \* heart arrest, on the \_rare\_ occasion \* flu-like symptoms \* extreme fatigue \* diarrhea \* pain and swelling of muscles and joints \* dizziness \* nausea \* stiff neck \* nagging sore throat \* general malaise

8. Symptoms last up to three months and beyond, not typical of flu.

9. Symptoms are not readily treatable by known antibiotics.

10. Chemtrail missions tend to be suspended when the ground wind speed reaches or exceeds 20 miles per hour.

11. Tends to kill the elderly, the very young, and those with poor immune systems.

12. After spraying, gelatinous material is seen from low-flying, multi-engine aircraft. Cobweb-like material from higher-altitude spraying has been analyzed in university government-licensed labs with some of the pathogens identified.

13. Countries reporting spraying include Australia, Canada, England, France, Germany, Holland, Ireland, Italy, Mexico, New Zealand, Scotland, Spain and the United States. NOTE: This spray list does not include China, Russia nor the Middle East. The US has reported spraying in virtually every state and virtually every major US city including surrounding suburbs.

## WHAT'S IN CHEMTRAILS?

Part of the substances in the chemtrails have been identified: a cocktail of JP8+100 jet fuel, laced with Ethylene Dibromide (EDB). This chemical pesticide was banned in 1983 by the EPA as a definite carcinogen and chemical toxin. Exposure to this type spraying can include these symptoms: \* respiratory tract problems \* severe infections to the throat and sinuses \* swelling of the lymph glands \* coughing fits \* shortness of breath \* sinus headaches \* general respiratory failure \* damage to the heart and liver \* exposure to EDB makes

people more susceptible to other biological agents due to severe lung irritation.

For lack of a better term, "brown goo" has been used to describe the material found on exterior walls of buildings and windshields of automobiles. It's almost impossible to remove with soap and water, and has proved to be highly toxic to anyone coming in contact with it. Don't touch it, handle it, or attempt to move it by yourself.

"Numerous red and white blood cells, and unidentified cell types have been found within the sub-micron fiber sample previously presented and submitted on Jan. 20, 2000 to Carol M. Browner, Administrator of the United States Environmental Protection Agency. The cells appear to be of a freeze-dried or desiccated nature in their original form within the microscopic fibers." <http://www.carnicom.com/bio1.htm>

"Thomas has also reported that spraying samples have been analyzed and have revealed that many deadly and toxic pathogens have been found including Mycoplasma Fermetens Incognitus (the SAME bioengineered pathogen that Dr. Garth Nicholson discovered in about 45% of the veterans who came down with Gulf War Illness). Thomas found that Mycoplasma, however, was only ONE pathogen among a group of highly toxic biohazard substances analyzed from the chemtrail residues." <http://www.educate-yourself.org/ctindex.html>

**CHEMTRAIL COCKTAILS - NO THANK YOU, WE'RE ABSTAINING**

There are at least four or five components found in these cocktails as released by Will Thomas.

1. A unique chemical marker used to identify the specific biological cocktail. This marker is derived from a coral reef found in an ocean on the other side of the world.

2. Samples contain a bacterium, Pseudomonas Fluorescens, which is responsible for serious blood infections. Mr. Thomas characterizes this organism as a bacterium that his research

has shown to be named in more than 160 Pentagon patents pertaining to both biological warfare applications and aerosol inoculation experiments. It is also cited in DOD literature as an experimental biowarfare bacteria. Additionally, *Pseudomonas Fluorescens* is known to attack the respiratory system and is associated with severe coughing fits, general weakness, and vertigo and is extremely resistant to most antibiotics.

3. Some samples contained *Pseudomonas Aeruginosa* which invade and attack the respiratory system. Once infected by this bacteria, the linings of the lungs produce a thick mucous which results in breathing difficulties, coughing fits, and shortness of breath, following only minor physical exertion. After the infections have taken hold, *Aeruginosa* generates a wide range of toxic proteins which cause extensive tissue damage and severely compromises the immune system. It is also associated with bronchitis, pneumonia, ear and eye infections, meningitis, muscle and joint pain, cystic fibrosis, and gastrointestinal distress. *Aeruginosa* is also very antibiotic-resistant.

4. A fungus called *Streptomyces* has also turned up in these cocktails. This fungus is normally found inside a research laboratory since its primary use is in the production of antibiotics like Tetracycline and Streptomycin. The non-lab form of this fungus can cause severe infections in human beings.

5. The last component discovered in these cocktails is a special bacillus which contained what is known as a DNA restriction enzyme. What this allows, in effect, is gene splicing. A scientist can take a specific length from a DNA chain and transfer it to another organism creating a mutation. This substance is found only in genetic engineering laboratories. One of its uses is to create exotic viruses with specific characteristics and pathologies.

## PROTECT YOURSELF

First and foremost, if you see chemtrails that meet the criteria

in points 1-4, go inside. Ditto for pets, if possible.

Second, don't touch the cobweb-like substances or the "brown goo".

Third, build up your immune system. Eliminate fatty foods, refined sugar, white flour, salt, coffee, alcohol, tobacco and recreational drugs. Drink plenty of pure water. Take supplements of vitamins A, C, E and zinc. Echinacea and Goldenseal have also proved helpful. Some folks suggest daily doses of colloidal silver as well as gargling with it. Don't burn your candle at both ends; get plenty of sleep.

## IF YOU ARE EXPOSED

This is not a cure-all, but it will help. 1) Take a hot shower with an antibacterial soap like Dial. Hot water helps kill bacteria, mold and yeast particles. Be sure to wash your hair since it's close to your mouth, nose and eyes (easy access to your respiratory tract).

2) If you get a severe sore throat or cough up green phlegm, go to the doctor immediately. Green phlegm means a bacterial infection either in the lungs or in the upper respiratory tract. Bacterial infections multiply rapidly and can only be killed by antibiotics and then, they are not always effective.

## ASSESSING THE SCENARIOS

So what is the purpose for the spraying?

### 1. weather modification

Based on their published agenda, we know that the US Air Force is currently engaged in extensive weather modification and control techniques. Experimentation is highly probable which could account for some of the sprayings.

"The Air Force also admits to "routine fuel dumping" of highly toxic JP8, and to using carbon black for weather modification. According to a recent NASA cloud study, carbon black is a "very effective" nuclei around which water vapor can

condense, forming artificially-induced cloud cover."  
<http://www.islandnet.com/~wilco/mysites.html>

## 2. mass depopulation

If the purpose were for mass depopulation, one would think that people-dense countries like India, China, Africa and Indonesia would be targeted. If spraying were for nefarious purposes, why not spray only at night when there would be less detection? We're hard-pressed to think our government would sanction such activities as their own families and friends, not to mention themselves, would be equally at risk. This seems the least likely scenario.

## 3. mass inoculation

It is possible that the governments are trying to vaccinate its citizenry against Anthrax, Tularemia, Brucellosis, or all three. Currently anthrax is probably the greatest national threat currently facing our country as well as other countries. It is easy to manufacture, transport and deliver, plus death follows fairly quickly. The economic devastation projected from an anthrax attack by a terrorist group has been calculated to be ~\$26 billion per 100,000 persons exposed. That's significant.

The technology exists for this type of DNA vaccine. Peoples' symptoms experienced after a chemtrail spraying are consistent with symptoms one would see produced by agents associated with the host bacteria used to deliver the vaccine. However, until a sample group of people is actually tested for immunity to anthrax, there is no proof that it protects conclusively against anthrax.

The mostly likely method of transmission is through aerosol dispersion. That technology exists. Here are examples:

1. At the University of Guelph, researchers are working on an aerosol vaccine for chickens to protect them against E. coli. "Live vaccines have many advantages: they can be given in small doses and administered on mass via an aerosol spray."  
<http://www.uoguelph.ca/Research/spark/nuggets/fall98.html>

2. Conclusions from the 75th meeting of the National Institute of Health, held December 4, 1997, report that significant progress has been made toward creating an aerosol vaccine for influenza. <http://www.nih.gov/about/director/120497.htm>

3. In the fall of 1997, a Rhodes College biology course offered a segment entitled "Viruses: Risks and Benefits to Society". The course covered the use of the newer aerosol vaccines as well as how easy it is to use on animals. They simply inhale the vaccine and are protected against respiratory infections.

4. Reportedly there is a page on Kansas State University's web site (it's a huge site and I could not find it) soliciting inquiries from interested parties who would like to discuss licensing technologies developed at KSU for commercialization of an aerosol delivery system. It has already been developed to administer small proteins and DNA enzymes deeply into the respiratory system for immunization purposes.

5. In 1998, Renee Land was given a grant to continue her research of an aerosol Rinderpest vaccine for use in free ranging domestic animals and wildlife. Rinderpest is a highly contagious and lethal virus which affects both groups of animals. Any outbreak of this virus has great potential for ecological and economic devastation. <http://grdodge.org/vet98.html>

6. From 1995: Dr. Fred W. Scott, of the Cornell Feline Health Center, has conducted three experiments to evaluate the safety and efficiency of a new intranasal FIP (Feline Infectious Peritonitis) vaccine, Primucell-FIP, currently being marketed by SmithKline Beecham Animal Health (SBAH, formerly Norden Laboratories). <http://www.vspn.net/VSPNSearch/VINLibrary/lv960028.htm>

7. Measles vaccine - "A new\* aerosol vaccine has been developed which may make measles inoculation possible as early as four to six months." <http://www.midcoast.com.au/~wedmunds/c13-imun.htm>

\*This article was revised in 1992. It is impossible to tell from the wording just how long this aerosol vaccine has been available, but somewhere between 1992 and 1995.

With recent mainstream media talk on television and in newspapers, as well as government press releases stating that they feel NBC attacks are not only probable, but imminent, it follows that a mass inoculation process take place. We have only to look back to the three recent mock NBC tests in the past two weeks in Rhode Island, Washington D.C. and Denver to know the government is very concerned. Additionally, there is the published list of 120 likely targeted cities in the U.S. for possible NBC attacks. Generally speaking, if you live in a larger metropolitan city, consider yours on the list. Last, Clinton had openly and repeatedly warned of a coming NBC terrorist attack. It is anticipated and expected. As we wrote back in our 1997 Building Community newsletters regarding the massive problems predicted for El Nino, when FEMA or any government agency warns of a problem, you can bet we either already have it or it's on our doorstep.

If it is indeed a case of mass inoculation, then you might ask why doesn't the government just come out with their spraying plans. Here are some possible explanations. 1. Liability. People have died as a result of these sprayings. 2. It formally tells potential terrorist attackers we're preparing for a specific disease and they might alter their plans to use a different pathogen. 3. Avoid mass panic. 4. Avoid lawsuits over huge civil rights infringements. Whoever agreed to be sprayed?

Here is a point to ponder before becoming enraged at unauthorized, involuntary sprayings. Put yourself in the government's seat. If you were faced with an imminent NBC attack, how would you best protect 275 million citizens of America, 19 million Australians, 31+ million Canadians, 100+ million Mexicans, nearly 4 million New Zealanders and 60 million residents in the United Kingdom? The task would be overwhelming and underscores the need for a method that can be done quickly and cost-effectively. Hence, massive

aerosol inoculation. We're not saying this was the proper way to go about it, but it was probably the best all-around solution in the government's eyes. We'd hate to be in their shoes making this decision.

## OUR CONCLUSIONS

If someone were to really press us and asked, "OK, what do YOU think is the reason for the chemtrail sprayings, we would list them in this order from most to least likely: mass vaccination; some weather modification and/or control; and last, depopulation goals. However, there are many varying viewpoints. One of the absolute best commentaries is written by Richard Malinowski and found here: <http://home.earthlink.net/~wolfmind/CT01.html> It is detailed and lengthy - at least 169K. The spraying issue is so pervasive and potentially harmful, it deserves your careful research and consideration. Some other good places to start are listed below.

-----  
Chemtrails Explained: Putting the Pieces Together By Peter Farley

Note: As with all my work, I "stand on the shoulders of giants", those who have spent their time methodically pulling together the findings for each one of the pieces I write utilizing information from other sources. Reference to the original articles is included or listed at the end of this article.

If you haven't realized it until now . . . this whole war that has been raging in this corner of the Universe for eons is over the issue of control--the power to control the lives and energy of those beings who reside, not only on this planet, but also on all the other planets in this vicinity, and even into the other dimensions. As always, the best allegory I can find for this situation is in the book *A Wrinkle in Time* by Madeline L'Engle.

Simply put, the whole thing is a battle between the Darkness and the Light (in it's true form from the Creator or Source, not the Light which is also that of Lucifer) for the ultimate control of the Universe. If this sounds like you are living in another episode of the Star Wars series, welcome to reality and the biggest thing going on in Creation right now. This bigger war which is raging in the macrocosm of the Universe, is also raging within each and every one of us, also called the microcosm.

And the chemtrails can be a fearful weapon in this war, as long as we remain in the victim state of consciousness.

Planet Earth and its inhabitants, as the prizes in this latest and final battleground of the Galactic war, are crown jewels to the

victor, not only because of the position this planet holds on the outlying edge of the galaxy, but as is explained further in my upcoming book, because it is a microcosm of the galaxy. Much like the United States is on planet Earth - Earth itself is a melting pot of so many different alien races, that it's conquest represents a conquest of all the home planets as well.

The key to this penultimate battle is the coming ascension of planet Earth back into the fifth dimension, and the choice its people to either stay here in this dimension, or to go with it. The chemtrails fulfill that part of the Hopi prophecy spoken of about the Day of Purification when cobwebs would be spun in the skies.

But what you do if you were already in control of this planet? What would you do if you had already spent inordinate amounts of time and energy making it into the most sophisticated prison camp in the Universe-so much so that most of the inhabitants didn't even know they were prisoners? What lengths would you go to in order to prevent them from pulling off the Great Escape by beaming themselves and the whole camp up and out of your self-governing enclosure?

Two things would become necessary for you to do. 1.close or control the doorways or portals in and out of your camp (the always crucial 'head 'em off at the pass' in Earth wars); and 2.keep the prisoners - preoccupied with their health and the day-to-day grind, genetically incapable of making the jump into hyper-space.

Voila! --the chemtrails.

The ultimate purpose of the chemtrails can be seen in the most ubiquitous of symbols seen everywhere in the trails left behind over so many cities-the X. As one researcher discovered while researching the source of the X rune (Gebo) in the original Teutonic texts, it literally means a gift, or offering--the symbolic meaning being "sacrifice of the lower for the higher." Certainly that is a familiar theme in the ways of the Illuminati here on planet Earth. All the true knowledge of

Creation is withheld from us, the lower, and our lives and very existence here on the planet are sacrificed in service to those who deem themselves the higher and therefore more worthy to retain this cosmic wisdom.

The first part of the New World Order's solution concerning the blockage of the portals into and out of the planet is dealt with in my upcoming book (available soon through my website). This blockage is being done from both inside the planet's atmosphere (at ground level), and also from outside the atmosphere through the many "secret missions" carried out over the past decades of "space exploration" by NASA and by the space shuttle, as well as many other earth-based space programs.

Part A of the second aspect of the solution has to do, obviously, with keeping the economy insecure. This involves taxing the people so heavily as to keep the power out of their hands and with little or no money left even to stay alive. If this means inflating the stock market and the economy, or plunging us all into a "recession" or a depression as they have done before, then so be it. The evidence of these things is all around us if we simply choose to open our eyes. The whole idea behind the old "company store" was to keep the workers alive and working, reaping a windfall for the company, while growing further and further into debt by buying necessities at inflated prices through the company store. The workers then became hopelessly reliant on the "social security" of their benefactors, using their own free will to sell themselves into a lifetime of self-imposed servitude.

Not only are food supplies and housing now the most expensive commodities available, but we even have to buy such things as water and even air to remain even somewhat healthy and alive. The medical system is a crushing blow to freedom as it is now not only responsible for as many deaths as for the lives it saves-but it has also been positioned to bleed the economy dry of all its resources through high-priced sugar pills and drugs which cause more problems than they cure in the hands of ill-trained practitioners. All this, while

never once dealing with what is really killing the people---fear and emotional stagnation.

Part B of this scenario is to keep the people unhealthy, all the while genetically altering them enough so that they cannot even conceive of making the proposed jump back into hyperspace along with the struggling planet. The process of doing this began a long long time ago with the infamous Annunaki race of aliens featured so prominently in Sumerian and Babylonian history and the work of Zecharia Sitchin. These beings were responsible for originally stripping us of our 12-strand DNA in order to make of us a slave race. By doing this, they also stripped us of our God-given connection to our Higher Selves, that part of ourselves which is truly interdimensional and in touch with its Creator.

By manipulating both the portals to the planet and the personal portals in our own DNA, the New World Order and its controllers hope to keep both us and the planet trapped here in the third dimension indefinitely for their own personal uses. This has already created a problem in that so many of those who have been passing on over this period of time have been reincarnating back onto the planet instead of going on to other places and other lessons, simply because they have been trapped here by the dense physicality created on this planet, and by their attachments to worldly things and their inability to reconnect with their Higher Selves.

As more and more children and adults become re-attuned to their original 12-strand DNA status with the increase in the planet's frequency, and as the date for planetary ascension draws ever nearer, the urgency to control this re-connection to our original selves has become an urgent and necessary part of the New World Order's agenda.

In a recent article by Patricia Resch circulated on the web, Dr Berrenda Fox provides her insights into these cellular and DNA changes. Dr Fox is the holistic practitioner of the Avalon Wellness Center in Mt Shasta, California. She has proven through her own work and blood testing that some people

have actually developed these new strands of DNA.

"We are making an evolutionary change, yet we don't know what we are changing into," says Fox. "Everyone has one double helix of DNA. What we are finding is that there are other helixes that are being formed. In the double helix there are two strands of DNA coiled into a spiral. It is my understanding that we will be developing twelve helixes. During this time, which seems to have started maybe 5 to 20 years ago, we have been mutating. This is the scientific explanation . . . "

What Fox is referring to is that the planet is already passing through the fourth dimension of vibration as of about 1982, headed for a quantum leap into the fifth level in about 2012-2013, the famed end of the Mayan Calendar. Hence we have the increase in UFO sightings (dimensional phenomena), and also in people's telepathic and intuitive abilities.

"The changes are not known publicly, because the scientific community feels it would frighten the population," says Fox. "However, people are changing at the cellular level. I am working with three children right now who have three DNA helixes."

Fox suggests that most people know and feel this already, and that many religions have talked about the change and know it will come about in different ways. "We know it is a positive mutation even though physically, mentally, and emotionally it can be misunderstood and frightening . . . You would almost think by knowing these children that they are half angelic or superhuman, but they're not. I think they are what we are growing into during the next few decades."

Our immune and endocrine systems are the most evident of these changes, say Fox, and that is the reason she says she works with research into immunological testing and therapy. It is also one of the chief reasons why the chemtrails and other NWO practices target our immune systems and endocrine systems so heavily.

"Some adults that I have tested actually do have another DNA helix forming. Some are even getting their third. These people are going through a lot of major shifts in their consciousness and physical bodies, because it is all one. In my opinion, the Earth and everyone here is raising its vibration. Many of the children born recently have bodies that are magnetically lighter. Those of us that are older and choose to change have to go through many physical changes."

Fox suggests that the easiest way to mutate our DNA is through a virus. DNA viruses like Epstein Barr and the Herpes #6 change cellular structure. This fact, as we shall see, has obviously not gone unnoticed by the New World Order.

"Most people who go through this process and come out the other side," says Fox, "have a new profession, a new way of thinking, or at least a starting of a new way of life. Even though they may feel really sick, tired, or hopeless at times, it can be a gift."

As I understand it," she adds, "we have until about 2012 to complete this process."

The DNA and other body changes are also spoken of in an article titled 'The Bigger Picture' by Susanna Thorpe-Clark:

"We are being changed physically from carbon-based beings with 2 strands of DNA into crystalline beings with 1,024 strands of DNA (eventually), because only crystalline substances can exist on higher dimensional levels.

"This new state of being requires therefore that we physically, mentally and emotionally let go of 3rd dimensional concepts. Just as in death, the letting go is a major part of the change process, for one cannot take the old values and way of being into a new completely different afterlife. So the progression through changes compels us to let go of current relationships, jobs, careers, homes, possessions, and so on, if they are unable to support our new way of being . . .

"Is it any wonder therefore, that there is a great deal of anxiety

and fear being felt because these changes are already in progress, even though most people are not conscious of it . .

. "These changes are not necessarily being experienced by everyone concurrently. A very small percentage of adults have already completed the entire change into crystalline form and now embody 1,024 strands of DNA . . . Some people are only just starting to move through these changes, and many others have yet to start. This process of change is known as the Awakening, or as the Ascension process, or known as achieving the Merkabah, or light body.

"We need to transcend our fears and learn about love, real love, which has to start with the self. Because, until we can love and trust ourselves, we cannot truly love or trust anything or anybody else."

How does all this relate to the chemtrails and to the New World Order? The original three major theories explaining the chemtrail phenomenon i.e., weather modification, mass inoculation, and population control, have all been pretty much discounted by researchers as pointed out in Stan and Holly Deyo's May 31st newsletter. None of these theories adequately explains the range of data gathered.

Furthermore, spraying is occurring worldwide, thus it has to be run by a multinational alliance of some kind, the likes of which can only put it into the class of that monolith known simply as the New World Order. The secrecy of the chemtrail phenomenon also puts it into the domain of black budget projects and shadow government operations in terms of the US, or even for any other government for that matter.

Right now, people are still recovering from chemtrail induced sicknesses. Since chemtrail related deaths have been extremely low, the possibility of chemtrails containing only one single agent is very low.

Double agent spraying is more likely. One somewhat benign agent is applied now, and its combination with an activator in the future would turn it lethal or at least trigger the desired

results. The activator can then be another biological or chemical substance which triggers this new reaction in tandem with the first agent.

To see how the chemtrails are manipulating both our health and our genetic makeup, we have to take a look at the contents of samples taken after chemtrail spraying. These ingredients have been obtained from the many analyses performed upon chemtrail residue samples and listed on the web:

1. *Pseudomonas aeruginosa* - A common hardy bacteria that can be found in dirt. This could suggest possible contamination of chemtrail ground samples but also perhaps not considering that it is commonly genetically engineered by companies as PathoGenesis for various purposes. The natural strains have been found to contaminate hospitals and drinking water. When inhaled into immunosuppressed lungs such as those of victims with cystic fibrosis, it forms slime clusters called biofilms which are virtual bunkers against immune system defenses and antibiotics. It can transfer horizontally, meaning between species, genetic information to the host via transduction and conjugation. Conjugation involves the bacteria injecting a genetic package called a plasmid via a 'handshake' into a host cell, which receives it and in effect makes it a part of its own DNA. Transduction is similar, but instead of the bacteria sending a plasmid into the host, it sends bacteriophages (viruses) that contain some of the original bacteria's DNA and implants it within the host's DNA. This allows for genetic manipulation to occur.

2. Aerosol Barium salts such as were used in Libya, Panama and Desert Storm where they were sprayed and exploded overhead to make the people extremely sick and weak. It's a radioactive material that accelerates and magnifies the effects of other mix ingredients by altering the chemical structure of the other agents. A spectrum analysis reveals only the barium compounds and hides the "bad stuff" by placing a shell around it. After time, it releases the other agent. Think of it as a time release death pill.

3. Ethylene dibromide (dibromomethane) - Banned in 1984 by the EPA, EDB ( $C_2H_4Br_2$ ) is a carcinogenic fuel additive and insecticide with a chloroform-like odor. It is claimed to be similar to silver iodide, which was once used for cloud seeding and weather modification purposes. When absorbed, EDB causes central nervous system depression and pulmonary edema, which is fluid accumulation in the lungs. Symptoms of pulmonary edema include shortness of breath, anxiety, wheezing, and coughing. It is extremely irritant to mucous membranes and to the respiratory tract. These are all symptoms associated with the "chemtrail cough," and with the growing lethargy noticed in populated areas both here and around the world where spraying is taking place. If anything, EDB serves partly as a condensation nuclei around which water vapor in the atmosphere can condense, making thick chemtrails visible for satellite tracking.

4. *Pseudomonas fluorescens* - another strain of the *Pseudomonas* variety found most often in soil and on plants. On plants, it produces antibiotics which shield the plant from fungal and bacterial infections. Most likely a contaminant in the analysis.

5. Enterobacteriaceae - Includes *E. coli* and salmonella which are culprits in cases of food poisoning. Most interesting of the Enterobacteriaceae family is the *Klebsiella* genus, whose species is responsible for pneumonia infections (enough said).

6. *Serratia marcescens* - a dangerous pathogen that can cause pneumonia. One link from the Canadian Intelligence Security Service formation on the San Francisco 1950 biological testing reports that "One of the biggest experiments by the government involved the use of *Serratia marcescens* being sprayed over San Francisco. This organism is especially nice because it produces a red/pink pigment when grown on certain media, which makes identification very easy. At one point, 5000 particles/minute were sprayed from the coastal areas inward. During this time, 1 man died (in hospital) and 10 others became infected in what was described as "a mystery to doctors." Although the military claimed it never did many

follow up studies on these tests, one result was that it showed nearly every single person became infected with the test organism. In hindsight, now that some of this information has become declassified, it's been shown that during periods following spraying tests, there were 5-10 times the normal infections reported."

Although attributed to the military and government sources, similar experiments were revealed to have also been performed by the Australian government on its people using various bacteriological agents, a country known for its extremely high rate of asthma and chronic lung problems. This advance testing was obviously an early phase for the NWO's "final solution.

7. Streptomyces - "Streptomycetes are used to produce the majority of antibiotics applied in human and veterinary medicine and agriculture, as well as anti-parasitic agents, herbicides, pharmacologically active metabolites (e.g. immuno-suppressants)"

8. A restriction enzyme used in research labs to snip and combine DNA -- such an enzyme cleaves open DNA and allows desired segments to be inserted before recombining.

9. Other bacteria and toxic molds capable of producing heart disease, encephalitis, and meningitis--of which there are renewed outbreaks, especially in heavily sprayed cities such as Houston--as well as acute upper respiratory and gastrointestinal distress.

It is known that within three days of a particular heavy spraying, outbreaks of respiratory illnesses occur in the exposed population. Some develop pneumonia, others colds, flu-like symptoms, and depressed immune functions. Instances of meningitis and encephalitis have also increased in correlation with sprayings.

Note that no viruses are listed above. This is because viruses are difficult to detect in the laboratory, much less identify. However, most of the resulting illnesses do not respond to

antibiotics, suggesting their causes are indeed viral. Such viruses are most likely retroviruses such as the adenovirus for use in the genetic manipulation.

Chemtrails now appear worldwide, though it has been claimed that none have been sighted in China. The Chinese influence on the Clinton presidency has been well established, not to mention the increasing dependence so many countries now have on China for both their manufactured goods and as a source of cheap labor. U.S. military and scientific technology has been freely given to China under much protest in spite of its aggressive stance towards this country. The New World Order seems to have made China into a new power base for capitalism since the death of its infamous Communist leader, Mao Tse Tung.

Although chemtrails in foreign countries may be due to planes originating from the US, or from US military bases in those countries, the heaviness of spraying there suggests that foreign governments and commercial agencies are also heavily involved.

An answering machine tape recently given to chemtrails researcher Will Thomas's Lifeboat News Service includes a message allegedly from the Victoria, British Columbia, Airport Authority's Manager for Airport Planning and Environment to city resident Mark Porter, who had inquired about unusual contrail formations being seen in the sky over the city. It seems to confirm that controversial "chemtrails" are being spread over that city as a joint U.S.-Canadian military operation.

( <http://www.unknowncountry.com/news/?id=392> )

Another researcher in a bedroom community of Portland, OR, a city which is sprayed often, relates that chemical tankers have been photographed on the ground at the Oregon National Guard base adjacent to the Portland International Airport just a few miles from his home.

Considering the frequency and density of coverage of the

chemtrails, the urgency of the NWO's agenda to head off the ascension process is self-evident. The project has risked discovery by employing commercial airlines to help with the spraying, and such a risk can only be justified if the project itself were in the nature of an emergency. They have also risked their secrecy by spraying during the day (especially on weekends) to affect as many people as possible, when all below can plainly see these contrails are anything but. The altering of one's DNA via incorporation of foreign DNA from bacteria and viruses is the key to the genetic manipulation of our beings in order to stop the ascension process from going on within our bodies. This process is suggested in a *Leading Edge* article, quoted as follows (the italicized emphasis is mine):

"One of the indications that vaccinations may in fact be changing the genetic structure of humans became evident in September of 1971, when scientists at the University of Geneva made the discovery that biological substances entering directly into the bloodstream could become part of human genetic structure.

"In an experiment in Geneva, scientists extracted the auricles of frog hearts and dipped them for several hours in a suspension of bacteria. Afterward, they found a high percentage of RNA-DNA hybridization between bacterial DNA extracted from bacteria of the same species as that used in the experiment and titrated DNA extracted from the auricles which had been dipped in the bacterial suspension. Bacterial DNA had been absorbed by the animal cells. This phenomenon has been dubbed transcession. There is evidence that this kind of phenomenon is happening all the time within the human body. It is conceivable, for example, that heart damage following rheumatic fever could be the result of the immune system reacting to its own cells producing a foreign RNA complex after absorption of foreign DNA." (see link)

For those interested in the transcession capability of vaccines, consider this quote about gene therapy: "Yet another

technique is to simply inject naked DNA. This approach wouldn't work well as direct injection into the bloodstream because the body's DNA degrading enzymes would quickly digest it. But some experiments have shown that when naked DNA is injected directly into muscle tissue [as in a vaccine injection], say, the cells start producing whatever proteins the DNA codes for."

In other words, transfection is the process whereby bacterial DNA becomes part of a host cell's DNA. The term transfection is more commonly known as transduction, or conjugation, more generally termed horizontal gene transfer. Horizontal means between species, as opposed to vertical which is from parent to offspring.

This is one way gene therapy seeks to correct genetic diseases, but it can also obviously be used to create genetic mutations of a different kind.

Here's another excerpt from an article confirming the use of viruses in gene therapy: "To turn viruses into gene ferries, scientists have developed ways of stripping the genes out of a virus and substituting copies of the genes they want to transfer into cells. The virus is then mixed with cells taken out of the body that are then returned. Or they can be injected directly into the body itself, homing in on the cells of interest. Retroviruses, which insert their genetic code directly into the chromosomes of the host cell, have been used a lot because of their ability to break into chromosomes and insert the DNA. Other viruses are now also being used. One of the big drawbacks of viruses is that the immune system can't tell the difference between bad viruses and those that carry a beneficial gene. So, many of the viruses are rapidly wiped out [that is, of course, unless the immune system is weakened by other chemical/biological agents such that these viruses survive long enough to transduce their DNA into the host]."

The article which first got me interested in this whole field was one I found in a newspaper about viruses being found in the tails of comets passing through space. The theory was that

this might be how "life" and diseases could be spread from one planet to another, like in some weird science fiction movie such as Day of the Triffids or Invasion of the Body Snatchers. To exist in such an environment as space, however, viruses would not be considered a life form as such. Viruses tend to travel through the nervous system, and are more like a parasite, living off its biological host—a true alien invasion indeed, energy vampires, much like those creatures portrayed in the recent hit movie, The Matrix, for the nervous system is in fact the electromagnetic system of the body.

Non-invasive methods of gene therapy are already well established. A team at the Thomas Jefferson University in Philadelphia accomplished just that using an oral method of gene therapy. Even madsci.org has something to say about these non-invasive methods: "Gene therapy is one of the most interesting and valuable techniques to come out of the field of genetic engineering. The adenovirus used to deliver the CF gene to human cells for gene therapy is known as a vector. Since most cells normally will not take in or absorb DNA, we need a delivery system to get the gene into the cell. Adenovirus is a good vector since it can infect cells in vivo, or while they're in the body, which means that the gene can be delivered through an inhaler (instead of having to manipulate the cells in vitro, or in the laboratory, then return the cells to the body). To use the adenovirus as a vector, its genome was first altered by removing all the virus DNA except for the minimum necessary for the virus to live and infect the cells. Genetically engineered viral vectors like this are harmless and usually can't live outside of the laboratory.

"But some virus vectors are not without drawbacks: All viral approaches suffer from the drawback of introducing unwanted viral genetic information into the recipient host. Retroviral vectors and adenoviruses have additional disadvantages. Retroviruses are only suitable for delivery of DNA to replicating cells, and present a risk of reversion to replication competent infective particles, whilst DNA expression using adenovirus delivery systems tends to be short lived [thus the

need for the repeated chemtrail sprayings over the past two years in the same geographic areas and the use of a host of vectors to ensure success if one fails]."

"A novel vector with potential for use in gene therapy has been developed by Professor Beverly Griffin and colleagues in the Department of Infectious Diseases at the Hammersmith Hospital Campus of Imperial College. Her team has shown that pseudocapsids of the mouse polyoma virus, consisting solely of the VP1 protein, can be used to transfer DNA into mammalian cells in vivo, to give expression at clinically-relevant levels over a period of weeks." This work and its subsequent implications suggests a reason for the dramatically increased investment by governments and industry alike over the past few decades into research at educational institutions of higher learning --now part of the expanded military-industrial-education complex. It also should make us all stop and remember the Hanta virus carried by the deer mice of the Four Corners region of the United States and its subsequent deadly effects over the past decade.

"Polyoma virus has a very broad host range which means that the pseudocapsids will be taken up by essentially any human or other mammalian cell. Development and selection of mutant VP1 proteins, together with engineered specific labels may enable cell-specific targeting for in vivo applications. Pseudocapsids completely free of viral genetic material can be produced easily and economically."

In other words, the technology already exists for allowing virus vectors to effectively alter the DNA of a host's cell. This is not science fiction. One company among many, AEA Technology, is presently researching and selling aerosol products for use in gene therapy.

From the evidence available then, adenovirus vectors are the most likely culprits in chemtrail-related sicknesses, and in summary, both bacteria and viruses are capable of incorporating some of their own genetic information into the cells of a host. Bacteria do it via transduction and conjugation,

and viruses via direct infection of a cell.

Conceivably then, one could become infected with either such a bacteria or virus and would feel sick as a consequence. Meanwhile, the bacteria or virus goes to work altering one's cellular DNA slowly, before later being wiped out by the body's immune system. After the illness is eliminated, the altered cells remain and continue to reproduce. Sometimes it becomes malignantly cancerous if the gene transfer is crude and faulty (as in vaccinations), and other times the changes are so subtle the body continues to operate as previously, or so the victim thinks (as in chemtrail exposure).

The easiest way to mutate our DNA is through a virus [in this case, the easiest way to un-mutate DNA or suppress it from mutating is also a virus. The chemtrails then are ultimately attacking our cellular DNA-it's only possible explanation to head of the pending ascension process to keep us as a slave race to do the bidding of our masters. (Once again, the full story of this will be available by the end of April in my new book available at <http://starstream.com/treeoflife>).

Mutation and its implications are therefore most relevant in explaining chemtrails. The X-Men movie is a good analogy for what is happening here on planet Earth at this very time.

It has also been confirmed that DNA's crystalline helical structure makes it very sensitive to low strength but specific magnetic frequencies and wave shapes. Depending on the field strength and Fourier components, the effects can vary from rejuvenation to cancer, with one possible effect being the unlocking or suppression of junk DNA. Since some of the "new" strands of DNA are actually electromagnetic or multi-dimensional in nature, DNA is also sensitive to not just earthly electromagnetic fields, but it also responds to the body's soul-nature. Soul nature is the vibrational etheric/astral composition or signature of a particular soul. Genetic structure and soul-nature are intimately coupled; a change in one can lead to a delayed change in the other.

Manipulation or control of our earthly behavior can simply be garnered by the use of low-watt microwave transmissions, the effects to the cerebellum of the human brain when it is within three feet of such a device are devastating to the organ. FM, AM, and the microwave GWEN towers can all be used to manipulate or to control the unruly masses in this way.

The author of some of this included material (the full text of which can be found at: <http://www.angelfire.com/mt/montalk/chemtrails.html>) gives as his conclusion the following: "Humanity is evolving, emerging from the past millennia of abysmal darkness and oppression. The power structure, knowing its reign is about to end, has worked tirelessly in a last ditch effort to keep us suppressed. Chemtrails are but one small weapon they are employing to accomplish this." A very true statement. His suggestion that "their ultimate goal is a New World Order, global totalitarianism and a reinstatement of their absolute power" and that "the NWO will fail if citizens become genetically empowered to wake up and fight with superhuman powers against tyranny" and that "this is already occurring, and the chemtrails are ultimately ineffectual at preventing the inevitable" is highly debatable, however. It is even incorrect in terms of what is truly going on. It is fairly obvious to anyone who tries to talk to the "man in the street" that firstly, they haven't noticed this problem; secondly, that if they have noticed it they simply don't seem to care about it; and thirdly, that if they have seen them and do seem to care, then they certainly do not feel they have any power to do anything about them, and so must just suffer.

As I've said in previous articles, despite what you read anywhere else, the general consciousness of planet Earth has decided NOT to go on with the ascension process -whether this be through coercion or through their own free will, does not really matter. There is now only the choice left to the individual whether he or she wants to take that next step for themselves, into a higher dimensional state.

Two 'anonymous' emails sent to [www.SurfingtheApocalypse.com](http://www.SurfingtheApocalypse.com) seemed to come from

someone in the know on the subject of chemtrails. These e-mails talk about the "culling" of the population. This is a word I, too, have been given in guidance as another aspect of the chemtrails. It is also a word used in these e-mails as being attributed to a four-star Admiral in the Office of Naval Intelligence.

One of these e-mails has been titled 'The Great Dying -- The Real Reason Behind Chemtrails.' It speaks of the overall scope and agenda behind Chemtrails (Operation Clover Leaf, Operation Red Sky, Operation Rain Dance being the code names for these operations), and harkens back to what it calls the beginnings "way back in the late 1950s" with fluoridation, aspartame, and illegal street narcotics." It also speaks of the fact that the agenda is "at the 80% completion point in these CT operations" (when the e-mails were written) with the final completion date to be "by March of 2001."

The e-mails list as the main and ancillary operational objectives of Chemtrails of Operation Red Sky to be: "Phase One main objective: Creative cleavages in spatial perceptions. Creating blockage in the brain of the interaction of various amino acids that relate to higher consciousness and the increase of dopamine in the brain producing a listless, euphoric state of lower, reactive mind. (Thereby trapping us in the third dimension-the choice of the lower plane energy as talked about in my previous article on Choice.)

To understand this objective necessitates an understanding of the human Soul, the spiritual Self and the connection between the two as related to the endocrine system functioning within each human host, and remembering what Dr. Fox said about our immune and endocrine systems showing the most evidence of these changes-these seeming to be the most important targets of the chemtrail's ingredients.

The endocrine system is the group of specialized organs and body tissues that produce, store, and secrete chemical substances known as hormones. As the body's chemical messengers, hormones transfer information and instructions

from one set of cells to another. Because of the hormones they produce, endocrine organs have a great deal of influence over the body. Among their many jobs are regulating the body's growth and development, controlling the function of various tissues, supporting pregnancy and other reproductive functions, and regulating metabolism. Endocrine organs are sometimes called ductless glands because they have no ducts connecting them to specific body parts. The hormones they secrete are released directly into the bloodstream.

The primary glands comprising the endocrine system are the hypothalamus, pituitary, thyroid, parathyroid, adrenal, pineal body, and reproductive glands-the ovary and testis. The pancreas, an organ often associated with the digestive system, is also considered part of the endocrine system.

The hypothalamus, found deep within the brain, directly controls the pituitary gland (also known to be the source of psychic vision or what spiritualists call "the third eye," that which sees inter-dimensionally). It is sometimes described as the coordinator of the endocrine system. When information reaching the brain indicates that changes are needed somewhere in the body, nerve cells in the hypothalamus secrete body chemicals that either stimulate or suppress hormone secretions from the pituitary gland. Acting as liaison between the brain and the pituitary gland, the hypothalamus is the primary link between the endocrine and nervous systems (remembering that viruses commonly travel through the nervous system). If changes are to take place in the body, then this system is also the guardian over those changes as well as being the director of them. To genetically manipulate mankind through the ingredients in the chemtrails, one must first suppress the endocrine system, and second, the natural defenses of the immune system-the two most directly targeted areas of chemtrail spraying.

The e-mails go on to say that the goals of the chemtrails are to make "the overall "frequency" of each of their charges (human beings in each country) to function at a specific rate below the threshold of awareness. The study of brain-wave, Remote

Viewing techniques, and other related research holds the key to this. As we know, a physical brain functioning at 12 to 14 cycles per second is agitated and cannot, therefore, become perceptive of any cycle not within the same frequency, especially if that BRAIN IS ARTIFICIALLY stabilized to that frequency. How can one perceive love, when the brain can only register impatience, anger, etc?"

FEAR is a key factor here, and it is through fear that we open ourselves up to control. Fear is the frequency which registers most with our fourth and fifth dimensional manipulators, and allows our auras, our protective shields, to be breached, leaving us open to their Light-sucking, energy-sucking control.

The e-mails also say that "the immune system of the host must be depleted. This relates to control, simply put. If the slightest breeze makes you dizzy, what kind of defense can you be expected to put up if you can't lift your arms above your head without getting a headache? . . . This is the main reason for much of the desiccated red blood cells found in chemtrails: biowarfare. This also allows the parasite to latch onto the human host with little resistance from the organism so attached."

The third and last objective the e-mails point out are that the NWO needs our agreement. David Icke stresses this point in his work as well. The e-mails continue:

"This last statement is by far the MOST CRUCIAL STAGE of all. It isn't enough to make us slaves, we MUST WANT TO BECOME SLAVES. Food scarcity, low wages, false idealism as propagated via network commercials, all create a state of low-level dependency to a state system, but it is not enough. To win . . . (they) need our permission to do what they will to us (Universal Law). The system of this biosphere has one final gate that only each of us can open or close and it is, in fact, free will . . ."

How and when will they do this? According to the e-mails "a fake alien invasion" or a biowarfare incident on a major U.S.,

European or Australian city could be used to trigger us to give up our free will in return for the safety and protection of a seemingly benevolent but in the end dictatorial force. With regard to this, be careful of 'announced disclosures' from seemingly reputable alien-seeking organizations. The control goes deeper than you suspect, and these organizations are needed to feed this supposed threat. As any good researcher or experimenter can tell you, they are already here-in more ways than you know.

Preserve your free will. Make a choice for ascension rather than remaining. Utilize love in all your actions rather than dwelling in fear. Be an observer rather than a victim. And trust that there are THOSE who care about what is going on here, and will take care of things as long as you do your part.

Have faith. I wish you strength.

Peter Farley is an Australian-born journalist, writer, lecturer, teacher, metaphysical researcher, and spiritual healer. He is author of the upcoming book, Where Were You Before the

Tree of Life? --the history of alien interaction with the Earth, past, present, and into the near future; especially its formative role in the global conspiracy known as the New World Order. The four volume galley set of this book can be pre-ordered for \$100 US through the website address (additional postage for overseas addresses).

He has worked for different newspapers over the years, including the Roswell Daily Record in Roswell, NM. He currently writes for a variety of publications on the topic of aliens, earth changes and the future of the planet, including the David Icke E-magazine. In 1998, working with noted abductee-counselor and author Budd Hopkins, he was the original organizer of the Abductee Forum at the Roswell UFO Festival. He still works with other abductees. He has appeared on national talk radio. He was a featured speaker at the Roswell UFO Festival 2000 and the first-ever Santa Fe UFO Fiesta. He currently makes his home in Roswell, NM. He can be contacted by mail at: P.O. Box 8231, Roswell, NM 88202 or by e-mail at [PETER6264@hotmail.com](mailto:PETER6264@hotmail.com) His website address is <http://starstream.com/treeoflif>

-----  
It has long been a practice in your mental hospitals to give everyone heavy sedations as a way of controlling them. You are doing this with your young people by giving the Ritalin instead of answering and addressing their legitimate concerns, you are in fact sitting on them. And this is part of what is being done with the chemtrails.

There are too many people asking too many questions to divert them; give them enough of something to make them ill enough so that their attention is diverted and they no longer ask questions. It is a fact that ingestion of chemicals creates an impingement upon the souls ability to maintain control over its physical vehicle. And this is the reason for the heavy snows and the floods and the changes in wind currents that are sudden and dramatic and that help clear the atmosphere and set free the people so that they can continue to question and

think.

---

And death came from the sky

Now that I have informed you, the rest is up to you. This is a part of World War III, silent weapons for secret wars, being fostered upon we the people. Death and destruction will continue to increase the spraying is not going to stop. I test people every day and they are loaded with "stuff" that is being sprayed. It is a dirty shame that our tax dollars are financing our death and destruction

Judith Nipps, N D.

In direct violation of U.S. Code 10, the (United States) Government is conducting Bio-Chemical warfare on it's own citizens. Since app. Sept. of 1997, a constant stream of CIA, NSA, Army, Air Force, Navy, Delta, United and possibly other aircraft have been "spraying" the American public with a deadly chemical mix consisting of, among other things, EBD (a pesticide banned by the EPA in 1983), JP-8 and several other chemicals, all detailed in the attached documents. Also included are pictures of various aircraft spraying this deadly chemical mix, including a Navy (aircraft), a copy of the patent granted several Scientist's for this process and copies of letters from Jet mechanics who have observed the systems installed on various aircraft being used to conduct this spraying effort. The cowards and traitors at the EPA, and of course in Congress, do nothing to stop this. We, the people shall now have to to just that. Perhaps you do not mind being sprayed with deadly and divisive chemicals that are destroying the health of both you and your family, killing livestock, foliage and so on, but I for one, do. The reason for this is actually quite simple - according to UN dictates (and therefore dictates of the Illuminati families, the Bildeberger's, the CFR the Tri-Lateral Commission) drastic population reduction must be conducted, immediately. Well, fellow Americans, I believe it is they who the population reduction MUST be conducted upon.

Accordingly, it is time to take up arms and destroy the Satanist's who now run every Government in the world. Unless you enjoy having Bio-Chemical warfare conducted against you.....

## Chemtrails: Suppressing Human Evolution

The author has monitored the chemtrail situation for the past year and a half, but refrained from writing an article about it until adequate data had been gathered to formulate a viable theory that was both original and more explanatory than any other out there. This theory was wrought both by contradiction and by positive proof. In other words, it exists because other explanations do not hold water. The impossible is eliminated, and what is left over, no matter how improbable, must be close to the truth. In this article, sample references will be given as positive proof, and the contradictory evidence shall be summarized below. Note that the sample references are merely samples, and not which this article's validity hinges upon. Three Faulty Theories Seeking to Explain Chemtrails

Chemtrails are unusually persistent airplane contrails with impacts upon weather and the health of those exposed to chemtrail fallout. They have been sighted in many countries and during all hours of the day and night, though chemtrail spraying usually begins early in the morning and slows in the evening. Air crafts involved in this phenomenon are commercial and military planes, the latter identifiable by traveling in areas and directions otherwise restricted for commercial flights. As pointed out in Stan and Holly Deyo's May 31'st Newsletter, there are three major theories concerning an explanation of the chemtrail phenomenon:

- 1) weather modification
- 2) mass inoculation
- 3) population control

These theories do not adequately explain the range of data gathered. Weather Modification

The weather modification theory arises from two clues, first that increasing cloudiness and precipitation sometimes occurs after a day of spraying, and second that EDB (ethylene dibromide or dibromomethane) has been found in chemtrail fallout. Ethylene dibromide has similar effects on cloud formation as silver iodide, a chemical normally used in cloud seeding. But this theory does not explain the presence of genetically engineered viruses and bacteria in chemtrail residue, or the resulting epidemic of flu-like symptoms. If anything, EDB serves partly as a condensation nuclei around which water vapor in the atmosphere can condense, making thick chemtrails visible for satellite tracking. Mass Inoculation The mass inoculation theory is more viable, as aerosol dispersion of vaccines is certainly possible as mentioned in a previous post. The government has put effort into vaccinating its military forces against anthrax. Supposedly, chemtrails are an attempt to vaccinate the entire population against anthrax.

But why would anthrax be the only agent, if not the major one, used in such an attack? There are others just as effective and easily dispersible. And with all the exposure of our bioterrorism efforts to protect against anthrax, what terrorist group would be dumb enough to choose something military forces, and possibly with chemtrails the entire population, are already vaccinated against? The government is suspiciously certain that anthrax will be the method of choice, implying factions within, and not domestic or foreign terrorists, will be the initiators of such an attack. Furthermore, spraying is occurring worldwide. Foreign governments are putting money and risk into spraying their respective populations. Since America would be the target of any such attack, spraying the rest of the world is a waste of money and time. Fact is, biological attacks are too localized an event to account for global spraying. The secrecy of the chemtrail phenomenon puts it into the domain of black budget projects and shadow government operations. It is unwise to claim that the shadow government (the same one responsible for the Gulf War Syndrome cover-up, dangerous biological testing upon unsuspecting American citizens, avocation of fluoride in public

water supplies, forceful suppression of alternative medicinal and technological inventions, electronic harassment of dissenters, and murder of whistle blowers) is spraying Joe Schmoe in Oklahoma just so that he can live and contribute to the overpopulation problem.

## Overpopulation

Which brings us to the point of overpopulation. If the world's population is indeed to be reduced as drastically as demanded by the World Health Organization and the World Wildlife Fund among many, people need to die, not just stop reproducing. Supposedly, chemtrails are an effort to accomplish this.

Single agent spraying, whereby what's being applied now to the population will eventually kill them, is unlikely. Right now, people are recovering from chemtrail induced sickness. If single agent spraying was indeed the method, more people would be dead by now. And even with an agent possessing delayed lethality, the variability in immune responses among affected persons would result in some dying prematurely. Since chemtrail related deaths have been extremely low, the possibility of chemtrails containing delayed single agents is equally low. Double agent spraying is another possibility. One benign agent is applied now, and its combination with an activator in the future would turn it lethal. The activator can be anything from another biological or chemical substances to electromagnetic fields such as those potentially generated by HAARP. The electromagnetic method is pure speculation and thus considered unlikely.

Applying the activator agent would result only in the deaths of those affected by the benign agent. This is a lot of work, hassle, and risk compared to just applying a single agent at that time and skipping ever having to deal with a benign agent. Why do double agent spraying and take the risk with visible chemtrails and whistle blowers now, when you can keep everything clandestine until that final day when you apply a lethal single application?

Double agent spraying is obviously not the method employed. Since single agent spraying has been discounted above, the "population control" theory does not hold. With these major chemtrail theories discounted, a new theory is required to fit the data. There are three pieces, chemtrails, gene therapy, and mass human mutation, that when put together, give rise to the following theory. So, let's take a look at the pieces of the puzzle in detail. Piece 1: The Chemtrails From the many analyses performed upon chemtrail residue samples and listed on the web, the following substances have been gathered and listed here (as mentioned in such sources as:

<http://www.egroups.com/message/fr2/126>

<http://www.carnicom.com/bio1.htm>, and

<http://members.tripod.com/conspiracy2/contrailsanalyzed.htm>

1) ethylene dibromide (dibromomethane) - Banned in 1984 by the EPA, EDB ( $C_2H_4Br_2$ ) is a carcinogenic fuel additive and insecticide with a chloroform-like odor. It is claimed similar to silver iodide, which was once used for cloud seeding and weather modification purposes. When absorbed, EDB causes central nervous system depression and pulmonary edema, which is fluid accumulation in the lungs. Symptoms of pulmonary edema include shortness of breath, anxiety, wheezing, and coughing. It is extremely irritant to mucous membranes and the respiratory tract.

2) *Pseudomonas aeruginosa* - A common hardy bacteria that can be found in dirt (suggesting possible contamination of chemtrail ground samples) but commonly genetically engineered by companies as PathoGenesis for various purposes. The natural strains have been found to contaminate hospitals and drinking water. When inhaled into immunosuppressed lungs such as those of victims with cystic fibrosis, forms slime clusters called biofilms which are virtual bunkers against immune system defenses and antibiotics. It can transfer horizontally, meaning between species, genetic information to the host via transduction and conjugation.

Conjugation involves the bacteria injecting a genetic package called a plasmid via a 'handshake' into a host cell, which receives it and in effect makes it a part of its own DNA. Transduction is similar, but instead of the bacteria sending a plasmid into the host, it sends bacteriophages (viruses) that contain some of the original bacteria's DNA and implants it within the host's DNA.

3) *Pseudomonas fluorescens* - another strain of the *Pseudomonas* variety found most often in soil and on plants. On plants, it produces antibiotics which shield the plant from fungal and bacterial infections. Most likely a contaminant in the analysis.

4) Enterobacteriaceae - Includes *E. coli* and salmonella which are culprits in cases of food poisoning. Most interesting of the Enterobacteriaceae family is the *Klebsiella* genus, whose species is responsible for pneumonia infections.

5) *Serratia marcescens* - a dangerous pathogen that can cause pneumonia. This link reports that "One of the biggest experiments involved the use of *Serratia marcescens* being sprayed over San Francisco. This organism is especially nice because it produces a red/pink pigment when grown on certain media, which makes identification very easy.

At one point, 5000 particles/minute were sprayed from the coastal areas inward. During this time, 1 man died (in the hospital) and 10 others became infected in what was described as "a mystery to doctors." Although the military never did many follow up studies on these tests, one result was that it showed nearly every single person became infected with the test organism. In hindsight, now that some of this information has become declassified, it's been shown that during periods following spraying tests, there were 5-10 times the normal infections reported."

Visit this link from the Canadian Intelligence Security Service to view more information on the San Francisco 1950 biological testing. In summary, the military released *Serratia marcescens*

upon the San Francisco population to test the effectiveness of a terrorist bio-attack. Following this was an outbreak of pneumonia which killed one man. 9) Streptomyces - "Streptomyces are used to produce the majority of antibiotics applied in human and veterinary medicine and agriculture, as well as anti-parasitic agents, herbicides, pharmacologically active metabolites (e.g. immunosuppressants)" 10) A restriction enzyme used in research labs to snip and combine DNA -- such an enzyme cleaves open DNA and allows desired segments to be inserted before recombining. 11) Other bacteria and toxic molds capable of producing heart disease, encephalitis, meningitis, as well as acute upper respiratory and gastrointestinal distress. It is known that within three days of a particular heavy spraying, outbreaks of respiratory illnesses occur in the exposed population. Some develop pneumonia, others colds, flu-like symptoms, and depressed immune functions. Instances of meningitis and encephalitis have also increased in correlation with sprayings. Note that no viruses are listed above. This is because viruses are difficult to detect in the laboratory, much less identify. However, most of the resulting illnesses do not respond to antibiotics, suggesting their causes are indeed viral. From points made later in this article, such viruses are most likely retroviruses such as the adenovirus for use in sinister gene 'therapy.' It has been discussed what is in chemtrails, but how particularly are they generated and for what reasons? Account of an Airline Mechanic An airline mechanic describes his accidental discovery of a commercial plane's chemtrail pumping system:

...When I got into the bay I realized that something was not right. There were more tanks, pumps, and pipes than should have been there. At first I assumed that the system had been changed. It had been 10 years since I had worked on one. As I tried to find the problem I quickly realized the extra piping and tanks were not connected to the waste disposal system.

...The next day I was on the company computer to look up a wiring schematic. While I was there I decided to look up the

extra equipment I had found. To my amazement the manuals did not show any of the extra equipment I had seen with my own eyes the day before.

...The system had 1 large and 2 smaller tanks. It was hard to tell in the cramped compartment but it looked like the large tank could hold 50 gallons.

Later is a response from an airline manager concerning Project Cloverleaf: "...Airline companies in America have been participating in something called Project Cloverleaf for a few years now. The earliest date anyone remembers being briefed on it is 1998. I was briefed on it in 1999.

...They told us that the government was going to pay our airline, along with others, to release special chemicals from commercial aircraft. When asked what the chemicals were and why we were going to spray them, they told us that information was given on a need-to-know basis and we weren't cleared for it. They then went on to state that the chemicals were harmless, but the program was of such importance that it needed to be done at all costs. When we asked them why didn't they just rig military aircraft to spray these chemicals, they stated that there weren't enough military aircraft available to release chemicals on such a large basis as needs to be done. That's why Project Cloverleaf was initiated, to allow commercial airlines to assist in releasing these chemicals into the atmosphere. Someone asked one of the G-men then if the chemicals are harmless, why not tell the public what the chemicals are and why we are spraying them? He seemed perturbed at this question and told us in a tone of authority that the public doesn't need to know what's going on, but that this program is in their best interests." The veracity of these comments are uncertain, but with other circumstantial evidence at hand, they appear to be truthful. They suggest that for at least the past two years, commercial airlines have participated in dispersing unknown substances during regular flight, unbeknownst to all but the waste disposal mechanics and need-to know staff. How Chemtrails are Dispersed Next comes the question of how exactly chemtrails are dispersed.

This was hinted at in the airline mechanic's account of seeing three tanks containing liquid. The purpose of these three tanks is evident when present patented technology is taken into account.

Here is the abstract of patent 03994437:

A method and apparatus are provided for evenly disseminating by broadcast techniques trace quantities of biologically active chemicals such as nutrients, insecticides, fungicides, growth regulators and the like.

The biologically active chemical is encapsulated in a microdispenser such as a filamentary conduit of regulated cross-section and length. The filled microdispensers are then metered into a moving carrier fluid stream, preferably air, and the carrier fluid containing the microdispensers is then evenly dispensed throughout the area. In an alternate preferred embodiment, the microdispensers are coated with a second material which may be either another biologically active material or a sticker for attaching the microdispenser to living organisms such as plants or animals. The method and apparatus is also applicable to biologically active chemicals contained in laminated microdispenser structures for dissemination and release. In the actual patent, however, the author states that the fiber sizes are quite large, with inside diameters of 7-50 mils and lengths of two inches.

These sizes he states, are preferred, though not limiting numbers. It is possible that this technology has been updated to produce microfilaments such as the 'cobwebs' seen falling from the sky after chemtrail sprayings. What's important is the encapsulation of biologically active materials in a polymer coating. The minimum number of liquids to accomplish this is three, two to form polymers such as polyesters, polyolefins, acrylics, modacrylics, polyamides upon reaction during mixing with one another, and the third being the biologically active liquid.

Another patent entitled "ENCAPSULATION BY INTERFACIAL

POLYCONDENSATION" 3577515, describes this process perfectly.

## Overview of the Chemtrail Phenomenon

Chemtrails appear worldwide, though it has been claimed that none have been sighted in China. The author has personally witnessed them in Germany. Although chemtrails in foreign countries may be due to planes originating from the US, or from US military bases in those countries, the heaviness of spraying there suggests that foreign governments and commercial agencies are involved. As stated, this contradicts the hypothesis that chemtrails are sprayed to protect Americans from an anthrax attack, as terrorists would not target countries other than America, especially many of the lesser countries in which chemtrails have still been sighted. What is to be gleaned from the preceding point is that governments worldwide are involved in aggressively spraying the population with agents that have biological effects. They are in a hurry, considering their frequency and density of coverage, as if a deadline is to be met. The project has risked discovery by employing commercial airlines to help with the spraying, and such a risk can only be justified if the project itself were in the nature of an emergency. They have also risked their secrecy by spraying during the day to affect as many people as possible, when all below can plainly see these contrails are anything but. What worldwide emergency could be of such importance and threat to the world governments?

## Piece 2: Bacterially Induced Transcession and Gene Therapy via Vector Viruses

This section concerns altering one's DNA via incorporation of foreign DNA from bacteria or viruses. First Clue that Viruses Affect Host's DNA The term 'transcession' appears in a Leading Edge article, quoted as follows:

"One of the indications that vaccinations may in fact be changing the genetic structure of humans became evident in

September of 1971, when scientists at the University of Geneva made the discovery that biological substances entering directly into the bloodstream could become part of human genetic structure. In one experiment, scientists in Geneva extracted the auricles of frog hearts and dipped them for several hours in a suspension of bacteria. Afterward, they found a high percentage of RNA-DNA hybridization between bacterial DNA extracted from bacteria of the same species as that used in the experiment and titrated DNA extracted from the auricles which had been dipped in the bacterial suspension.

Bacterial DNA had been absorbed by the animal cells. This phenomenon has been dubbed transcession. There is evidence that this kind of phenomenon is happening all the time within the human body. It is conceivable, for example, that heart damage following rheumatic fever could be the result of the immune system reacting to its own cells producing a foreign RNA complex after absorption of foreign DNA." (link)

## Chemtrail's And The CIA

The following information was gathered by me on 10/24/00 beginning at 4 am when the good Lord woke me from a sound sleep. There is massive info contained here re: this obnoxious and sickening spraying. You better believe your local TV meteorologist/weatherman knows much about these activities (per my conversation with a friend who is a TV news director). However they are ordered by the government agencies, not to report on it. Please take the time to review this material and pictures. Feel free to repost and forward far and wide. Many people globally have been made very ill or died from the effects of these diabolical programs. You may have noticed in your area increases in the following illnesses: Multiple Sclerosis, Lupus, Flu like illnesses, Bronchial/Asthma, Allergy/Respiratory illness, Sore throat, Mouth abscesses and much more. Infants and elderly especially affected.

PS. This work should draw me yet another black chopper visit

or another hard drive wiped clean like last month.

I excerpted the following paragraph \* from this CIA info. DO NOT confuse the CIA's weather modification program with the Corporate and University's programs or UN/NGO's (ie.National Institute for Global Environmental Change) \* Excerpted from " For Your Eyes Only" Begin excerpt:

"I'll tell you, the kind of clearance most of us get doesn't give us enough access, but it gives us great stories," Volgy begins. "And I tell my story in my class all the time. I walked past an office called the 'Office of Weather and Climate Modification.' And I knocked on the door, I walked in, and there was this guy sitting behind the desk, but there was nothing on the desk. And I said, 'What do you do?'and he said, 'I can't tell you.' And I said, 'I've got security clearance,' and he said, 'Not for me, you don't.' " Volgy laughs.

Many of my list members will recall, an article I wrote a couple of years ago, wherein I described a toxic fog which made my wife,myself and our dog very ill. The article was titled: " Say Chicken Little the Sky IS Falling" See the flares used for this below: <http://www.iceflares.com/>

Additional info. Here you will find the US & USSR "partnership":

<http://www.srh.noaa.gov/tlh/wxhwy.html>

\*Caveat Lectuer on this one since it's from an anonymous source, BUT from what I have researched in the past I tend to believe a major portion of it.

Chemtrails

So, you haven't yet figured out the airborne conditioning-agent

release program that is being operated by the government. I'll give you some hints, but first I'll give you a little information about myself. I'm a retired government scientist with an advanced degree in one of the health-related disciplines. I do not use my real name for fear of retaliation, either against me, or against members of my family. I always try to route my e-mail communications so that they appear to come from another source, usually from one somewhere within the government. Sometimes I use the internet resources of the public library - whatever it takes to hide my true identity and confuse those who don't want the sort of information I possess to fall into the public's hands.

I have a small circle of friends who are, or were, in key positions within our military and several government agencies. These are not the very top level personnel, but mid to upper mid-level people, scientists and analysts, who are in positions where they can see the day-to-day activities of what's going on, who are charged with implementing the details, but who are never quite privy to the schemes behind the work they do. Each of my contacts has been able to supply me with a portion of the puzzle, but separately, none of them understands the whole story. I'll tell you what I've pieced together so far. But I have to admit that this information frightens me because there is no place I can go with it. What am I supposed to do - write my congressman? I believe that would be like signing my own death warrant. This whole chemtrail issue is related to the plan for decreasing the world population to around 450-500 million -- and starting with the US first. Why? The people of the US are the only ones with even the remotest chance of stopping this. That is, if they knew about it. That's why the US has to be the first to go. You have to understand that the world's elite covet the US for its geographic diversity - and they would love to return this country to its condition as it existed prior to Columbus setting foot here, but without the Native Americans this time of course. 20 You may have already heard how several national parks have been designated as world biospheres - that's the plan for all of North America, a giant nature park and

playground that will be devoid of annoying human beings (that would be us). And the people actually involved in doing the spraying, as well as those who will take part in the rest of the plans, are being duped into believing they will be spared, that is, permitted to live and remain on this continent as administrators and caretakers of this vast nature preserve. I understand that about 150 to 200 thousand people are projected as necessary for maintenance purposes. But it's likely these people will not be Americans. Those in charge wouldn't want to risk the possibility of some sort of revolt, so the workers will probably be brought in from Europe and Asia.

There are rumors floating about the internet that the chemtrails are part of some sort of secret program the government is doing to protect the US from future biological attacks. Nothing could be further from the truth. The plan is to sensitize, or condition, the US population to being wiped out by influenza A. Over the past few years, people have been encouraged to get flu shots to protect them against the generally non-lethal strains that circulate through the population during flu season. 20 Each year the US government has guessed which strains were most likely to spread. They seem to always guess right - don't they? This flu season, the government protected people with a trivalent vaccine that included the A/Beijing/262/95-like (H1N1) and the A/Sydney/5/97-like (H3N2). It also contained the B/Beijing/184/93-like hemagglutinin antigens. For those not familiar with virology, the H and N refer to proteins on the outside of the virus, the hemagglutinin and neuraminidase, which are responsible for the virus attaching to, and then invading, a host cell. The public has been quite pleased with the success of the vaccines offered so far.

But that will change in the future.

Researchers at the US Army Medical Research Institute of Infectious Diseases (or USAMRIID) at Fort Detrick in Frederick MD have reconstructed and modified the H1N1 Spanish Flu virus, making it far more deadly than it ever was back when it was responsible for the 1918-1919 flu pandemic

that killed over 20 million worldwide and over 500,000 here in the US. Consider that it could have killed many more, but back then, people couldn't hop on a jet and travel from New York to L.A. in five hours. Now, our ability to travel will increase the spread and will be our downfall. The flu vaccines contain killed virus and protect the body well against challenge by that particular strain, but work poorly against other strains not included in the inoculation. At some point, the vaccine stockpile will include the more lethal modification of the 1918 H1N1 in its live form. Most people receiving this vaccine will simply be renewing their annual flu shot, and the vaccine will still include the inactivated version of the more benign form of H1N1 (as was included in this year's vaccine). The presence of the milder strain in the inoculum will slow down the progression of the more lethal H1N1 form, so people will become sick more slowly - but they will still eventually die. It will just take a few weeks longer. In the meantime, they will be carriers for the lethal form of the virus, passing it on to everyone with whom they make contact. And as people hear that others are dropping dead from the flu, they will flock to get their own vaccination. And the entire population will be more receptive to infection because their lungs will have been pre-conditioned to guarantee it.

If you will remember back to 1968 and '69, the Hong Kong flu, which was influenza A type H3N2, killed over 30,000 people in the U.S. alone. That was a fortuitous learning event for some because it taught them that the flu could still conceivably be used to wipe out a population. But at the same time, it pointed out the need to precondition the populace so that those who might normally be resistant could be rendered susceptible. Hence the development of the vaccine program and the aerial spraying procedures to condition the population. The purpose of the chemicals in the chemtrails is to help the viral envelope fuse with lung cells, permitting easier penetration and infection.

But what about those few individuals who don't succumb to the flu? Probability alone demands that there will be some

who survive - pockets of the population that are either not reached or somehow (and this is less likely) are resistant to the lethal H1N1 strain. At this point you must also remember that our military personnel have been immunized against a variety of pathogens, including the anthrax bacillus. 20 For those geographically isolated areas where the flu doesn't do its job, it's a fairly simple matter to lay down anthrax spores and then send in what's left of the military to take care of anyone still breathing. The anthrax spraying will probably come under the guise of a flu protection program to save those still alive after the epidemic. And the military, having been exposed to civilians with the flu, will eagerly await their own flu shots. I should emphasize that this is a last resort scenario. Those orchestrating the plan will not want to use anthrax until all other possibilities are exhausted - this because of the long-term viability of anthrax spores. To scatter them over the countryside would mean the area would be dangerous for use by humans, at least those not vaccinated against the bacteria. And think about this for a moment.

Why do you suppose agencies like Fish and Wildlife are so eager to reintroduce wolves and other species into areas of the country which haven't seen these animals for generations. It's all part of the plan to restore this land to what the elite envision as its early paradise-like state, with wild animals freely roaming the uninhabited plains and forests. Granted, it will take some time to clean up the place and to maybe destroy a lot of small towns that might otherwise be considered a blight on the landscape. But for the global elite it will be a small price for us to pay for their enjoyment.

Abstract:

Light scattering pigment powder particles, surface treated to minimize inparticle cohesive forces, are dispensed from a jet mill deagglomerator as separate single particles to produce a powder contrail having maximum visibility or radiation scattering ability for a given weight material. ## PRODUCTION OF IMPROVED METAL OXIDE PIGMENT

USR0015771\* 2 /1924 Savage

\* some details unavailable

### CLAIMS:

[Hide claims]: What is claim is:

1. Contrail generation apparatus for producing a powder contrail having maximum radiation scattering ability for a given weight material, comprising:

a. an aerodynamic housing;

b. a jet tube means passing through said housing, said tube means having an inlet at a forward end of said housing and an exhaust at a rearward end thereof;

c. a powder storage means in said housing;

d. a deagglomeration means also in said housing;

e. means connecting said powder storage means with said deagglomeration means for feeding radiation scattering powder from said powder storage means to said deagglomeration means;

f. the output of said deagglomeration means dispensing directly into said jet tube means for exhausting deagglomerated powder particles into the atmosphere to form a contrail; and

h. means for controlling the flow of said powder from said storage means to said deagglomeration means.

2. Apparatus as in claim 1 wherein said jet tube means is a

ram air jet tube.

3. Apparatus as in claim 1 wherein an upstream deflector baffle is provided at the output of said deagglomeration means into said jet tube means to produce a venturi effect for minimizing back pressure on said powder feeding means.

4. Apparatus as in claim 1 wherein said deagglomerator means comprises:

a. means for subjecting powder particles from said powder storage means to a hammering action to aerate and precondition the powder; and

b. a jet mill means to further deagglomerate the powder into separate particles.

5. Apparatus as in claim 4 wherein pressurized gas means is provided for operating said deagglomeration means.

6. Apparatus as in claim 1 wherein said radiation scattering powder particles are titanium dioxide pigment having a median particle size of about 0.3 microns.

7. Apparatus as in claim 1 wherein said radiation scattering powder particles have a coating of extremely fine hydrophobic colloidal silica thereon to minimize interparticle cohesive forces.

8. Apparatus as in claim 1 wherein the formulation of said powder consists of 85% by weight of TiO<sub>2</sub> pigment of approximately 0.3 micron media particle size, 10% by weight of colloidal silica of 0.007 micron primary particle size, and 5% by weight of silica gel having an average particle size of 4.5 microns.

9. The method of producing a light radiation scattering contrail, comprising:

a. surface treating light scattering powder particles to minimize interparticle cohesive forces;

b. deagglomerating said powder particles in two stages prior to dispensing into a jet tube by subjecting said powder particles to a hammering action in the first stage to aerate and precondition the powder, and by passing said powder through a jet mill in the second stage to further deagglomerate the powder;

c. dispensing the deagglomerated powder from the jet mill directly into a jet tube for exhausting said powder into the atmosphere, thus forming a contrail.

10. A method as in claim 9 wherein said light scattering powder particles is titanium dioxide pigment.

11. A method as in claim 9 wherein said powder particles are treated with a coating of extremely fine hydrophobic colloidal silica to minimize interparticle cohesive forces.

12. A method as in claim 11 wherein said treated powder particles are further protected with a silica gel powder.

Background/Summary:

## BACKGROUND

The present invention relates to method and apparatus for contrail generation and the like. An earlier known method in use for contrail generation involves oil smoke trails produced by injecting liquid oil directly into the hot jet exhaust of an aircraft target vehicle. The oil vaporizes and recondenses being the aircraft producing a brilliant white trail. Oil smoke trail production requires a minimum of equipment; and, the material is low in cost and readily available. However, oil smoke requires a heat source to vaporize the liquid oil and not all aircraft target vehicles, notably towed targets, have such a heat source. Also, at altitudes above about 25,000 feet oil smoke visibility degrades rapidly.

## SUMMARY

The present invention is for a powder generator requiring no

heat source to emit a "contrail" with sufficient visibility to aid in visual acquisition of an aircraft target vehicle and the like. The term "contrail" was adopted for convenience in identifying the visible powder trail of this invention. Aircraft target vehicles are used to simulate aerial threats for missile tests and often fly at altitudes between 5,000 and 20,000 feet at speeds of 300 and 400 knots or more. The present invention is also suitable for use in other aircraft vehicles to generate contrails or reflective screens for any desired purpose.

The powder contrail generator is normally carried on an aircraft in a pod containing a ram air tube and powder feed hopper. Powder particles, surface treated to minimize interparticle cohesive forces are fed from the hopper to a deagglomerator and then to the ram air tube for dispensing as separate single particles to produce a contrail having maximum visibility for a given weight material. Other object, advantages and novel features of the invention will become apparent from the following detailed description of the invention when considered in conjunction with the accompanying drawing.

Drawing Descriptions:

## DESCRIPTION OF DRAWING

FIG. 1 is a schematic sectional side-view of a powder contrail generator of the present invention.

Description of Preferred Embodiments:

## DESCRIPTION OF PREFERRED EMBODIMENT

The powder contrail generator in pod 10, shown in FIG. 1, is provided with a powder feed hopper 12 positioned in the center section of the pod and which feeds a powder 13 to a deagglomerator 14 by means of screw conveyors 16 across the bottom of the hopper. The deagglomerator 14 produces two stages of action. In the first stage of deagglomeration, a shaft 18 having projecting radial rods 19 in compartment 20 is rotated by an air motor 21, or other suitable drive means. The shaft 18 is rotated at about 10,000 rpm, for example. As

powder 13 descends through the first stage compartment 20 of the deagglomeration chamber, the hammering action of rotating rods 19 serves to aerate and precondition the powder before the second stage of deagglomeration takes place in the jet mill section 22. In the jet mill 22, a plurality of radial jets 24 (e.g., six 0.050 inch diameter radial jets) direct nitrogen gas (at e.g., 120 psig) inward to provide energy for further deagglomeration of the powder. The N<sub>2</sub>, or other suitable gas, is provided from storage tanks 25 and 26, for example, in the pod. The jet mill 22 operates in a similar manner to commercial fluid energy mills except that there is no provision for recirculation of oversize particles. Tests with the deagglomerator show that at a feed rate of approximately 1 1/2 lb/min, treated titanium dioxide powder pigment is effectively dispersed as single particles with very few agglomerates evident.

The nitrogen gas stored in cylinder tanks 25 and 26 is charged to 1800 psig, for example. Two stages of pressure reduction, for example, by pressure reduction valves 28 and 29, bring the final delivery pressure at the radial jets 24 and to the air motor 21 to approximately 120 psig. A solenoid valve 30 on the 120 psig line is connected in parallel with the electric motor 32 which operates the powder feeder screws 16 for simultaneous starting and running of the powder feed, the air motor and the jet mill deagglomerator.

Air enters ram air tube 34 at its entrance 35 and the exhaust from the jet mill deagglomerator passes directly into the ram air tube. At the deagglomerator exhaust 36 into ram air tube 34, an upstream deflector baffle 38 produces a venturi effect which minimizes back pressure on the powder feed system. The powder is then jetted from the exhaust end 40 of the ram air tube to produce a contrail. A pressure equalization tube, not shown, can be used to connect the top of the closed hopper 12 to the deagglomeration chamber 14. A butterfly valve could be provided at the powder hopper outlet 39 to completely isolate and seal off the powder supply when not in use. Powder 13 could then be stored in hopper 12 for several

weeks, without danger of picking up excessive moisture, and still be adequately dispensed. Preparation of the light scatter powder 13 is of a critical importance to production of a powder "contrail" having maximum visibility for a given weight of material. It is essential that the pigment powder particles be dispensed as separate single particles rather than as agglomerates of two or more particles. The powder treatment produces the most easily dispersed powder through the use of surface treatments which minimize interparticle cohesive forces.

Titanium dioxide pigment was selected as the primary light scattering material because of its highly efficient light scattering ability and commercially available pigment grades. Titanium dioxide pigment (e.g., DuPont R--931) with a median particle size of about  $0.3\mu$  has a high bulk density and is not readily aerosolizable as a submicron cloud without the consumption of a large amount of deagglomeration energy. In order to reduce the energy requirement for deagglomeration, the  $TiO_2$  powder is specially treated with a hydrophobic colloidal silica which coats and separates the individual  $TiO_2$  pigment particles. The extremely fine particulate nature ( $0.007\mu$  primary particle size) of Cobot S--101 Silanox grade, for example, of colloidal silica minimizes the amount needed to coat and separate the  $TiO_2$  particles, and the hydrophobic surface minimizes the affinity of the powder for absorption of moisture from the atmosphere. Adsorbed moisture in powders causes liquid bridges at interparticle contacts and it then becomes necessary to overcome the adsorbed-liquid surface tension forces as well as the weaker Van der Waals' forces before the particles can be separated. The Silanox treated titanium dioxide pigment is further protected from the deleterious effects of adsorbed moisture by incorporation of silica gel. The silica gel preferentially adsorbs water vapor that the powder may be exposed to after drying and before use. The silica gel used is a powder product, such as Syloid 65 from the W. R Grace and Co., Davison Chemical Division, and has an average particle size about  $4.5\mu$  and a large capacity for moisture at low humidities.

A typical powder composition used is shown in Table 1. This formulation was blended intimately with a Patterson-Kelley Co. twin shell dry LB-model LB--2161 with intensifier. Batches of 1500 g were blended for 15 min. each and packaged in 5-lb cans. The bulk density of the blended powder is 0.22 g/cc. Since deagglomeration is facilitated by having the powder bone dry, the powder should be predried before sealing the cans. In view of long periods (e.g., about 4 months) between powder preparation and use it is found preferable to spread the powder in a thin layer in an open container and place in a 400°F over two days before planned usage. The powder is removed and placed in the hopper about 2 hours before use.

Table 1 \_\_\_\_\_ CONTRAIL P

Cabot S-101 Silanox) 10 primary particle size 0.007 $\mu$ Sil

65) 5 average particle size 4.5 $\mu$  \_\_\_\_\_

Other type powder compositions can also be used with the apparatus described herein. For example, various powder particles which reflect electromagnetic radiation can be dispensed as a chaff or the like from the contrail generator. Obviously many modifications and variations of the present invention are possible in the light of the above teachings. It is therefore to be understood that within the scope of the appended claims the invention may be practiced otherwise than as specifically described.

Subject: Barium Affirmed in Chemtrails

The unusual presence of the element barium in the atmosphere now appears to have been affirmed through the methods of spectroscopy. Spectroscopy is the study of the

absorption and emission of light and other radiation by matter, as related to the dependence of these processes on the wavelength of the radiation. The results of the current research are now sufficient to establish an analytical basis for the formal investigation of radical atmospheric changes induced by relatively recent aircraft aerosol operations. This work further confirms the recent findings that have substantiated the unusual presence of an alkaline salt form in the atmosphere, as revealed through recent pH tests conducted across the country. Barium compounds, especially those of a soluble nature, are regarded as a serious health risk, and they are commonly associated with respiratory distress.

Research by this method will continue, but preliminary results are provided because of the importance of the findings and to support the claims that are made herein. It is recommended that other researchers across the country participate within this endeavor, in an effort to further refine the results of the study. Spectroscopy provides an analytic tool that can be used to establish the presence or absence of certain foreign elements in the atmosphere that have been under consideration for some time.

# Chemtrails

## A Field Guide to Chemtrails

**C**hemtrails are a new phenomena which has struck all over the world. It seems that the government are using planes to spray populated areas with a chemical solution, which can make people very sick, but why??. Normal contrails usually dissipate very rapidly, are of relatively short length, and show variability in their formation from the engines. Chemtrails usually extend continuously and expand to

transform into a cirrus type cloud layer. Apart from the repeated, intense, and unusual flight-patterns, odd illnesses will sometimes strike people shortly after these chemtrail episodes; multiple witnesses have also reported a cobweb-like substance seen falling from the sky.

You should also know that a lab-analysis of some "goo" which fell to the ground revealed the presence of biological-agents: Pseudomonas Fluorescens, Streptomyces, and a restriction enzyme used to create viruses. Further, a gentleman who has been following the contrails around the country for years had a medical test which discovered pathogens in his body -- the rare V2 Grippe virus among them -- pathogens that should only be found in laboratories.

During the past several months, investigators across the United States and Canada have been collecting photographs and eyewitness accounts related to a widespread, ongoing, and strangely anomalous phenomena that has been occurring in our skies overhead. We are referring to the purposeful, deliberate weaving of strange, lingering, and thickening aerial contrails, better known as **ChemTrails** to most observers. Most persons viewing these photographs and reading the associated accounts have had little difficulty arriving at the obvious conclusion that these documented aerial phenomena represent anything **but** the normal contrail activity associated with everyday commercial airline traffic.

To most observers, the feeling that there is something disturbing, and even ominous, connected with these images and reports, has been more than just a passing impression or a temporary distraction. Those of us who have yielded to our natural human curiosity and taken the time to turn off the TV, go outside, and look up into the sky, have been rewarded with a stunning first-hand observation of these strange phenomena. This undeniable personal experience has provided more than the reasonable and sufficient amount of evidence required to lead many observers to the startling conclusion that there is currently, an ongoing, nationwide, government project underway across America and other

countries. At present, neither the purpose nor the scope of this operation is fully understood. Two facts are known however—that this strange contrail activity is not a normal, ordinary, or every-day phenomena, and that this program, which seems to have entered its operational phase during the fall of 1998, is being simultaneously, repeatedly, and continuously executed over virtually every populated community in the United States.

## A Contrail Is Not A ChemTrail

ChemTrails are not the same as normal, everyday aerial contrails; there is a definite observable difference in both the formation and behavior of these two similar phenomena, which clearly distinguishes one from the other.

Normal contrails are composed of fragile ice crystals formed by aircraft flying at altitudes of 31,000 feet or greater. At altitudes below 31,000 feet, these normal vapor condensation trails are simply not able to form behind an aircraft, regardless of its type or design. Above 31,000 feet, normal contrails appear pencil-thin in construction when observed from ground level, and in nearly all instances, tend to totally evaporate within a minute or so, rarely extending for any appreciable distance behind the emitting aircraft. ChemTrails on the other hand, have been observed being generated by aircraft flying at altitudes as high as 33,000 feet and as low as 8,000 feet—but generally, below 30,000 feet. Since normal contrails can not form at these low altitudes, any contrail formation that is observed at these elevations is probably not a contrail at all, but a genuine ChemTrail.

These normally manifest as billowy smoke trails when viewed from the ground, and tend to always become broader and denser over time. They generally do not evaporate, nor do they dissipate at all. Over a period of several hours, parallel ChemTrail formations will eventually spread out to meet one another and join together to form a

continuous, banded, cirrus-like cloud formation in the sky. Often a **fish-spine** configuration will be observed after a given ChemTrail has had sufficient time to mature. Shortly after this joining-up phase, what just hours earlier was a perfectly clear blue sky, will now appear as a structured, milky-haze overcast, unnatural in all respects.

Another distinguishing difference between contrails and ChemTrails concerns their relative location or position in the local sky, as well as their

directional characteristics.

Aircraft emitting normal contrails are constrained by FAA regulations to operate only over designated air routes; therefore, the contrails that they generate will be found consistently only within local flight corridors, which are easily discerned by an observer at any given geographic location on the ground. In addition, air traffic along these designated routes is always unidirectional. Aircraft flying in opposing compass directions are never permitted to use the same air-routes, at the same altitudes—for obvious reasons. Therefore, only those contrails that are formed within these restricted air corridors, and consistently with the same vector or direction should be considered normal contrails resulting from normal commercial airline traffic.

There is one exception to this rule however. Occasionally, normal contrails will be emitted by military air traffic, which do not always operate within these flight corridor constraints. This deviation is due to the fact that the military is generally exempt from commercial flight regulations during air maneuvers and training exercises—but again, this is the exception and not the rule.

Aircraft that generate ChemTrails are apparently not constrained to operate within FAA designated air corridors either; nor are they required to adhere to established commercial flight rules and FAA regulations. Consequently, ChemTrail patterns will be observed lying both within and well outside of the normal air corridors used by the commercial airlines. Unlike normal contrails, these lattice formations can and do appear at *any* location in the local sky, develop in any geographic direction or vector, intersect and intercept one another as a matter of practice, and produce elaborate and extensive cross-hatch or geometric patterns, which are often seen extending from horizon to horizon. Any commercial airliner that attempted to engage in these kinds of flight maneuvers would be guilty of violating just about every known international flight regulation of commercial aviation. The ChemTrail patterns laid-down by these regulation-exempt aircraft, generally appear as either long parallel billowing furrows in the sky, as some variant of an intersecting tic-tac-toe configuration or a simple figure X. It is believed that these clearly discernible geometric patterns are used as a means of identifying specific local ChemTrail formations, and facilitate the tracking of their position, movement, and drift using satellite telemetry. This information would be vital if it were necessary to determine critical operational values for the various mission parameters needed to accurately position these lattice-type networks, so as to target selected geographic locations and populations with their *fallout*.

Another very subtle parameter associated with ChemTrail phenomena is the

significance of the local surface wind speed over the dispersion area. Empirically, ChemTrail missions tend to be suspended wherever and whenever the ground wind speed reaches or exceeds 20 miles per hour. This characteristic has been a consistent limiting factor throughout the range of areas where ChemTrail activity has been observed. Normal contrail activity is never subject to this restriction, and can be seen over a wide range of measured surface wind velocities.

One of the most important distinguishing characteristics of normal contrail formations is their *pattern-configuration*. Normal contrails are produced through a complex interaction between an aircraft's jet engine, its exhaust, and the temperature and humidity of the ambient atmosphere. Whenever these contrails are generated, under the proper atmospheric conditions, the number of simultaneous contrails emitted by any specific aircraft is always directly related to the engine configuration of that aircraft. A 747, for example, will leave a parallel four-element contrail in its wake, a DC-10 or L1011, on the other hand, will emit a parallel three-element contrail, and a 737 or 777 will generate a parallel two-element contrail in the sky. In each of these cases, the aircraft in question will generate only short-lived, fully-dissipating, multiple parallel contrails—always, at altitudes greater than 31,000 feet, and always in accordance with the number of engines in its design. A multi-engine aircraft will simply not produce single-element contrails as long as both engines are functioning properly. The number of contrails therefore, that will be produced by any given aircraft is always the same as the number of engines powering that aircraft—these numbers are *always* equal.

The type of aircraft that are most frequently observed laying-down genuine ChemTrail patterns, are normally **KC-10A** or **KC-135** tankers. The KC-10A is a three-engine aircraft and would therefore normally leave a three-element parallel contrail in its wake. The KC-135 however, is a smaller, four-engine aircraft, and would therefore typically display four-element contrail. When used during ChemTrail missions however, these aircraft have been observed laying-down only a thick and billowy, single-element ChemTrail, while simultaneously displaying **no** concurrent normal contrail activity. Two different mechanisms are therefore at work here.

This pattern-configuration feature can serve as a very good guide in helping to

distinguish between normal contrail observations and true ChemTrails sightings, but it is not foolproof. The military has been equipping their KC-10As and KC-135s with wing tip mounted refueling pods, to permit multiple, simultaneous refueling operations. If one of these aircraft is being used in a particular ChemTrail mission, then the resulting dispersion will most likely start out as two-parallel emissions. Eventually though, these will merge into a single wide-band dispersion pattern, retaining all of the other special characteristics associated with ChemTrail activity.

The other factor that might be working against this general rule, is the likelihood that the military is experimenting with a number of different spray-nozzle technologies having various geometries. Such research would likely be aimed at controlling the specific flow and dispersion characteristics of their equipment. Variability in the nozzle designs used to disperse the bio-chemical cocktail, would probably add some additional variability to the dispersion patterns being observed, but again, the predominate characteristics of a genuine ChemTrail will eventually prevail.

One more distinguishing characteristic of a ChemTrail than can help to separate these from normal contrails concerns the display of a vertical ***curtain-like*** fall-off from a maturing ChemTrail.

Although the ChemTrail remains very prominent in the sky, the vertical curtain seems to roll off of the main body and appears to descend toward the surface in vertical sheets. The essential idea to keep in mind regarding ChemTrails, regardless of the manner in which these bio-chemical agents are being dispersed, is that all ChemTrails eventually coalesce into a consistent, widely diffused footprint, which ultimately obscures all or most of the entire sky with a clearly structured, solid milky haze.

The components constituting this ***bio-chemical soup*** do not dissipate or disappear over time; instead, due to the higher specific-gravity of the host element being used, namely JP8+100 jet fuel, these components simply settle to the earth and blanket everything within their reach—human beings, animals, plants, soil, and water, as they slowly descend through the atmosphere—through the air that we all breath.

We can summarize the characteristic pattern-configuration behavioral of

genuine ChemTrail activity with the following two statements: First, that the aircraft used in these operations tend to be flown at altitudes **below** 31,000 feet, because no normal engine-related contrails are ever observed concurrent with the emission of the ChemTrails. Secondly, that the biochemical agent forming these ChemTrails is being emitted by a mechanical component of the aircraft other than the engines—normally, this component is the single, extended, rear mounted, refueling tail-boom.

There is one more distinguishing characteristic of unquestionable ChemTrail activity that we should mention at this time—a very pronounced refractory chemical signature, visible when viewing ChemTrail cloud formations illuminated by the sun.

When sunlight passes through a ChemTrail, the chemical components making up the cloud tend to refract sunlight in such a way as to render a yellow-orange-green **halo** surrounding the sun at a distance of about 20 to 30 degrees of radius on either side. Some researchers have indicated that this is best observed using polarized sunglasses, but it can generally be seen with or without a filter. This halo is not always completely circular and continuous, but may on occasion, depending on the structure of the ChemTrails, be expressed as colored prominences at irregular, and scattered distances from the sun.

A **dark-linespectral analysis** of the solar spectrum exhibited by a ChemTrail when illuminated by the sun may also prove particularly useful in identifying ChemTrail activity, as well as providing valuable information on its atomic makeup. To date however, we are not aware of any such study or analysis, although this would seem to be both a reasonable and logical undertaking, well within the capabilities of most colleges and universities. Perhaps this will be attempted in the

near future. Ethylene dibromide has a mild, sweet odor. However, just because you do not smell anything peculiar in the air does not mean that the fallout is not making it all the way to the ground. They are also using an additive to help camouflage this smell.

When the camouflage is not working properly though, or the fallout is particularly dense, you will definitely smell something very strange, that you have probably never sensed before. It has been described by some observers as a ***metallic*** or ***corrosive*** odor. Although we have also picked up the scent from time to time, particularly in the early morning when the air is still, labeling it is an altogether different matter. The closest comparable odor would be ***malathion***, which just so happens to be a pesticide! When you do finally meet up with it, you will know it—the odor is very difficult to forget afterwards.

## Parallel Side Effects

Strange and mysterious cloud formations are not the only byproduct of the recent ChemTrail aerial campaign. There is in fact, another, far more sinister side to this phenomena. Whether this is a byproduct or the objective of these attacks is yet to be determined. In either event however, the side effects associated with these ChemTrails are, and should be, the primary focus of our attention, as this ancillary effect could very well pose a particularly serious threat to every human being living in the United States and Canada. As of this writing, there are no known or observed health and environmental consequences associated with normal contrail emissions—they appear at this time to be both completely harmless and benign. This same statement however, can not be made in the case of authentic ChemTrails. It has been shown, albeit only empirically thus far, by many dedicated researchers, and posted extensively on the Web, that the formation of ChemTrails have a direct correlation to the localized, time-synchronized, outbreak of a broad range of primarily, respiratory-

related illnesses. In light of this apparent relationship, ChemTrails should not be considered inherently benign, but should be treated with all due caution, prudence, and concern by those who are either studying them or simply observing them.

By way of further elaboration—since this aerial campaign began in earnest during the late summer or early fall of 1998; a secondary, highly correlated, event has been observed that would seem to be inescapably and directly related to this phenomena. The diligence and dedication of a number of very competent researchers and bio-medical professionals have uncovered what would appear to be a clear and unambiguous link between the ChemTrail aerial campaign and the simultaneous outbreak of near epidemic, flu-like illnesses. These outbreaks have repeatedly swept the entire United States over the past several months, always in the wake of a local ChemTrail attack. A name has been tentatively given to this affiliated illness—***Respiratory Distress Syndrome***—which has been associated with a number of chemical, viral, bacterial, and fungal components, either directly or indirectly related to the bio-chemical makeup of the ChemTrails. We will discuss the detailed medical aspects of this connection later in this article. For the time being however, it is sufficient to understand that the characterization of these mysterious contrails as ***ChemTrails***, is not without a very logical and appropriate rationale.

The term ***ChemTrail*** itself, was coined by Mr. William Thomas, a highly respected and capable, Investigative Journalist from Canada, who first uncovered, and made public, the enigmatic contrail issue and its related medical ramifications.

## **The All-Too-Silent Media**

One of the most interesting and telling aspects of this entire phenomena has been its total and complete avoidance by the media—***all media***—radio, television, and the press. Across the country, countless eyewitnesses, with not only photographic proof-in-hand, but with concurrent evidence in the skies above them, have been totally ignored by ***all*** of the mainline media organizations. To date, and to the best of our knowledge, not a single radio or TV network station, nor a member of the syndicated press has dared to run a story surrounding the nationwide appearance or purpose of these ChemTrails. According to the current record, no individual researcher has as yet been successful in attracting as much as the passing attention of even the smallest of these news organizations. What is

even more interesting and disconcerting is the fact that, with all of the widespread discussion surrounding this phenomena, its link to a near-epidemic outbreak of a serious and debilitating range of illnesses, and the daily *skywriting* in the very skies above their offices and studios, not one member of the mainline media has come forward with a story to discredit the data, contradict the evidence, or calm the growing concerns and justified suspicions of the public—which is no more than the very minimum response that we have a right to expect from any news organization that claims to serve the needs of the people.

## **Did An Airline Mechanic Stumble Upon The Truth?**

(Note - We cannot confirm the following statement but the implications are enormous, and we expect there will be serious efforts to investigate and evaluate these allegations quickly. -ed.)

For reasons you will understand as you read this I can not divulge my identity. I am an aircraft mechanic for a major airline. I work at one of our maintenance bases located at a large airport. I have discovered some information that I think you will find important.

First I should tell you something about the "pecking order" among mechanics. It is important to my story and to the cause to which you have dedicated yourself.

Mechanics want to work on three things. The avionics, the engines, or the flight controls. The mechanics that work on these systems are considered at the top of the "pecking order". Next come the mechanics that work on the hydraulics and air conditioning systems. Then come the ones who work on the galley and other non-essential systems. But at the very bottom of the list are the mechanics that work on the waste disposal systems. No mechanic wants to work on the pumps, tanks, and pipes that are used to store the waste from the lavatories. But at every airport where I have worked there are always 2 or 3 mechanics that volunteer to work on the lavatory systems.

The other mechanics are happy to let them do it. Because of this you will have only 2 or 3 mechanics that work on these systems at any one airport. No one pays much attention to these guys and no mechanic socializes with another mechanic who only works on the waste

systems. In fact I had never thought much about this situation until last month.

Like most airlines we have reciprocal agreements with the other airlines that fly into this airport. If they have a problem with a plane one of our mechanics will take care of it. Likewise if one of our planes has a problem at an airport where the other airline has a maintenance base, they will fix our plane.

One day last month I was called out from our base to work on a plane for another airline. When I got the call the dispatcher did not know what the problem was. When I got to the plane I found out that the problem was in waste disposal system. There was nothing for me to do but to crawl in and fix the problem. When I got into the bay I realized that something was not right. There were more tanks, pumps, and pipes than should have been there. At first I assumed that the system had been changed. It had been 10 years since I had worked on one. As I tried to find the problem I quickly realized the extra piping and tanks were not connected to the waste disposal system. I had just discovered this when another mechanic from my company showed up. It was one of the mechanics who usually works on these systems. I happily turned the job over to him. As I was leaving I asked him about the extra equipment. He told me to *"worry about my end of the plane and let him worry about his!"*

The next day I was on the company computer to look up a wiring schematic. While I was there I decided to look up the extra equipment I had found. To my amazement the manuals did not show any of the extra equipment I had seen with my own eyes the day before. I even tied in to the manufacturer files and still found nothing. Now I was really determined to find out what that equipment did.

The next week we had three of our planes in our main hanger for periodic inspection. There are mechanics crawling all over a plane during these inspections. I had just finished my shift and I decided to have a look at the waste system on one of our planes. With all the mechanics around I figured that no one would notice an extra one on the plane. Sure enough, the plane I choose had the extra equipment!

I began to trace the system of pipes, pumps, and tanks. I found what appeared to be the control unit for the system. It was a standard looking avionics control box but it had no markings of any kind. I could trace the control wires from the box to the pumps and valves but there were no control circuits coming into the unit. The only wires

coming into the unit was a power connection to the aircraft's main power bus.

The system had 1 large and 2 smaller tanks. It was hard to tell in the cramped compartment but it looked like the large tank could hold 50 gallons. The tanks were connected to a fill and drain valve that passed through the fuselage just behind the drain valve for the waste system. When I had a chance to look for this connection under the plane I found it cunningly hidden behind a panel under the panel used to access the waste drain.

I began to trace the piping from the pumps. These pipes lead to a network of small pipes that ended in the trailing edges of the wings and horizontal stabilizers. If you look closely at the wings of a large airplane you will see a set of wires, about the size of your finger, extending from the trailing edge of the wing surfaces. These are the static discharge wicks. They are used to dissipate the static electric charge that builds up on a plane in flight. I discovered that the pipes from this mystery system lead to every 1 out of 3 of these static discharge wicks. These wicks had been "hollowed out" to allow whatever flows through these pipes to be discharged through these fake wicks.

It was while I was on the wing that one of the managers spotted me. He ordered me out of the hanger telling me that my shift was over and I had not been authorized any overtime.

The next couple of days were very busy and I had no time to continue my investigation. Late one afternoon, two days after my discovery, I was called to replace an engine temperature sensor on a plane due to take off in two hours. I finished the job and turned in the paperwork.

About 30 minutes later I was paged to see the General Manager. When I went in his office I found that our union rep and two others who I did not know were waiting on me. He told me that a serious problem had been discovered. He said that I was being written up and suspended for turning in false paperwork. He handed me a disciplinary form stating that I had turned in false paperwork on the engine temperature sensor I had installed a few hours before. I was floored and began to protest. I told them that this was ridiculous and that I had done this work. The union rep spoke up then and recommended that we take a look at the plane and see if we could straighten it all out. It was at this time that I asked who the other two men were. The GM told me that they were airline safety inspectors but would not give me their name.

We proceeded to the plane, which should have been in the air but was parked on our maintenance ramp. We opened the engine cowling and the union rep pulled the sensor. He checked the serial number and told everyone that it was the old instrument. We then went to the parts bay and went back into the racks. The union rep checked my report and pulled from the rack a sealed box. He opened the box and pulled out the engine temperature sensor with the serial number of the one I had installed. I was told that I was suspended for a week without pay and to leave immediately.

I sat at home the first day of my suspension wondering what the hell had happened to me. That evening I received a phone call. The voice told me *"Now you know what happens to mechanics who poke around in things they shouldn't. The next time you start working on systems that are no concern of yours you will lose your job! As it is I'm feeling generous, I believe that you'll be able to go back to work soon"* CLICK. Again I had to pick myself from off the floor. I made the connection that what had happened was directly connected to my tracing the mysterious piping. The next morning the General Manager called me. He said that due to my past excellent employment record that the suspension had been reduced to one day and that I should report back to work immediately. The only thing I could think of was what are they trying to hide and who are THEY!

That day at work went by as if nothing had happened. None of the other mechanics mentioned the suspension and my union rep told me not to talk about it. That night I logged onto the Internet to try to find some answers. I don't remember now how I got there but I came across a site dealing with chemtrails. That's when it all came together. But the next morning at work I found a note inside my locked locker. It said, *"Curiosity killed the cat. Don't be looking at Internet sites that are no concern of yours."*

Well that's it. THEY are watching me.

Well you already know what they are doing. I don't know what they are spraying but I can tell you how they are doing it. I figure they are using the *"honey trucks"*. These are the trucks that empty the waste from the lavatory waste tanks. The airports usually contract out this job and nobody goes near these trucks. Who wants to stand next a truck full of sh--. While these guys are emptying the waste tanks they are filling the tanks of the spray system. They know the planes flight path so they probably program the control unit to start spraying some amount of time after the plane reaches a certain altitude. The spray

nozzles in the fake static wicks are so small that no one in the plane would see a thing.

**NB: We found it interesting that our site received a visit from Boeing within 4 HOURS of this article appearing on the web! - Another case of Echelon at work???**

Wanna find out more about Chemtrails???

Subject: Chemtrail Exposure Illnesses -- Home Grown Terrorism, your tax

dollars at work!

(Comment: After the September 11 attacks, it "seems" that there is more Chemical spraying going on over U.S. cities. This "home grown" terrorism in our own skies in broad daylight seems to go unnoticed by the majority of the population except when they get sick from it. Then they wonder what the heck caused their illness or the sudden death of a family member. I received this list of symptoms and illnesses linked to the "Chemtrails". You might want to print this out and keep it on hand.)

TO WHOM IT MAY CONCERN:

Over the past three years, through research and the personal accounts of many individuals, it has become apparent that the barium salt mixture, polymer fibers, and other chemicals in the atmosphere are the irritants that are either directly or indirectly responsible for health problems on the rise in the United States and elsewhere. These chemicals are absorbed rapidly from the gastrointestinal tract and are deposited in the muscles, lungs, and bone. Listed herein is an overview of

health problems reported to researchers from private citizens.

- 1) Nose and lung bleeds (the latter including several reports from nursing homes of elderly dying from lung bleed outs, we believe being directly attributable to atmospheric aerosols);
- 2) Asthma and allergies;
- 3) Allergic bronchopulmonary aspergillosis (ABPA) (fungus on the lungs in both infants and adults),
- 4) Flu, Bronchitis and Pneumonia (in epidemic proportions, with doctors commenting to their patients on the many weeks it sometimes takes to improve and the lack of effective antibiotics to treat, including reports of pets having the flu, whole families being decimated), meningitis (inflammation/infection of the brain);
- 5) Upper respiratory symptoms (wheezing, dry cough), including Pulmonary Distress Syndrome (PDS) (in newborns, infants and adults alike), Sudden Infant Death (SIDS), and increased nationwide reports of the sudden death of athletes (reported in the news media as having possibly been attributable directly to air particulates/pollution);
- 6) Deaths from black mold; black or red mold on food crops (farmers reporting pH changes of soil and water), in buildings and ventilation systems (including school buildings);
- 7) Arthritis-like symptoms and muscular pain (young and old alike, sometimes crippling, and in pets);
- 8) Gastrointestinal distress (young and old alike, and in pets);
- 9) Bladder and yeast infections (includes bed wetting, not just in infants but adults);
- 10) Extreme fatigue (young and old alike);

11) Ringing of the ears, dizziness (increasingly reported immediately preceding or after a storm or weather system);

12) Blurry vision / nervous tics after exposure to the air outdoors;

13) Dry/cracking skin and lips, rashes, sores and fungal infections, aging of the skin;

14) Mental confusion/slow thinking and/or the feeling of mentally "being in a fog" (young and old alike, increasingly reported after actually being in heavy mists and fog banks);

15) Autoimmune disorders (LUPUS, thyroid, Crohn's and Addison's Disease, Rheumatoid Arthritis). It should be noted that many of the private citizens check the HAARP magnetometer and note spikes, as well as the existence of aerosol operations underway directly overhead when health symptoms or illness occur. It should also be noted that data from the Yahoo Chemtrailtrackingusa Club of aerosol operations corresponds frequently with pockets of outbreaks across the nation.
