

Israeli 9/11 Hijacker Believed Planes Were Being Landed By Remote Control

The Flight 11 hijacker was not Atta. Listen to this [distinct Israeli voice](#):

"We have **some planes**. Just stay quiet and you'll be okay. We are **returning to the airport**."

Seconds later: "Nobody move. Everything will be okay. If you try to make any moves, you'll endanger yourself and the airplane. Just stay quiet."

Ten minutes after that: "Nobody move please. **We are going back to the airport**. Dont try to make any stupid moves."

The hijacker speaks as if he is facing the passengers and threatening them with a weapon, telling them not to make stupid moves. Who is flying the plane?

This man thinks that several airplanes are being "landed." This is exactly what [neocon Zakheim's remote control gadget](#) is supposed to do with hijacked airplanes: land them safely against the hijackers' will.

The Israeli hijacker may be counter-terror agent/passenger Daniel Lewin or another Israeli who [snuck on board](#) with a forged/stolen Arab ID.

He probably did not know that [Israeli "art students" \(signal & demolition experts\)](#) on the ground were steering the planes into buildings.

Several Israelis have confirmed that the hijacker's voice is Israeli. The official claim that it is the Egyptian Atta is false. Egyptians who learn English in high school like Atta would have a specific accent and a lively flow (with added vowels like Italian). Also, Atta cannot have a German/Yiddish "r" sound. The hijacker does.

The Hijacker of Flight 11 was an Israeli who believed that he was being landed safely. He was watching the frightened passengers and telling them to "please" calm down.

For the glory of Israel. If not Lewin, another Israeli, or an Israeli art student's voice from the ground.

After the landing, he would escape prosecution as usual. The [Israeli security company ICTS](#) would swear that he was not a hijacker.

The hijacker is an Israeli, I heard it so many times. I have no doubt about it. Not an Arab, an Israeli. Positive.
