12/26/04 05:55 AM **Israeli 9/11 Hijacker Believed Planes Were Being Landed By Remote Control** [Post [293215300](#)]

The Flight 11 hijacker was not Atta. Listen to this [distinct Israeli voice](#):

"We have **some planes**. Just stay quiet and you'll be okay. We are **returning to the airport**."

Seconds later: "Nobody move. Everything will be okay. If you try to make any moves, you'll endanger yourself and the airplane. Just stay quiet."

Ten minutes after that: "Nobody move please. **We are going back to the airport**. Dont try to make any stupid moves."

The hijacker speaks as if he is facing the passengers and threatening them with a weapon, telling them not to make stupid moves. Who is flying the plane?

This man thinks that several airplanes are being "landed." This is exactly what [neocon Zakheim's remote control gadget](#) is supposed to do with hijacked airplanes: land them safely against the hijackers' will.

The Israeli hijacker may be counter-terror agent/passenger [Daniel Lewin](#) or another Israeli who [snuck on board](#) with a forged/stolen Arab ID.

He probably did not know that [Israeli "art students" \(signal & demolition experts\)](#) on the ground were steering the planes into buildings.

Several Israelis have confirmed that the hijacker's voice is Israeli. The official claim that it is the Egyptian Atta is false. Egyptians who learn English in high school like Atta would have a specific accent and a lively flow (with added vowels like Italian). Also, Atta cannot have a German/Yiddish "r" sound. The hijacker does.

The Hijacker of Flight 11 was an Israeli who believed that he was being landed safely. He was watching the frightened passengers and telling them to "please" calm down.

For the glory of Israel. If not Lewin, another Israeli, or an Israeli art student's voice from the ground.

After the landing, he would escape prosecution as usual. The [Israeli security company ICTS](#) would swear that he was not a hijacker.

The hijacker is an Israeli, I heard it so many times. I have no doubt about it. Not an Arab, an Israeli. Positive.

The real story on Mossad agent Alona Avraham

Alona Avraham - Mossad

The media record says she was an engineer for Applied Materials. [According to the Jerusalem Post she came to the US to visit relatives for the holidays in LA](#), but first stopping off in Boston for a few days.

She comes from Ashod, and [her siblings are all regular full time IDF officers](#). There's not much out there in the press, strange in itself since she was only one out of two Israelis that died that day.

That's the media version. The truth is she was an unwed mother living in the Boston area for some time, and when she flew to LA, she left her 4 year old son in Boston. Something that doesn't make sense if she was visiting relatives for the holidays.

I have little doubt she was part of the hijacking team. [Source](#)

Well we know for sure that it doesn't contain any Egyptian accent at all, plus the fact of the matter is that Atta's own father said that his son was not involved but that it was a setup by the Mossad.

I believe these planes really were landed and the people were taken off and killed with fentanyl gas. I believe the people who landed the planes with hostages on board had several remote fly 757 and 767s ready. I do not think the remote control piece is key in the landing. You could do an old fashioned hijack and tell the pilot to land. They had control of the radar and the tracking beacons were off. So land the 4 jets with people and replace them in the skies with 757s that were airborne during the military/terror drills.

Maybe a few planes had hijackers but they are not really necessary. What you could do with anyone on the plane is "kill" them and they are now free to commit future heinous crimes without being traced. That is what I believe is the fate of Daniel Lewin. He is alive working on the next 911 attack.

In the scenarios I describe above you do not need access to the hijack flights before hand, you do not need any on board hijackers and there fore you have ZERO failure rate. That is why I like my version. Just call the pilots of flights 77, 11, etc and say " This is NORAD turn off your transponders and land at the following secure gate of so and so airport."

This is assuming there were any hijackers at all. We have no real evidence that any plane was hijacked on 9/11 other than phone calls that may or may not have taken place aboard the planes.

I like your version too. I think that whatever was the surest way of getting the job done would have been the way that was chosen. After all the Patriot Act was already written and ready to be signed and the kid Bush was ready to be a "war president" and kill a lot of people. I believe they have been planning 9/11 since the day the FBI/CIA failed to take a Tower down in '93. They waited so long because they wanted to make sure they did it right next time.
