

## **ANTI-IRANIAN MILITARY ACTIONS TO LAST TWO-THREE DAYS**

If the diplomats fail to talk over Iran to give up its nuclear program, the country will be attacked within the coming year. The Israeli mass media sources informed about this, referring to Tomas McInneray, retired general of US Armed Forces.

General McInneray stated that the Anti-Iranian military action will last for two-three days. In the course of the military action the the US Navy and US Armed Forces will destroy about 1500 targets. Moreover, the special detachments should kill or arrest the Iranian authorities.

Besides, he said that the American should annihilate the Iranian Navy to prevent the Iranian military ships block the Persian Gulf.

General McInneray is sure that in the beginning of the attack about six dozen of fighters and "Steals" bombers will attack the main objects. Then, about 400 military planes will begin the attack. At the same time 150 special planes will secure successful implementation of the operation.

The American military ships and submarines will carry about 500 rockets to hit the Iranian targets. General McInneray expressed hope that the American special forces will manage to get the necessary information. He added that annihilation of 20-25% of the Iranian Armed Forces will be enough to deprive the current Iranian authorities of their power. General McInneray isn't sure that Israel will be able to attack Iran independently.
