[Iranians Produce Holocaust Cartoons](#)

Some Muslims actually believe that if the Jews can insult the holiest prophet of the Muslims, then the Muslims can insult the holiest icon of the Jews, the Holocaust. The Holocaust is a multi-billion dollar annual industry based on the fraudulent and historically inaccurate assertion that the Germans killed six million Jews during the Second World War. As pointed out by one Revisionist scholar, the Jewish world population changed little from before and after the war, remaining fairly stable at close to 16 million. Also the five million Jews currently in Israel did not appear out of thin air. The Holocaust is an easily disproved piece of war propaganda, yet the power of the Jews, the Jewish controlled mass media and Jewish controlled politicians have given the Holocaust a “sacred cow” status.

The long-awaited Iranian Holocaust cartoon contest is producing some impressive results. According to a [recent news article](#), “U.N. Secretary of State Kofi Annan, visiting Iran Saturday, raised concerns with officials over an exhibition of cartoons about the Holocaust that opened in response to Muslim outrage over the Prophet Muhammad caricatures. Annan brought up the exhibit in talks with Foreign Minister Manouchehr Mottaki...”

The [same article](#) continues “The Holocaust cartoon exhibit opened last month at Tehran’s Caricature House, with 204 entries from Iran and abroad. The cartoons were submitted after the exhibit’s co-sponsor, the Hamshahri newspaper, said it wanted to test the West’s tolerance for drawings about the Nazi killing of 6 million Jews in World War II. The entries on display came from nations including United States, Indonesia and Turkey... The exhibit was a response to the prophet drawings published by the Danish newspaper Jyllands-Posten last year.”

The Jews are so terrified that the cartoons in the Iranian contest will be posted to the Internet and become readily available to the public that Israel News Agency has launched what is called an SEO attack, or search engine optimization attack, designed to draw anyone using Google or any other search engine to look for the cartoons away from the actual Iranian site and onto an Israeli propaganda site attacking the cartoons. It is uncertain how well this is working; I did find several of the cartoons reproduced on the Net, but all on pro-Jew sites with rubbishy Jewish commentary.

The Muslims just can’t seem to get it into their heads that Jews are special people whom the rest of the human race is obligated to bow down to. This is why the United States has to go into their countries and bomb and kill them all and take all their oil. Right?
