White slave trade now earns US\$1 billion annually in Israel.

A REPORT carried by the "News Israel" Hebrew website on the Internet on Wednesday, March 23, 2005 says that the total annual profits garnered from white slavery in Israel have reached the US\$1 billion mark.

The website reported that the white slave trade has become a real industry in Israel.

The website noted that the figures on the industry were given today to the Speaker of the Knesset Ruby Rivlin by deputy **Zahafa Galoun** of the Parliamentary Investigations Committee.

The website reported that compiling the report took a period of four years during which the conditions of the white slave trade in Israel were observed. It became evident that the number of prostitutes who arrived in Israel rose from 3,000 to 5,000 women. The price of a woman in the prostitute market is between \$8,000 and \$10,000.

According to the report, the prostitute works from 14 to 18 hours each week but receives only 20 shekels of the 120 shekels paid to the "owner of the lady." The report said that although there had been minor improvement in the fight against the white slave trade, and in spite of the massive efforts that the police and Zionist courts have made, the mafia running the trade continues to do so on a large scale and effectively.

The report urged Zionist courts to pass rulings that are more powerful and severe against the traffickers in white slaves, stiffening penalties for the masters and bosses in the trade.

Eric Mueller writes:

THE Arabic press watches what comes out of Israel in Hebrew as well as English.

Although the Zionists are quite good at presenting what they want the world to know about them in English, sometimes the more awkward information doesn't make it out of Hebrew.

So, in case this latest landmark in Jewish commercial success is not properly noted in *Forbes* or *The Wall Street Journal*, I'm providing my translation of the Arabic version by of the Hebrew report.

Eric Plano, Texas, is our website's resident Arabic expert

This suggestion is exactly the same one offered by the latest report from the US State Department on the condition of women in the Zionist entity. That report said that tougher laws needed to be enacted after Israel had become the biggest center for the export of prostitutes in the world.

It is worthy of mention that the Zionist police force grants official and legal work permits to many brothels in Israel. It has become known that top officials in the Zionist police agencies own many of them. ■
