Translated from Russian by A.I. Kostina

(Figures: 107; Tables: 48; physical and chemical equations: 315)

The new axiomatic of natural sciences is given in the book; on its basis, quantum physics and quantum chemistry have been returned to the classical way of development. The first steps are made on this way, which have led to discovery of the structure of the photon, the electron, and the principle of the formation of the atomic nuclei, the atoms and the molecules.

The Planck's Law of radiation of perfect blackbody is given on the basis of classical concepts, and the connection of quantum phenomena with the laws of classical physics is proved.

The application of the new theoretical results to the solution of practical energy tasks on the basis of plasma electrolysis of water is shown. Due to this electrolysis, additional heat energy generated as well as hydrogen and oxygen are the energy containing gases. Cold Nuclear Transmutation of the atomic nuclei of alkaline metals and the atomic nuclei of the cathode material takes place during plasma electrolysis of water.

The book is intended for physicists, chemists and other specialists who are seeking the new directions for understanding the foundations of the micro world and the new energy sources.

Best Regards,

Philipp Kanarev

CONTENTS

Foreword

Introduction

1. Exact Sciences at the Border of Millennia

2. Brief Analysis of the State of Quantum Physics

- 2.1. General
- 2.2. The Main Causes of Crisis and the First Steps of Way out

3. Axiomatic of Exact Sciences

- 3.1. Brief Analysis of the State of the Problem
- 3.2. Definition of the Notions, which Characterize Primary Elements of the Universe
- 3.3. Axioms of Natural Science
- 3.4. Postulates of Natural Science
- 3.5. Discussion of Results

4. Axiom of Space-Matter-Time Unity

5. Photon Model Search

- 5.1. Direction of Search
- 5.2. Photon is a Carrier of Energy and Information
- 5.3. Photon Model Structure
- 5.4. Derivation of the Mathematical Models Describing Behaviour of the Photon
- 5.5. Kinematics of the Photon
- 5.6. On the Way of Electrodynamics of the Photon
- 5.7. Analysis of Experimental Results
- 5.8. Analysis of Space of Contortion and the Black Hole Formation
- 5.9. Analysis of Michelson-Morley Experiments
- 5.10. Doppler Effect.
 - 5.10.1. General
 - 5.10.2. The Relativistic Interpretation of the Doppler Effect
 - 5.10.3. Classical Interpretation of the Doppler Effect
- 5.11. Is the Universe Being Expanded?
- 5.12. Brief Conclusion

6. Model of the Electron

- 6.1. General Data on Electron
- 6.2. Orbital Motion of the Electron in the atom
- 6.3. The model of electron is as a ring
- 6.4. Toroidal Model of the Electron

7. The Law of the Radiation of the Perfect Blackbody is the Law of Classical Physics

- 7.1. General .
- 7.2. Theoretic part
- 7.3. Classical Derivation of the Law of the Radiation of the Perfect Blackbody

8. Theory of Spectra of the Atoms and the Ions

- 8.1. Spin of the Photon and the Electron
- 8.2. Calculation of the Spectrum of Hydrogen Atom
- 8.3. Calculation of the Spectra of Hydrogen-like Atoms
- 8.4. Calculation of the Spectrum of Helium Atom
- 8.5. Calculation of the Spectrum of Lithium Atom
- 8.6. Calculation of the Spectrum of Beryllium Atom
- 8.7. Calculation of the Spectrum of the First Boron Atom
- 8.8. Spectra of Valence Electrons of Some Atoms of Chemical Elements
- 8.9. The New Interpretation of Photo effect

9. Models of Atomic Nuclei of Chemical Elements

- 9.1. General Data on Atomic Nuclei
- 9.2. On Model of the Proton
- 9.3. On Model of the Neutron
- [9.4. Diagrams of Nuclei of Hydrogen Atom](#)
- 9.5. Diagrams of Nuclei of Helium Atom
- 9.6. Structure of Nucleus of Lithium Atom
- 9.7. Structure of Nucleus of Beryllium Atom
- [9.8. Diagram of Nucleus of Boron Atom](#)
- 9.9. Diagrams of Nucleus of Carbon Atom
- 9.10. Structure of Nucleus of Nitrogen Atom
- 9.11. Structure of Nucleus of Oxygen Atom
- 9.12. Diagram of Nucleus of Fluorine Atom
- 9.13. Diagram of Nucleus of Neon Atom
- [9.14. Diagram of Nucleus of Sodium Atom](#)
- 9.15. Diagram of Nucleus of Magnesium Atom
- 9.16. Structure of Nucleus of Aluminium Atom
- 9.17. Structure of Nucleus of Silicon Atom
- 9.18. Structure of Nucleus of Phosphorus Atom
- 9.19. Structure of Nucleus of Sculpture Atom
- 9.20. Structure of Nucleus of Chlorine Atom
- 9.21. Structure of Nucleus of Argon Atom
- 9.22. Structure of Nucleus of Potassium Atom
- 9.23. Structure of Nucleus of Calcium Atom
- 9.24. Structure of Nucleus of Scandium Atom
- [9.25. Structure of Nucleus of Titanium Atom](#)
- 9.26. Structure of Nucleus of Vanadium Atom
- 9.27. Structure of Nucleus of Chromium Atom
- 9.28. Structure of Nucleus of Manganese Atom
- 9.29. Structure of Nucleus of Iron Atom
- 9.30. Structure of Nucleus of Cobalt Atom
- 9.31. Structure of Nucleus of Nickel Atom
- 9.32. Structure of Nucleus of Copper Atom
- 9.32. Brief Conclusions

10. Models of Atoms and Molecules

- 10.1. General
- 10.2. Structure of Hydrogen Atom
- [10.3. Models of Hydrogen Molecule](#)
- 10.4. Structure of Helium Nucleus and Atom
- 10.5. Structure of Lithium Atom
- [10.6. Structure of Beryllium Atom](#)
- 10.7. Structure of Boron Atom
- 10.8. Structure of Carbon Atom
- 10.9. Structure of Nitrogen Atom
- 10.10. Structure of Oxygen Nucleus and Atom
- [10.11. Structure of Water Molecule](#)
- 10.12. Structure of Ammonia Molecule
- [10.13. Energy Balance of Fusion Process of Molecules of Oxygen, Hydrogen, and Water](#)
- 10.14. Energetic of Chemical Bonds of the Ozone Molecule

11. New Theory of Electrolysis of Water

- 11.1. Contradictions of Existing Theory of Electrolysis of Water
- [11.2. Models of Water Molecules and its Ions](#)
- [11.3. New Theory of low voltage Process of Water Electrolysis](#)
- [11.4. Power of Chemical Bonds of Water Molecule](#)
- 11.5. Clusters and their Binding Energies

12. Plasma Electrolysis of Water

12.1. Plasma Electrolytic Process

12.1.1. Physical Models of the Process

12.1.2. Chemical Model of the Process

[12.2. Diagrams of Models of Plasma Electrolytic Reactors](#)

12.3. Laws of Change of Voltage, Current and Power in Power Supply Circuit of Plasma Electrolytic Process

12.4. Protocol of Control Experiments

[12.5. Results of Fine Plasma Experiments](#)

12.6. Plasma Electrolytic Reactor as Gas Generator

[13. Cold Nuclear Fusion during Electrolysis of Water](#)

[14. Water is a Source of Electric Energy](#)

14.1. Common

14.2. Fuel Cell Efficacy

[15. Law of Conservation of Moment of Momentum](#)

[Conclusion](#)
