SEALING UP THE TRUTH

In a legal maneuver certain to deal a damaging blow to any serious independent investigation into exactly what happened at Columbine High School on April 20, Jefferson County District Court Judge Henry Nieto on 5/28/99 refused to release autopsy reports on victims of the Columbine High School shootings, saying "the community" would suffer substantial harm if the

[Klearinghouse](#)

reports were released!

Though the action was supposedly taken at the request of victims' families, some family members wept openly as Nieto announced his decision; hardly the response one would expect from those who had just achieved their objective. Also audible were the sounds of outrage and dismay from the members of the press with the integrity to request access to the documents.

Such an action is reminiscent of the kind of kangaroo court tactics enacted during the onslaught of the THIRD REICH, and all Americans -- especially those diehard remnants of the press who actually believe in it's "freedom" -- had best take heed to the import of this and a spate of similarly dismaying recent court actions: in particular the jailing of independent researchers /investigators in the TWA Flight 800 coverup and the Oklahoma City bombing coverup.

It seems ludicrous to suggest that family members of those murdered could in ANY WAY be harmed by the most thorough investigation possible into the tragedy. This move is clearly designed to make any such inquiries into exactly what killed which people much more difficult. What is so important to keep in mind is that this IS EXACTLY THE KIND OF HARD EVIDENCE WHICH WOULD PROVE THE EXISTENCE OF OTHER GUNMEN ONCE AND FOR ALL!!!!

Attorneys for The Denver Post AND The Rocky Mountain News haven't yet decided whether to appeal or not. The two newspapers were seeking release of the autopsy reports after the reports had been withheld from over 19 news organizations.

The timing of this court decision also seems related to other legal actions initiated yesterday, May 27, by attorney Geoffrey Fieger on behalf of the parents of Isiah Shoels, one of the students murdered in the April 20 attack. Fieger let it be known that his client and he believe that information regarding other assailants is being withheld and disregarded. NewsHawk has verified through personal contact that Michael Shoels has strong suspicions that there were other gunmen involved in the Columbine massacre; that there was and IS a conspiracy regarding the entire matter.

BIZARRE TIES -- TRENCHCOATERS/FBI

The following is reprinted from the Denver Rocky Mountain News.

FBI BACKS AGENT WITH CLOSE TIES TO COLUMBINE VIOLENT VIDEO MADE BY SON WHEN HE ATTENDED SCHOOL NOT A CONFLICT OF INTEREST, AGENCY SAYS

Officials with the FBI said Friday their lead investigator in the Columbine High tragedy will stay in his post despite close ties to the school.

Dwayne Fuselier's son graduated from Columbine in 1997 and was one of the students who produced a videotape more than two years ago that shows TRENCHCOAT-WEARING STUDENTS ARMED WITH WEAPONS MOVING THROUGH THE SCHOOL'S HALLS.

The film ends with four students walking away from the school as it EXPLODES IN FLAMES.

"I have complete faith and confidence in Dwayne Fuselier," said Keith DeVincentis, acting special agent in charge of the FBI's Denver office.

In addition, FBI spokesman Gary Gomez said there was "absolutely no discussion" of reassigning Fuselier, 51, a PSYCHOLOGIST, in the wake of the disclosures in Friday's Denver Rocky Mountain News.

"There is no conflict of interest," Gomez said.

The tape, made in 1997, has no known connection to either Eric Harris or Dylan Klebold, the two students who donned trench coats and attacked Columbine with guns and bombs during the lunch hour April 20. Before they committed suicide, Harris and Klebold killed 12 students and a teacher and wounded 23 others.

Fuselier is one of three commanders leading the investigation, along with sheriff's Lt. John Kiekbusch and Capt. Dan Harris. The sheriff's department had taken no position on Fuselier's continuing role in the investigation, deputy Troy Gardalen said.

Sheriff John Stone has not spoken publicly about any aspect of the investigation since Tuesday. Officials from the U.S. Attorney's office also would not discuss the situation.

But Z.G. Standing Bear, a criminal justice professor at Colorado State University and a former criminal investigator for the U.S. Army, said federal officials should avoid the perception of a conflict of interest.

In this case, he said, that means reassigning Fuselier, if for no other reason than to protect the agent. "That can be potentially dangerous to the agent conducting the inquiry," Standing Bear said.

If he were running the investigation, Standing Bear said, he'd want agents with "no connection whatsoever" to the case.

"It's just good law enforcement business," he said. "They expect you to be objective. And you may be 100 percent objective, but if there's a perception of inobjectivity, then it's unfair to the individual and the agents conducting the investigation."

The question of Fuselier's role was one of several developments in the investigation Friday:

FBI officials took exception with the perception they said was created by some news reports that agents were conducting wide-scale polygraph examinations of people who were close to Harris or Klebold. DeVincentis said the FBI so far has conducted only one lie-detector test.

"I want it to be clear that we're not running around Jefferson County giving polygraphs to kids that were associated with Klebold and Harris, because that's simply not true," he said. Gardalen said the sheriff's department is conducting an unspecified number of lie-detector tests with the assistance of FBI agents.

Investigators spent much of the day reviewing a frame-by-frame breakdown of a videotape from the cafeteria at Columbine. The tape shows some of the mayhem in the school cafeteria, including Harris and Klebold opening fire on a large propane bomb that didn't explode.

Given what is now known to have occurred April 20, THE 1997 VIDEO TAPE DEPICTS AN EERIE SCENE. Fuselier's son, who is attending college out of state, could not be reached for comment. Another student who worked on the film REFUSED TO TALK ABOUT IT.

"ROGUE" AGENCIES/SPOOKLAND

It seems to be at least a possibility there could have been behind-the-scenes connections between some members of the "Trenchcoat Mafia" and rogue FBI and BATF (Bureau of Alcohol, Tobacco and Firearms) elements, as well as THEIR bosses in NWO-oriented NSA and CIA factions.

The BATF has, by many accounts and a good deal of substantial evidence, literally gone rogue and is running wild: ever since they were directly involved in mass-murdering over 80 people at Waco and then many more in the Oklahoma City bombing.

There of course would have to be something--some group or other--behind THEM however. They're nothing but a goon squad and probably quite easy to take control of. They're like soldiers of fortune, and I pick up very eerie overtones of this kind of general mentality from reading what is allegedly Eric Harris's website ravings. It's worth seriously considering that certain Trenchcoat Mafia members as well as Eric AND Wayne may have been tied to (rogue) BATF and FBI elements. This would appear to fit well into the low-tech, "blow it all to shit" approach found in the website documents AND in BATF operations like Waco and Oklahoma City. Basically, "terrorist"-type tactics.

And now the potential motivation for the participation of the FBI in any coverup of facts regarding the Columbine massacre becomes more clear.

Dwayne Fuselier in fact is an FBI "expert" on terrorist and hostage situations. He wrote a detailed paper for the FBI in 1990 which discusses techniques for dealing with perpetrators of such incidents; the impact of the mentality and state of mind of the perpetrators in these incidents, and THE USE OF YOUNG, manipulated individuals in implementing such incidents!

There seems some possibility that Wayne Harris may have been more than merely negligent as Eric's father. It is a verified fact that Wayne Harris was involved in the detonation of AT LEAST ONE explosive device with his son Eric. Wayne Harris admitted that he was DIRECTLY involved in this episode.

Wayne stated at the time that he had found the explosive device at his home, in fact a particularly large and destructive one according to him, and not knowing how to deactivate it, he and Eric took it to a remote location and detonated it. Their activities were observed and reported.

To be blunt Wayne Harris's "explanation" of his involvement smells a lot like the excrement of a male member of the bovine species. Additionally, any such detonation of such devices is completely illegal: ESPECIALLY SO in this case, as Eric Harris was already on probation as a result of the van break-in he and Dylan Klebold committed.

Wayne Harris's background has been tied to the both the military (Air Force)

itself AND to the top secret research arm of the intelligence/military industrial complex for his entire adult life. This guy was the epitome of a military "lifer". Already an officer and a heavily decorated pilot, Wayne was working at the Boeing Military Airplane Co. in Wichita Kansas in 1981, when Eric was born. This particular Boeing plant has virtually nothing whatever to do with making airplanes but is instead deeply involved with highly classified, black budget projects for the intelligence/military/industrial complex. In fact a lot of the kind of operations going on around Littleton.

After about 12 years of stays at various Air Force bases, lastly Plattsburgh AFB, the Harris's came to Littleton in 1996. Though outwardly it appeared Wayne's military-related career was over, in fact he took a job at FLIGHT SAFETY in Englewood, where he trained pilots to fly LARGE REFUELING AIRCRAFT. Now who the hell else flies large REFUELING CRAFT but THE MILITARY, I'd like to know?

A LOCAL CONTACT--

The View From Littleton

(The following information was compiled from several emails sent by Littleton-area resident [Linda \(Lindaea1@aol.com\)](mailto:Lindaea1@aol.com), and edited.)

Four days after the massacre Linda's teen daughter (not a student at Columbine) went to see the memorial at Clement Park. What stuck out most to her was the vast presence of armed military personnel and their vehicles. **THEY COMPLETELY SURROUNDED THE SCHOOL AND THERE WERE A NUMBER OF VERY LARGE COVERED TRUCKS PULLED UP NEXT TO THE SCHOOL. IT WAS THE MOST OUTSTANDING AND PUZZLING IMAGE** (beyond the intense sadness) of the event.

People had asked the media about this and on T.V. they showed just a handful of personnel and a small vehicle to convey the completely erroneous impression that the military presence was very minimal, just to protect the perimeter.

Linda reported that the latest LOCAL media reports say there may have been other students who KNEW of the plot: bullets are reportedly being analyzed to see if any came from guns other than the ones used by Harris and Klebold. However when one realizes in light of recent developments that the FBI is doing this analysis, the truth on the subject can be effectively considered dead and obliterated. Which is of course exactly the same fate of the security video from inside Columbine: the one the FBI assumed possession of early in the investigation and which has never been made public..

DEATH THREATS

[Linda](mailto:Lindaea1@aol.com) contacted me again on 5/24/99 with the following severely shocking news.

"I have some new info for you. Last night I spoke with a friend who had been to visit Mark Taylor at the hospital. His mother said that he has been **GETTING DEATH THREATS! SOMEONE IS THREATENING TO FINISH OFF THE INJURED STUDENTS AND THE REST OF COLUMBINE.**

Certainly could explain the HESITATION OF SOME OF THE INJURED TO TALK ABOUT WHAT THEY SAW. The police have been informed. Rumors at the school are rampant about murderers WITHIN THE STUDENT BODY."

Linda/Lindaeal@aol.com

FOUR/TWENTY

Happy Baal Day?

Another point of note is the fact that according to a number of researchers, The dates April 19/20 is sacred to the ancient (satanic) deity Baal: reports are that many of the bloodsucking weasels prominent in the worldwide covert NWO government, in addition to other grotesque practices too offensive to mention, sacrifice innocent human children to this "entity" in an annual blood-orgy of depravity and depredation. Both the mass murders at Waco and at Oklahoma City coincide with this date.

I consider it pretty much beyond the bounds of likely coincidence or even esoteric synchronicity that the term "4:20" has become so prominent over the past year or two: not ONLY among pot-puffing stone-heads such as people I might know--surfers, skateboarders, computer tweakers and other semi-fringe aggregations of young humanity: but also, simultaneously this SAME phrase has become very prominent among an entirely different sub-cultural group--the EXTREME heavy metal, goth, pro-"Aryan," headbanging shit-kickers who had put the same phrase into heavy circulation: with massively different implications.

So what's up with that? Exactly how, when or where did this phrase ever enter the stoner subculture anyway? And why would the exact same phrase be just as extensively utilized by a TOTALLY different sub-cultural group? A phrase which as a date will now remain forever indelibly linked to the indescribably horrible mass murders at Columbine High School. So every stoner or raver who continues using the phrase 4:20 is, inevitably, in his OWN mind and that of others, mentally linking with the Columbine horror and it's endless ramifications.

I have suspicions the phrase was "seeded" into both "subcultures" simultaneously...by a very devious, Machiavellian source.

WAS THE MASSACRE ITSELF A TRIGGER?

Now over a month in the past, the Columbine shooting in and of itself seems to have been a subliminal cultural "trigger" which has brought forth a truly incredible number of similar, "copycat" incidents. Though a sizable percentage of these have been shown to be hoaxes or the like, an astonishing number have involved weapons, explosive materials, detailed plans, maps, hit lists, and numbers of co-conspirators.

LOOSE THREADS

The fact that police and SWAT teams remained outside 4 hours exchanging gunfire with (only 2?) assailants is proof there were in fact a lot more than 2 shooters; that SWAT teams had been informed that there were more than two

shooters and had been ordered to stay back and hold off from any full-on intrusion for a period of time (almost 4 hours). It seems increasingly likely that FBI/BATF agents AND other trenchcoat-affiliated students involved with the mayhem inside the school needed sufficient time to "clean up their act", remove traces of their presence and get out of there.

And why did early reports claim 25 dead? Where did that number come from?

MORE DETAILS OF TALKS WITH THE WISHERS

My initial conversation with Chris Wisher, which lasted nearly 40 minutes, came about inadvertently after I called Mr. Wisher Sr. back and got Chris instead.

I told Chris that I was making the content of my conversations public.

In fact and despite this; despite another brief conversation with Chris, a couple of fairly brief conversations with Chris's father and a roughly 15 minute conversation with Mrs. Wisher on 5/19/99, they all made the point clear to me, WHILE discussing aspects of the Columbine case with me, that for the most part they were NOT interested in talking to reporters and such. In fact I told Mrs. Wisher on 5/19/99 I would post notices on the websites where my article was published requesting people NOT contact them at all and she heartily thanked me for that.

My initial conversation with Chris was extremely detailed. For whatever reason he definitely opened up to me and he told me that he felt comfortable doing so, while at the same time letting me know that he had not done so with any other reporters and that his family basically was not interested in either he or them doing much talking to the press.

So how to explain the fact that Chris talked to me for a total of nearly an hour (both conversations), his father for about 10 minutes (both conversations) and Karen Wisher for about 15 minutes? Likely because they are well aware of the discrepancies, oddities, inconsistencies and OBVIOUS BULLSHIT going on with the investigation and undoubtedly feel a need to express this to SOMEONE! Apparently I came across as non-threatening or innocuous enough to be that someone. Mrs. Wisher remains hopeful the truth will "come out" due to the great number of witnesses who saw other shooters. Sadly I myself am not so sure, and as indicated by the quote below, neither are other Littleton residents.

My conversation with Mrs. Wisher was not overly pleasant at first. She was aware that I had published my interview with Chris and she was upset MAINLY that many people had since called their house, for which I sincerely apologized. She felt that it was not in Chris's best interest to talk to anyone further. However I persisted in talking with her and drawing out her statements and views regarding statements Chris had made to me. I have reported on her responses in a published update report; and she fundamentally backed up the validity of what Chris told me AND told me that so many Columbine students know of other assailants being involved that she sees no way the truth about this could be covered up. Yet efforts to do just that, and very serious efforts, are well under way.

In my conversation with Mrs. Wisher I brought up the fact that Chris said he knew personally a girl who was coerced into changing her testimony by Sheriff's investigators, and made to say that she had only seen Harris and

Klebold. Mrs. Wisher replied: "Oh, I know the girl. She was over here right after... (the questioning). She told us all about it, but you know, this was right after the massacre...."

Mrs. Wisher then said she felt that as this incident was in the early days of the investigation, law enforcement didn't have all the facts and were therefore trying to keep things coherent and focused. However, Chris had told me in our first conversation: "I know a lot of other kids who've had the same thing (coercion/pressuring) happen to them."

In fact sheriffs had a LIST OF THREE SUSPECTS FROM THE GIT-GO and there is PROOF POSITIVE OF THIS FACT. There is also proof that more than one person was ARRESTED -- NOT questioned and released -- after the mayhem and murder subsided. Investigators have ALWAYS known there were other perpetrators and have apparently (by Mrs. Wisher's OWN statement!) ALWAYS been trying to obscure the truth and pervert justice--at the very least.

Interesting as well that Chris, like so many other witnesses from Columbine, is now under some intensive "counseling."

Exactly as I predicted in my report [The Rocky Mountain Horror Show](#).

Chris Wisher is the witness to some of the mayhem at Columbine, not his mother. She and her husband are obviously very interested in protecting their son's mental health and well being, and said so repeatedly.

I stated that my initial talk with Chris came about inadvertently; my very first call to the Wisher house reached Chris's father, who had already mentioned that he did not think Chris would be interested in talking with me. I called back to ask him one further question and I got Chris, who in fact was quite willing to converse about what he witnessed at Columbine. Though he indicated his parents were not in favor of him discussing the events with anyone, obviously he felt differently.

Apparently Chris's parents do not want to make any waves about the course of the investigation into the Columbine massacre. At least in my FIRST talk with Chris, that was not the case with him.

Chris made the statements I attributed to him, after I told him from the very first that I was a writer who was going to publish what I turned up. Which I did.

When I called the Wisher household to inform them of the presence of my article on the Web I got Mr. Wisher Sr. I gave him the pertinent info on where to locate the article, and briefly discussed certain things with him. Mr. Wisher told me that he didn't believe the police had "closed the book" on the case and were unwilling to "tip their hand" regarding particular suspicions they may have of other participants, and also that he was aware his son and many other students believed more than the 2 assailants were definitely involved in the assault.

I brought up the fact that Chris and others made the contention that witnesses were being coerced by law enforcement to make their testimony conform to the "2 gunmen" fable and said I felt that could not be explained by what he (Mr. Wisher) had just postulated: he AGREED.

My next conversation was with Chris again. I asked him if the fact that I had published the article was a problem for him and he said no; I also asked if it

had been a problem for his parents and he indicated that was not the case either.

I questioned him on the information he relayed that a person he knew personally and OTHERS witnessed a group of 7-8 individuals in trenchcoats with weapons other than Harris and Klebold, in a different part of the school simultaneous to Harris and Klebold firing weapons elsewhere. He reverified that statement. I asked whether his friend knew if some or all of these were students. Chris said that at least some were students.

I also reverified what he himself said he witnessed outside the school where he observed two other individuals obviously connected to the assault at the SAME time as he heard shots from inside the building. Chris then told me that he had heard recently that Harris HAD taken off his coat and therefore the person throwing explosives in white T-shirt could have been Harris, Chris felt. The other individual Chris witnessed outside in a trenchcoat with a shotgun Chris maintained was neither Harris or Klebold.

I was on Seattle talk show host Mike Webb's radio show on 5/20/99. Mr. Webb in fact had contacted Chris Wisner directly and can verify through HIS talk with Chris not only that I have spoken with Chris Wisner but that Chris did in fact relay the information I have attributed to him.

What's MOST interesting however is that Webb reported on the air that in HIS conversation with Chris, Chris stated how AFTER my interview with Chris was published, Chris was REQUESTIONED and PRESSURED by investigators, who then found it worthwhile for some reason to make a substantial effort to "help" Chris "understand how it may have only been Harris and Klebold" that he had seen at Columbine!

Incredible, disheartening, so predictable and infuriating that these guys would seek to coerce the very person who had blown the whistle on their shenanigans!

Unfortunately I was NOT aware at the time of my conversation with Mrs. Wisner that HER SON had just been recontacted by investigators and subjected to THE SAME TACTICS! I doubt if she was aware of this either.

Why are the cops trying to get students to change what they're saying about what happened? She didn't have an answer to that, but I do.

Because if you put together the fact that there undeniably WERE so many other people involved, plus things like how other perpetrators could GET AWAY; and get AWAY WITH IT?!, you can only come up with one logical conclusion.

That the at least SOME of the other people involved were NOT even students, but people connected to the covert (of COURSE!) government.

MORE INFO ON MAJOR CIA LINKS TO DENVER AND DENVER UNIVERSITY

From: [David Martin \(dcdave1@erols.com\)](mailto:dcdave1@erols.com)

Yale history professor, Robin Winks, in his book, *Cloak and Gown, Scholars in the Secret War, 1939-1961*, writes as follows:

"In the fall of 1942 R&A (Research and Analysis of the CIA precursor OSS) began to contract out research projects to specialized institutes, first at Stanford and the University of California at Berkeley, and soon after to the UNIVERSITY OF DENVER, Columbia, Princeton, and Yale. No one at the universities appears to have protested these ties, and university presidents and professors courted contractors and consultantships, at times going well beyond the supplying of analysis and information, as when Cal Tech manufactured rockets for the army." (p. 79)

My friend wondered aloud how far beyond analysis and information the University of Denver might have gone. If the CIA is heavily into mind control and the University of Denver is, in effect, a CIA front institution (doesn't this minor university look completely out of place in the list above?), what's wrong with putting two and two together?

The University of Denver, curiously, also has very nearly the LARGEST PERCENTAGE OF FOREIGN STUDENTS of any college in the country. The CIA recruits heavily among foreign students in the U.S., as they do among Rhodes Scholars, and for the same reason. They regard them as future leaders in their respective countries.

The two known Littleton, Colorado, shooters, in addition to being close friends, had broken into a car together and as court-ordered punishment, had been assigned to counseling. The news reported that they had been released early from the counseling obligation because they had been so cooperative. Sort of reminds one of the super-soldier, Timothy McVeigh, doesn't it? We all know how corrupt our court system is. I'd say that particular counseling program needs looking into.

Denver, I understand, is the center for federal government operations of all kinds for the entire mountain and plains area. It was not by accident that it was picked as a good, safe place to conduct the Oklahoma City bombing trials of McVeigh and Nichols.

At least one major news organ has begun to take the reports of more gunmen at Columbine High School seriously enough to try to shoot them down. On Friday, May 21, NBC Nightly News announced that surveillance video at the school showed that there were only two THIS CAME AMID REPORTS FROM WITNESSES, said NBC, THAT OTHER SHOOTERS HAD BEEN SEEN!

When our mainstream press, like our esteemed president, feels it necessary to pointedly deny something, you can be pretty confident that it is true.

ATLANTA!

The Drugs & Plattsburgh Combo Plate

Information has come to me that the shooter in the Atlanta school shooting incident on 5/20/99 has ties to the area near Plattsburgh Air Force Base in N.Y.

In addition the boy was under the influence of the psychiatric drug Ritalin, a drug in the meth family which has effects similar to cocaine--used on young children no less.

What must be pointed out here, is that this ever-increasing "pathologizing" of

perfectly normal kids and the resultant counseling/psych-drug therapy combo they're subjected to is a big money-maker for almost everyone involved. For the counselors; for the school district, which gets extra funding for every "special education" youngster on their rolls; money for the pharmacists, and ESPECIALLY for the pharmaceutical companies themselves.

What's MOST outrageous is that parents who balk at turning their children into guinea pigs for mood-altering drugs and whatever else therapists decree can find their children snatched from them by Orwellian social workers of the BRAVE NEW WORLD ORDER. It's happening with increasing frequency all over the country!

In fact the multinational pharmaceutical corporations who profit most heavily from all this, in particular Ciba/Geigy, trace their lineage directly back to the grand-daddy of proto-fascist multinational, monopolistic juggernaut corporations; I.G. Farben. You know, the boys with the presence of mind to see the potential for major profit in Hitler and Company's race-based mass enslavement/murder operation; the ones who worked a deal with NAZI big boys to turn concentration camps into factories, where you literally worked till you dropped. For good that is.

It does NOT take a brain surgeon to realize that neither the Nazi vermin nor their business partners who ran I.G. Farben vanished into thin air after WW2; nor did their most cherished agendas. Hordes of these banes upon humanity, AND their corporate compadres in butchery, genocide, slavery and thuggery AND their agendas came. Putting a huge percentage of America's youth on mind and soul destroying psychiatric drugs CERTAINLY fits into such agendas quite well indeed.

The shooting in Atlanta was a weak, rushed programming job. The programming literally came apart. And, the perpetrator didn't commit suicide. Though the Georgia shooter did put the gun to his mouth subsequent to the shooting, he was talked out of committing suicide by an assistant principal named Cecil Brinkley. which is the reason that within only 2 days the story literally vanished from sight. Somebody sure doesn't want anybody asking THAT guy too much. By the way, he reportedly had absolutely no memory of why he did what he did or even that he actually did it. Total or near-total memory blackout.

As well, this unfortunate boy had definite and distinct ties to the PLATTSBURGH AREA, near the AFB; which conducts many highly classified covert research (mind control and other types) operations. His family has spent much vacation time in the vicinity!

Information from various, unrelated sources indicates Plattsburgh AFB, though now supposedly "closed," was and still is a serious hotbed of black project research, covert operations and HIGHLY classified, ultra-advanced scientific research. We have proof positive of POWERFUL EM/RF technologies being operating underground there; both from EM/RF readings taken on the surface at the base, and from Doppler radar images which have shown a blatant, circular EM/RF formation right over Plattsburgh for months and months on end--still continuing as of right now! This radar signature is present regardless of what type of weather system is affecting the area.

I have received further corroboration regarding the existence of HIGHLY ADVANCED mind control and other exotic research projects being CURRENTLY operated at this SUPPOSEDLY "closed" Air Force Base at Plattsburgh. Reports say Plattsburgh AFB is one of the primary locations for the current versions of both the PHOENIX PROJECT--(Montauk/ mass mind-

reality control) and the MONARCH PROJECT--("Montauk Boys/Girls": highly controlled "sleeper" agents procured/ programmed from childhood; available for activation through a variety of trigger mechanisms to perform numerous and (generally) horrific tasks for their controllers in covert government intelligence/military agencies).

Somebody needs to head out to Littleton and see what's up in the twilight zone. And after that, somebody needs to tromp on up to Plattsburgh too.
