At the end of the investigation conducted by the Israeli army Chief of Staff it was determined that the attack was carried out "highly professionally" and "with great accuracy in injury." Thus is the position of the Israeli military and their policy of killing during the occupation of Palestine.

As a result of their "highly crafted" attacks, Palestinian children are lying in the hospital. One such girl is in a Jerusalem hospital with "injuries resulting from an Israeli attack." Her breathing is by machine and is in complete paralysis, according to medical sources. A month ago she lost her mother, brother and grandmother. The girl was transferred from a Gaza hospital to Jerusalem at the bequest of doctors due to the severity of her injuries. It is predicted she will be in a hospital bed for months, but perhaps, just perhaps, she will breathe on her own in the end.

According to doctors, the girl will more than likely be hospitalized for six months, alongside her father who is a prisoner in the hospital. The little boy of the family is still in Gaza, alone, celebrating his sixth birthday.

Israeli air war planes assassinated their "target," Mohammad Al Dahdouh from Islamic Jihad, and destroyed a family in the process. This, they describe, as "great accuracy."

Professional pilots in the Israeli Air Force has made a beautiful little girl handicapped and orphaned.

The Israeli Commander of the General Staff praised its soldiers' murderers when they killed four from the same family. That family was inside its home, believing the walls of the house provided them with security, but there is no security against Israeli missiles. But still the Israeli artillery weapons are praised by their operators and commanders as "efficient and accurate."

Even two years ago a family lost four children at the same time as their trees in the northern Gaza Strip.

Do not forget that this professional army killed 705 children since the beginning of the Intifada without having to answer to anyone. Remember the little girl gunned down with more than 20 bullets into her small body while walking to school in Rafah. The Israeli soldiers occupying the southern Gaza Strip city and camp claimed her backpack of school books was a bomb.

The Palestinian people report feeling "mocked" as the victims are left victimized by a false Israeli "investigation" of the Gaza beach massacre, killing the Ghalia family. The killings on are on tape, as is the hysteria of the remaining daughter, and so telling that the United States implored Al Jazeera not to air them in order to cloud reality.

In another recent hit by Israeli aircraft (and supported by sophisticated information intelligence) bombed a Volkswagen on Salah Aldin Street near Durah Hospital in eastern Gaza City at 10:00 pm, they killed 10 Palestinians, including two children. The severity of the blast destroyed neighboring homes, while he lost his daughter and nephew

Victime Ashraf Al Maghrabi's brother, Ayman, said Sunday with all due cynicism, "Israeli pilots could see everything through the perspectives of proven advanced aircraft. They can see the children playing, they can see the people shopping, they can see Palestinians living in Gaza City. Their technology allows them to see everything, which makes their work in killing innocents so easy."
