Issue 181: Vaccination Injuries Conspiracy Uncovered

Tonight at 22.30 local time (in about 1 hour), you can watch a documentary on Norwegian TV2 about Norwegian Vaccine Conspiracy uncovered.

<http://pub.tv2.no/TV2/magasiner/dokument2/article764204.ece>

For the first time ever Norwegian authorities admit that they knew vaccines were dangerous. This documentary is only one of several programs on TV2 that follows the story of Norwegian vaccination injuries conspiracy.

Health minister Torbjørn Mork stopped production of the Norwegian vaccines October 1983 cause he was afraid vaccines were causing injuries. But nobody informed doctors and nurses about it. Instead, doctors and nurses were informed that vaccination production was just temporarily discontinued in order to do maintenance on the production facilities.

One part of this documentary is a story about Berner family. It is Berners who started it all.

Family Berner has been fighting Norwegian state for 22 years. Authorities representing Norwegian state would not admit that vaccine was the cause of the brain injury.

Sten Eilert Skatvedt Berner is 25 years old. When he was 3 months old

he suffered permanent brain injury after receiving **DTP** (Diphtheria Tetanus Pertussis single dose)

vaccine. Two days after receiving the vaccine, Sten Eilert got strong brain inflammation that left him with permanent brain damage. He is 25 years old now, but his brain is on the level of pre-school child.

His family was fighting for 22 years to have Norwegian authorities to admit that brain damage was caused by vaccine. This is the first time ever that Norwegian authorities actually admitted that someone was brain damaged after receiving DTP (Diphtheria Tetanus Pertussis) vaccine produced in Norway.

Family Berner wanted to get Norwegian authorities to admit that it was the Vaccine that caused brain damaged, but Berners lost the first court case, just like all the others who tried to use legal system to get to the bottom of the truth. Many children in Norway suffered brain injuries after receiving the vaccine.

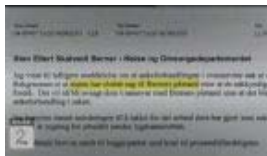

"I felt strongly that authorities were hiding information, suppressing information and they were also coming forward with clearly wrong information and that has really made me mad" said Svein Erik Berner, Sten Eilert's father.

Berners family appealed, and finally, after **22 years**, they won the case without even reaching the court.

Norwegian authorities finally decided to agree to the claims of the Berners family and that way they escaped meeting them in court. Now, it is only a question of the amount of compensation that they are going to receive.

Why did authorities chose this move? Why not meet Berners in court? Cause Berners were much better prepared this time.

This time they invited some of the greatest authorities on the vaccine injuries, and they also uncovered documents that clearly show that authorities were well aware of dangers associated with Norwegian DTP (Diphtheria Tetanus Pertussis) vaccine.

"I would have said in court that by far most likely is that this boy, Sten, was injured by a component of this triple vaccine." said John H. Menkes,

Neurologist, Sinai Hospital, USA

Daughter had reaction from DPT shot by KellyQ

Well 4 hours after she had her shots - she woke up fussing and when I picked her up, her cry turned to a shrieking scream. She was absolutely inconsolable for almost 3 hours (screams never stopped) and seemed worse when I tried to change position with her in my arms. I was so scared and called a nurse line who was no help - so we took her to ER and by the time we got there (then 4 hours) she had snapped out of whatever was going on.

Severe kidney problems after vaccines were administered by Lana Presson

One of my grandchildren had severe kidney problems after vaccines were administered. She came close to dying. My other grandchild had flu-like symptoms after some vaccines were given to him. My three children did also.
