9-11-2007- WHAT'S GOING ON?

by [Carol Wolman](#) Page 1 of 1 page(s)
<http://www.opednews.com>

Going into Labor Day weekend, there were lots of rumors anticipating a false flag operation, another 9-11. Trainloads of armored vehicles rolled into Houston. The San Francisco Bay bridge closed for three days. Suspicious activity was reported on ferries in Puget Sound. Ominous civil defense exercises are being held in Oregon, as part of Operation Noble Resolve, which also involves military jets flying over New York. An antiaircraft division is ordered to Washington DC.

We made it through the holiday safely.

Then last Wednesday, Congressman Paul Gillmor (R-OH) was found dead in his home. This was reported as a heart attack, until word leaked out that he had blunt trauma to the head and neck. <http://www.msnbc.msn.com/id/20649320/> Now we're being told he fell down the stairs. Gillmor was investigating a series of option trades that are suspicious- someone is betting billions of dollars that the market will fall 50% by September 21st. Even with the housing crisis, it would take a major catastrophe, like a "terrorist" attack, to precipitate such a plunge. As part of his job on the House Finance Committee, Gillmor was investigating this deal. Was he murdered because he was about to reveal something?

Would this death, on top of the deaths of Senators Wellstone and Carnahan, and the anthraxing of Senators Daschle and Leahy, have a chilling effect on people in Congress? Maybe that's why they're "spineless".

Now we learn that on August 30th, six nuclear warheads were "accidentally" shipped by B-52 from Minot Air Force Base in North Dakota to Barksdale Air Force Base in Louisiana. (Five arrived, did one get "lost"? Or is someone unable to count?) This violates all military procedure, which requires that nuclear weapons always be shipped on the ground in the continental US, so that if there's an accident, a bomb detonation won't occur. It would take an order from the Commander-in-Chief to put nukes on a plane.

The warheads were reportedly fastened to cruise missiles, which have a range of 1500-2000 miles. Not enough to cross the Atlantic, but enough to hit cities in the US as part of a false flag operation. This scenario is being claimed by "military investigators" on the Hal Turner show, and is making its way around the internet. It's being said the plan was to hit 5 American cities with nuclear weapons over Labor Day weekend in order to install martial law. If so, we have been saved by the grace of God, operating through loyal American whistleblowers, who made the "accidental shipment" of nuclear warheads public.

Now we are told that the entire Air Force will stand down on September 14th, for overhaul and review of procedures.
<http://www.airforcetimes.com/news/2007/09/airforce-aircombatcommand-standdown-070807/>
Our skies will be unguarded for a day, and our vulnerability has been announced to the whole world. It's an open invitation to America's enemies to attack us. The last stand-down, unannounced ahead of time, took place on Sept 11, 2001. What's planned for Sept. 14th, 2007? Oddly enough, El Al, the Israeli airline, will not be flying planes that day either.

What is going on? One of my most anti-conspiracy friends says he believes it's a giant conspiracy. What do you think? and how can we nip it in the bud?

Let us pray that honest, conscientious, loyal Americans will abort whatever evil plot is in the works, just as someone "outed" the nukes on the B 52 on August 30th. Let us remember that many such evil plots have been headed off- the fourth plane that did NOT hit Congress or the White House 6 years ago (which would have initiated martial law) , the anthrax that did NOT wipe out the whole Senate (thanks to alert postal workers and doctors at the Communicable Disease Center), the lie about "yellowcake from Niger" that was exposed by Ambassador Joe Wilson (at great cost to his wife Valerie Plame, and to all of us who were being protected by her undercover CIA network), and many others.

What to do? Talk about the Sept 14th stand-down and your suspicions, write about it, protest about it. The truth will set us free. God is with us, with We the People. We are being threatened with great harm by those in power who are supposed to be serving us. If we shed enough light, if we make enough noise, if we love our country and our planet, we will finally be able to overthrow the pirates who have hijacked our ship of state, and bring them to justice.

Impeachment now!

Logical Response

How is it that we come to this?

Day after day I read blog after blog relating to the false flag attacks purported to be aimed at the U.S. Hopefully the warnings of these possible attacks will be enough of a deterrent to stop them from taking place.

If not ,, , may god have merci on us all.... :-)

Sept. 14

Good and interesting research--and, if true, one has to assume that the two "new" Osama videos are part of the whole picture, too.

But if El Al isn't flying on Sept. 14, that wouldn't be surprising--it's the second day of the Jewish New Year (as observed around the world), and even if they were not motivated by religious conviction, the fact is that few if any

customers would have booked that day. How about Sept. 13, which is also the New Year? Are they flying then?

Not to punch holes in any theories, but that would be my take on their flightlessness later this week.

False Flag

Hello Carol:
I recall you had commented on one or more of my articles, so let me return the favor: Your article is excellent--succinct, and lacking in wearying and desultory details. Keep it up

WHAT'S GOING ON?"

Carol,

I'm impressed, well done, you've actually reached the point I reached 6 years ago.

Question is, I did not know who the senator was who had died, but I immediately questioned what part/parts he had played within the Bush Govt. Now I know, and for anyone to **NOT** question this death further, would smack to me of "complicity", clearly, there is something here which requires deep and thorough investigation, and I concur with your thoughts that this may well be the reason Congress is so spineless, I firmly believe the whole idea of the anthrax scare was to deliberately target said members to give warning what could happen to all of them, or their families, should they stray from the accepted paths.

IF, this is the case, what is the difference between the MAFIOSA and the current Govt in the U.S. ?

Yep, I reckon you should all be standing by for something **BIG** coming down the track, your Govt has no intention of relenquishing it's control, elections be damned, Constitutions only a piece of paper after all, get ready for the Gulags.

The fun of research...

Now I hate Bush as much as the next guy, and living in Portland, the next guy hates Bush a lot. But you seem to have missed a couple of facts in your research. Sorry, no sources, since I couldn't get the links to show up on this site. None of them took I onger than 30 seconds to find on Google though.

First, the armored vehicles in Houston. Since you didn't cite a source, and I couldn't find anyone else talking about it via a quick Google search, it was hard to pin down exactly. However, Eagle Global Logistics is based in Houston and ships (among other things) "armored vehicles" to Iraq. I'm guessing they were passing through.

The Bay Bridge was NOT closed. The lower deck was. There

has been extensive work on it, and other bridges in the area. Why would you assume so much significance into that?

As for the suspicious activities on Puget Sound ferries, it was two men, whose crime was being overly curious. Suspicious? Sure, but no more than anything that happens dozens of times a year.

As for Operation Noble Resolve...oh wait, it's already over. That's right, it ended last month.

Side note: I mentioned I live in Portland. I can confirm that no nuclear weapons went off, I'm still alive, and I never even heard of Noble Resolve until tonight. As for the jets over New York, there was also a simulated hurricane near Africa, among many other things. Picking and choosing the ones that support your theory is not good journalism.

You also mentioned anti-aircraft patrols in Washington. I found plenty of links to back that up. Only problem is that all of them were from separate times the exact same thing has happened between 09/11/01 and now. It's nothing new or surprising.

A dead congressman, with conflicting information? No surprise there. On 09/11/01 the local radio station was first reporting that two planes collided in midair, and then hit the WTC. There is ALWAYS inaccurate information given out by the media immediately after a noteworthy event. Besides, do you really think he's the only person who could make some sort of revelation? That he didn't have scores of aides working on the project, among other congressmen, leaving possibly dozens of people who had the same information, and hundreds who could pick up where he left off? I somehow doubt congressmen do quite as much legwork to make your scenario plausible.

And of course the nukes - 5 or 6? Remember what I said a moment ago: there is always inaccurate information reported right after an event. As for only a Commander-in-Chief being able to give that order...that's why there's an investigation, and the man in charge was immediately "relieved of his duties" - because it wasn't supposed to happen. Also, all the nuclear weapons are now completely accounted for.

Now, if the government were launching a fake attack, why in the world would they do so from inside the US? Wouldn't it be far more plausible to stage another Cuban Missile Crisis, firing cruise missiles from offshore?

The last safety day was more recent than September 2001, it was actually 2004. Also, it's probably worth pointing out that the safety day is probably due to the huge mix-up of loading nukes onto a B-52. Even if you think it was done on purpose, then having a safety day is a good way to cover it up, isn't it? Either way, the safety day is not quite what the article claimed it to be.

Someone already pointed out the reason the Israeli airline isn't flying. And besides, why would the US warn Israel (I assume that's your point), and not Canada, the UK, etc?

"One of my most anti-conspiracy friends says he believes it's a giant conspiracy."
One of my most fevered conspiracy friends thinks there's nothing unusual about it whatsoever. See, I can pretend personal tidbits are valuable evidence too.

As for Bush...it's long past time to get that guy out of office.
No argument from me there.

Ok

How many people remember ok city,do we just let that group of people off the hook or waco?It seems we have either a short memory or we are only focused on whats the latest thing.GOD forbid something happens then we'll forget about 911 but,maybe God permits these things to punish the US for our sins.We are the most enlightened country in the world and saddy the most distracted and fickle to do anything about it.At this point if what we hear is true....talk radio,blogs,freespeach marches is cheap!!! We Need ACTION NOW or it'll be too late PEOPLE!

fighting back

As patriotic Americans we should fight our enemies. Bush is our main enemy. How do we fight him? I tried voting but that didn't work. I tried demonstrating but my voice fell on deaf ears. I tried economic weapons but the neocons have too much money. I tried civil disobedience but they just laughed at me. All that is left for me to is start a bloody revolution. I hate to say it.
