Thirty two more innocent lives were sacrificed on Monday, April 16, 2007 at the campus of Virginia Tech in Blackburg, Virginia as a result of the efforts of behind-the-scene agents laboring on behalf of the Illuminati to create the pretext for a public outcry in order to outlaw guns in America.

They used a 23 year old mind controlled individual by the name of Cho Seung-Hui, a South Korean national attending school at Virginia Tech, as the "patsy vehicle" to continue to brutalize the American psyche into capitulating to the notion that banning firearms will permanently end such slaughters. The real agenda is to eliminate the ownership and possession of firearms so citizens will have no effective means of protecting themselves against the government when later, more drastic phases of the New World Order takeover agenda are implemented.

The Illuminati repeatedly utilizes the same Machiavellian Problem-Reaction-Solution theme to install their enslavement agenda using their Tavistockdirected media propaganda machinery to set up the public into accepting the cover storyProblem ('lone nut' shooter with easy access to firearms), while concurrently drenching the public with the horror of the event coupled with sympathy stories about the victims and the courage demonstrated by some to save lives during the shootings (the requisite emotional Reaction), and then advancing the idea of gun control as the Solution. The linking of gun control with media reports of this shooting began almost immediately. I did not hear one television or radio broadcast about this shooting that did not include the mention of gun control as the answer to the easy-access-to-guns 'problem'.

As is the case will all "senseless" school shootings by "loners" with a history of psychiatric problems and psychotropic prescriptions, Cho Seung-Hui was programmed (and trained) under one of the many assassin mind control programsdeveloped by the CIA and similar agencies to utilize a human being as if he were a computer-controlled robot. Cho Seung-Hui writings are reported to be darkly inspired and filled with violence because he was programmed with satanic-based rituals and mind control technology to be violent when triggered by his controllers to carry out his assigned task to kill.

In every case, a mind controlled assassin will perform exactly- at the precise hour and date- his programmers had intended him to perform. There is nothing accidental or random about the date, time, and location of these shootings. The name Blackburg has significance for Illuminated satanists, just as the name Columbine or Blackwater holds significance for Illuminati satanists. Cho Seung-Hui was no more acting under his own volition and free will when he started shooting his fellow students than a welding robot on an automotive assembly line is acting under its own volition. The testimony of students who survived the

shootings mention his "emotionless" expression and "blank" stare as he methodically went from room to room, robotically killing people and then leaving -without ever saying a word. Cho Seung-Hui was programmed to commit these shootings and then to shoot himself.

As was the case with the Columbine school shootings, you can be sure that there was a hidden government control team in place on the campus of Virginia Tech that day in order to insure that robot Seung-Hui behaved as programmed and then dutifully shoot himself. Also mirroring the many pieces of evidence pointing to secondary shooters at Columbine, there are already reports of Seung-Hui having help in carrying out the shootings.

It was equally amazing to read that helmeted and flak vested policemen with submachine guns cowered behind trees while this programmed assassin went about his killing orgy, never once daring to engage him.

I recall very well the 1966 University of Texas 'tower' shootings by 'loner' Charles Whitman. David Icke, among others, did a decent job in his books of reviewing Whitman's involvement with psychiatrists and the use of psychiatric drugs. A lot of psychiatrists at that time were under CIA control and acted as programmers. Whitman was one of our earlier examples of a CIA mind controlled assassin robot. All such 'lone-nut' shootings at schools, or children playgrounds, or children's nurseries are performed by mind controlled individuals who are programmed to carry out a horrific massacre in order to shock and horrify the public into yielding to the Illuminati's agenda of gun control.

It only took a single mind-controlled assassin at a children's playground at Port Arthur in Tasmania to cause the banning of firearms in Australia and New Zealand thanks to the Illuminati's Problem-Reaction-Solution formula. It will take many more bodies to pile up here on American campuses before the Illuminati get their way here. You can plan on more young people dying in a similar fashion.

The Blackburg Executions If this is true, we are in the middle of a nightmare.

Reply from Devvy:

Nan Ellen: Please note this comment in the column you cite below in your e-mail to me:

"Cho Seung-Hui was programmed (and trained) under one of the many assassin mind control programs developed by the CIA..."

Where is the proof of this statement?

Or, this one from Mr. Adachi:

"As was the case with the Columbine school shootings, you can be sure that there was a hidden government control team in place on the campus of Virginia Tech that day in order to insure that robot Seung-Hui behaved as programmed and then dutifully shoot himself. Also mirroring the many pieces of evidence pointing to secondary shooters at Columbine, there are already reports of Seung-Hui having help in carrying out the shootings."

As was the case at Columbine? Where is his proof of such a statement? I went there and did my own investigation and wrote about it many times. Where is his proof of such an allegation? Columbine has been investigated to the nth and there is zip, zero proof that NATO or govment black ops boogey men were on campus that morning and assisted Klebold and Harris during their killing spree. Yes, there is a huge red flag still hanging over Columbine and that's a ruling by a judge to seal the records for 25 years:

This is an outrage the parents are fighting - a fight they should not have to go through on top of the never ending grief of having their son or daughter slaughtered while at school.

There aren't words to describe the horror of what happened at VT. Where does one find any words to adequately cover such a senseless slaughter. There are some strange things about the killer, no question. But, I feel Mr. Adachi's column nothing more than sensationalist chatter.

This killer apparently was also a frequent user of several violent video games which teach how to become a killer. Sniper training, etc., Hopefully, someone with a responsible, unbiased agenda will do some hard research and provide all of us with facts that can be verified. Until then, all of this is rank speculation, a hundred different flavors which have filled up my mail box for the past 24 hours.
