This Florida based Gulfstream II jet aircraft # N987SA crash landed on September 24, 2007 after it ran out of fuel over Mexico's Yucatan Peninsula it had a cargo of several tons of Cocaine on board now documents have turned up on both sides of the Atlantic that link this [Cocaine Smuggling Gulfstream II jet aircraft # N987SA](#) that crashed in Mexico to the CIA who used it on at least 3 rendition flights from Europe and the USA to Guantanamo's infamous torture chambers between 2003 to 2005.

Poco más de tres toneladas de cocaína fueron recuperadas de la aeronave que se desplomó en las cercanías de Mérida. El avión, que era perseguido por el Ejército habría tenido a Cancún como destino original.

(Airplane used by the CIA and the DEA dealt drugs)

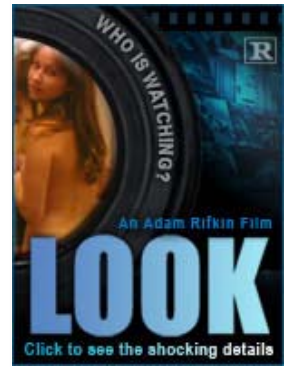

BOGOTA

G.GUILLEN / El Nuevo Herald

Un jet ejecutivo que el gobierno de Estados Unidos usó durante año para extraditar delincuentes desde Colombia y talibanes desde Europa a la base de Guantánamo, Cuba, es el mismo que hace dos meses se precipitó a tierra en una selvática zona de la península de Yucatán, México, con un cargamento de 3.3 toneladas de cocaína que, al parecer, fueron cargadas en Medellín, en donde hizo el último despegue.

El avión, un Gluf Stream II, de matrícula norteamericana N987SA, era célebre en Colombia porque durante años en él fueron embarcados en Bogotá centenares de delincuentes para ser puestos en poder de la justicia estadounidense.

The above Miami Herald's Spanish Language edition called Nuevo Herald confirms the information revealed on these videos. I've been following this story in the Spanish Language Press since the plane crash. If you don't read Spanish you can still use [Altavista Babelfish Translator](#) to do the work for you it also works on numerous other languages as well.

The US mainstream English language media no longer reports this type of news hell they haven't even been reporting the fact that we are **losing the war in Afghanistan**. These days anyone who demands the truth is labeled a wacky conspiracy theorist or a traitor so the result has been a reluctant group of journalists who have allowed themselves more or less to be bullied into silence by the facist inclined Bush administration.

Torture the NEO CON Wet Dream

I was recently listening to one of my favorite radio programs that is broadcasted on 99.5 FM in New York City and hosted by the tough as nails **Michael Levine one of the most highly decorated DEA agents in that agency's history** the subject matter was about this plane being linked to the CIA and Torture Flights.

Short Biography:

Michael Levine was called "America's top undercover cop for 25 years" by 60 Minutes is one of the most decorated supervisory agents in the history of DEA.

Some of his cases are considered benchmarks in law enforcement and have been the subject of books, movies and intensive media coverage. He is also a New York Times best-selling author, lecturer and law enforcement instructor. As an investigative journalist his essays and articles have appeared nationwide.

His radio show **"THE EXPERT WITNESS"** has been aired in York City on 99.5 FM since 1997 and features interviews and discussions with some of Americas top experts, lawyers, judges and law enforcement experts.

The guy Mr. Levine had on this program is Bill Conroy a young Gary Webb inspired investigative journalist who writes for **Narco News** Publisher Al Giordano as well as **Alex Cockburn's CounterPunch**.

Bill Conroy

NARCONews deserves our respect because they are telling the truth from Latin America about the war on drugs. They are literally risking their lives to tell us the truth.

New Document Provides Further Evidence That Owner of Crashed Cocaine Jet Was a U.S. Government Operative Signatures Link Florida Pilot Greg Smith to DEA/FBI/CIA Operations in Colombia

By Bill Conroy

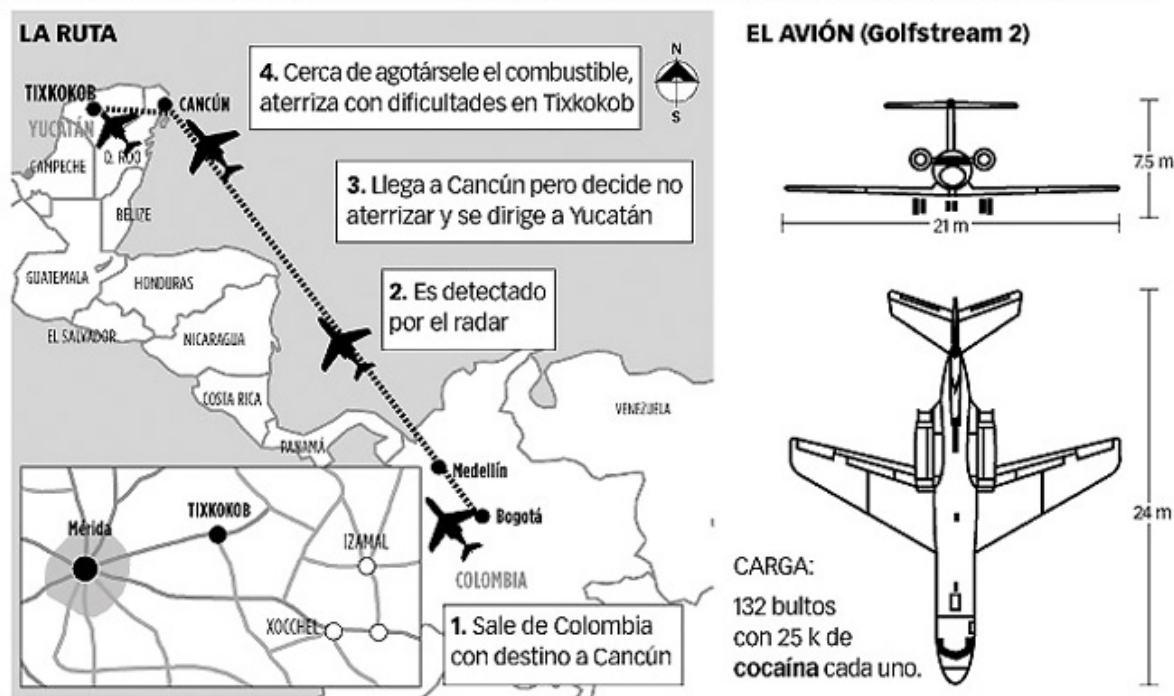

Special to The Narco News Bulletin

December 1, 2007

This particular Gulfstream II (tail number N987SA), **was used between 2003 and 2005 by the CIA for at least three trips between the U.S. east coast and Guantanamo Bay — home to the infamous “terrorist” prison camp — according to a number of press reports.** The suggestion that a “CIA plane” was flying a huge quantity of drugs toward the U.S. ensured that this incident would attract far more attention than the typical drug smuggling story.

Aterrizja en Tixkokob

Un jet cargado con cocaína, procedente de Colombia, cayó ayer por la mañana en montes de Tixkokob, Yucatán.

The Gulfstream Jet was initially reported by the **Mexican Press** as carrying a huge cargo of **more than 6 Tons of Cocaine as well as one ton of pure Heroin** but a later press release courtesy of the Mexican Military had it dwindled down to only 4 tons of Cocaine with no Heroin whatsoever. By early October the Mexican press announced a 3rd reduction leaving only **3.7 Tons of cocaine** followed a few days with 3.6 then later by a 5th and final report from the Mexican Authorities that gave the amount as just 3.3 tons of Cocaine. Draw your own conclusions about the missing 3 ton's of cocaine and the ton of heroin that was first reported. Everybody is out to make money on the drug war even the so called good guys if there is such a thing.

The airplane which had originated out of Fort Lauderdale was returning to the United States from Colombia's Rio Negro **José María Córdova International Airport**.

The city of Rio Negro is a suburb of Medellin , Colombia and is also the home town of Colombian President **Álvaro Uribe** who is very close to Bush. Medellin was also the home of the worlds largest Cocaine Cartel for nearly 3 decades and probably still is with just different bosses running it.

Medillen's Rio Navidad

The Gulfstream II also had a scheduled refueling stop recorded on it's flight log for Cancun , Mexico. Something went wrong because once the plane crossed into Mexico's Air Space from Belize the Mexican Military began tracking and following it. The Mexican Army and the Air Force also waited for the Aircraft in Cancún. The crew clearly had to change that refueling stop and flew west attempting to land at other smaller airports it eventually ran out of jet fuel and crash landed near the tiny Yucatan village of Tixkokob. Apparently there were four individuals aboard the aircraft but initially only one was captured although later 2 more were also picked up but the authorities haven't released all of their names supposedly there were 3 men and one lady but who really knows this whole thing is just crazy. To be honest with relation to the crew of the Gulfstream II N987SA the Mexican Government is being pretty damn silent.

While they fly tons of drugs in we have this idiot John P. (Pinocchio) Walters the so called Drug Czar claiming the United States is **Winning the War on Drugs** if so then why are ultra **paranoid Conspiracy theorist cops** getting all bent out of shape over a **Blue Fuckin Hershey's breath mint wrapper that they swear was made to glorify the drug trade**. I would assume Hershey's doesn't need to glorify much of anything with all the damn Chocolate they sell.

New Hershey Mints Resemble Cocaine

HARRISBURG, Pa. (Nov. 30) – Hershey, the century-old maker of chocolate bars recognizable in every corner of America, is selling a mint that police officers and judges say would be recognizable on a drug corner.

Ice Breakers Pacs are nickel-size dissolvable pouches with a powdered sweetener inside. They look similar to the tiny heat-sealed bags used to sell illegal powdered drugs like crack, heroin and cocaine.

"Being in narcotics the majority of my career, I thought it was the real stuff," Philadelphia Police Chief Inspector William Blackburn told the Philadelphia Daily News.

I'll have more on this very soon in fact I've already got some new information I just have to put it all together.
