11-10-7

Before the events of 911, the greatest act of treason perpetrated by agencies within the U.S. government was the assassination of JFK some 44 years ago. We can gain some deep insights into how the political system, the cryptocracy, works by examining the subsequent cover-up of that crime. That insight can help us understand the current situation.

After the death of JFK the next three Presidents just happened to be involved in the assassination in one way or another. Lyndon Johnson became President on November 22nd 1963 and was the main beneficiary of the assassination. He began the cover-up of the crime soon after and appointed the Warren Commission with several members who may have actually hatched the plan to kill Kennedy.

The next president was Richard Nixon who only won because Bobby Kennedy was shot down at the Ambassador Hotel In LA where Sirhan Sirhan fired 14 shots from a nine shot gun. Little known until Oliver Stone's film on Nixon is the fact that Richard Nixon was in Dallas on the same day that Kennedy was assassinated.

In his book *The Ends of Power* H. R. Haldeman, Nixon's chief of staff, points out that Nixon knew a lot more about the Kennedy assassination than previously thought and even threatened the CIA that he would release information about that event. The events of Watergate are very likely tied to Nixon's obsession with the JFK assassination and his threats.

The next president, Gerald Ford actually sat on the Warren Commission and was J. Edgar Hoover's inside man on that group that covered up the truth about what happened in Dealy Plaza in November 1963.

What I am pointing out is that it was necessary for the people in power

to make sure that the next three Presidents were intimately involved in the JFK killing. This compromised them and insured that no proper investigation would take place.

The events of September 11th 2001 make the JFK assassination look like a Boy Scout picnic. The main beneficiary was George W. Bush who used that crime to invade two countries and begin the destruction of America. Like Johnson, he also appointed a commission who subsequently covered-up the crime.

But as the election of 2008 approaches the people in power must face the very real situation that the next President might just re- open an investigation into what really happened on 911. Therefore it is easy to see that it will become necessary to make sure that the next President of the United States be someone who was intimately involved with the events of that day.

Hillary Clinton is definitely part of the criminal cabal that rules our country and I harbor no illusions that she will do nothing to investigate the events of September 11th 2001. But the question remains: can she be trusted to cover-up the crime? Is she involved in the crime to the extent that insures that she will not do anything to upset the apple cart?

The answer has to be that she cannot be fully trusted. Her involvement, if any any, is scant.

But for those who know and understand the truth about 911 there is one presidential candidate who was involved in the events of that day, and he is also one of the main beneficiaries of that crime and that is Rudy Guiliani. I leave it to others to explain how he was involved but suffice to say that it would be impossible to pull off such a monstrous crime without his knowledge and even his consent. He has the blood of 3000 people all over his hands.

With that understanding I think I can make a fairly safe prediction.

Rudy Guiliani will be the 44th president of the United States.

God help us all.
