America Is Preparing To Invade Iran - "Operation Iranian Freedom"

The recent increased military operations seem to be signaling an imminent major conventional war with Iran. It looks as if war could be implemented any day. British military sources say this has been in the works for years. That the US military switched its whole focus to Iran as soon as Saddam Hussein was kicked out of Baghdad."

Admiral Fallon Brought In

The US army, navy, air force and marines have all prepared battle plans, and spent four years building bases, and training for "Operation Iranian Freedom". Admiral Fallon, the new head of US Central Command, has inherited computerized plans under the name TIRANNT (Theatre Iran Near Term).

Bush Has Lined Up Enormous Resources

Bush has four carriers task forces in the gulf, but the US navy can put four more carriers into battle within a week's notice.

Marines To Hold Straights Of Hormuz

Several marine forces are assembling, with their own aircraft carriers, which are capable of a D-Day landing scenario. They come with landing craft, tanks, jump-jets, thousands of troops and, yes, hundreds more cruise missiles.

Their task is to destroy Iranian forces able to attack oil tankers and to secure oilfields and installations. They have trained for this mission since the Iranian revolution of 1979.

Marine Carriers

Today, marines have the USS Boxer and USS Bataan carrier strike groups in the Gulf, escorted by the USS Kearsarge and [USS Bonhomme Richard](#). Four others, the [USS Peleliu](#), [USS Wasp](#) and [USS Iwo Jima](#), [USS Shreveport](#), are ready to join them.

Amphibious assault ships, and [Wasp class ships](#) are in the Persian Gulf.

New Marine Headquarters

Earlier this year, the Head Quarter's staff that manages these forces was moved from Virginia to [Bahrain](#).

General James Cartwright In Charge Of NATO

Marine generals are now holding the top jobs at NATO, the Pentagon, and are in charge of all nuclear weapons. No marine has held any of these posts before.

Traditionally, the top nuclear job normally went to a commander of the navy's Trident submarines or of the air force's bombers and missiles. Today, all these forces follow the orders of a marine, [General James Cartwright](#), and are integrated into a "Global Strike" plan which places strategic forces on permanent 12-hour readiness.

Diego Garcia Has Build Up

Just the B-52s at [Diego Garcia](#) can hit 5,000 targets in a single raid.

New Lighter Smarter Weapons

New "bunker-busting" conventional bombs weigh only 250lb. According to Boeing, the GBU-39 small-diameter bomb "quadruples" the firepower of US warplanes, compared to those in use even as recently as 2003.

Bush Will Hit With A Massive Attack

George Bush will employ "Global Strike", which means that without any obvious signal, he can delete the whole of Iran overnight. Bush will not allow Iran to fight back.

Sources in the region, as well as trade journals, confirm that the US has built three bases in Azerbaijan that could be transit points for troops and with facilities equal to its best in Europe.

U.S. Bases in Iraq

Iraq has [four major airbases](#). They are [Tallil](#) in the south, [Al Asad](#) in the west, [Balad](#) in the center and [Al Qayyarah](#) in the north.

US And Iran In Small Exchanges

The regime in Tehran has already complained of US- and UK-inspired [terror attacks](#) in several Iranian regions where the population opposes the ayatollahs' fanatical policies. The US and Iran are already engaged in a low-level proxy war across the Iran-Iraq border.

Carriers At Sea

Will Bush Attack?

Any major provocation, such as an Israeli False Flag, and Bush will pull the trigger, and Iran will be decimated. It has to happen in the next year, and it could be soon.

A Likely Attack Scenario
