We are almost certainly in the last days of a countdown to nuclear war. Israel has made plans to attack Iran in a war of aggression, which will probably begin with some staged attack such as the attack on the Liberty in 1967.

Bush and the Gang of Fools in Washington will be part of it; we don't have two carrier groups in the Middle East to support tourism. When it happens, kiss the dollar and the United States of America goodbye. If you don't own gold now, buy some fairly soon. My experience as a combat intelligence officer tells me the attack will be in the next month.

On the 8th of March Israel issued the following warning.

"• 5. Updated Travel Warnings

Israel's National Security Council Counter-Terrorism Division presents the following updated travel warnings for Israelis traveling abroad. **It is advised that travelers should avoid visiting and leave the area as soon as possible in the following high to very high-threat countries:** Algeria, Afghanistan, Chechnya, (southern Russia) Djibouti, Egypt, (especially the Sinai peninsula), Jordan, Indonesia, Iran, Iraq, Kashmir (northern India), Lebanon Malaysia, Mindanao, (southern Philippines) Northern Nigeria, Pakistan, Saudi Arabia, Somalia Southern Thailand, Syria & Yemen. **Travelers should postpone non-essential travel to:** Bangladesh, Bangkok, Libya, Oman, Nigeria & southeastern Turkey (borders with Iraq and Iran). **Travelers in general, should avoid visiting the following countries:** Bahrain, Chad, Kenya, Kuwait, Morocco, Qatar, Tunisia. **Israeli citizens are called upon to be especially cautious when visiting:** Philippines, Turkey, Thailand, & Uzbekistan. (Sources: National Security Council Counter-Terrorism Division, GPO)."

Israel is the most hated country in the world today for their war crimes and they are about to magnify the problem 1000 fold. I cannot predict the negative things which will happen as a result of another illegal and immoral war but dropping nuclear weapons on a non-nuclear state which poses no threat to either the US or Israel is going to open Pandora's box as no war crime in history ever tried.

One of the results I can guarantee is that the US dollar is going to be destroyed. It's no great shakes predicting that. Hell, even the Comptroller General of the United States is running around telling as many people as will listen (about 14 in total, I reckon) that the United States is bankrupt. Between a two-trillion-dollar-losing war in Iraq, a balance of payments totally out of control and the Gang of Fools in Washington, you can pretty much kiss the dollar goodbye the day the attack begins. And don't think for a minute I'm talking about strictly the Republican fools in Washington. By their actions, or better yet, lack of action, the Democrats have proven since the last election that they can be just as corrupt and ignorant as the neo-Nazi Republicans.

The American people clearly voted against the illegal war in Iraq and against the policies of this all too corrupt administration. Guess how thrilled the voters are going to be when they wake up one morning soon to \$200 a barrel oil and find out just how much freedom they have left. (Hint, it rhymes with NONE)

Israel knows what their intentions are and it's no accident that they are warning their citizens to stay out or to get out of almost 40 countries immediately. As hated as they are today, Israel and the United States are about to commit the most foolish and self-destructive act of war in

history. I have more time in the chow hall in combat than all of this administration combined and I can assure you that we are going to lose. It won't talk six months as it did with Iraq, we will know almost at once.

It wasn't Hitler who paid the greatest price for the war crimes he committed; it was the German people. And today it will be the citizens of Israel and the United States who will pay the ultimate price for what is no more than cold-blooded murder of millions. The butcher's bill will be paid.
