 A variety of genetically modified corn that was approved for human consumption in 2006 caused signs of liver and kidney toxicity as well as hormonal changes in rats in a study performed by researchers from the independent Committee for Independent Research and Genetic Engineering at the University of Caen in France.

What you need to know - Conventional View

- The corn in question, MON863, is made by the [Monsanto](#) Company and approved for use in Australia, Canada, China, the European Union, Japan, Mexico, the Philippines, and the United States. It has had a gene inserted from the bacteria *Bacillus thuringiensis* (Bt), which causes the plant's cells to produce a pesticide.
- Researchers fed rats either unmodified [corn](#) or diets containing 11 or 30 percent MON863 for 90 days. The rats who ate modified corn were found to exhibit signs of liver and kidney [toxicity](#), as well as signs of hormonal changes.
- Male rats lost an average of 3.3 percent of their [body weight](#), and their excretion of phosphorus and sodium decreased. Female rats gained an average of 3.7 percent of their body weight, while their triglyceride levels increased by 24 to 40 percent.
- The mechanism that causes the toxicity is not yet known, but the researchers say there is evidence that the Bt toxin may cause the perforation of blood cells. They expressed concern that the methods used by Monsanto in initial tests of the corn were statistically flawed and called their own tests "the best mammalian toxicity tests available."
- Greenpeace responded to the study by calling for an immediate recall of all MON863 corn and the reassessment of all [genetically modified foods](#) currently approved for the market.
- Quote: "Our counter-evaluation shows that there are signs of toxicity, and nobody can say scientifically and seriously the consumption of the transgenic maize MON863 is safe and good for health." - Lead Author Gilles Eric Seralini

What you need to know - Alternative View

Statements and opinions by [Mike Adams](#), author of *Grocery Warning: How to identify and avoid dangerous food ingredients*

- It seems that the more these [GM foods](#) are tested, the more frightening the implications seem to be for human health. When companies like Monsanto do their own in-house testing, results are mysteriously favorable in nearly all cases, but when independent labs run their own tests, the results are downright shocking.

- I find it interesting that the FDA believes U.S. consumers should not be allowed to know which foods are genetically modified and which aren't. The push for honest [labeling](#) of GM foods has been blockaded by corporate interests and corrupt federal regulators.

Testimonials From Current Subscribers

"Mike Adams is the best health and natural products writer on the scene today." - Ronnie Cummins, founder, [Organic Consumers Association](#)

"Your newsletter is even better than books I've paid for!" - S. Knudson

"I can't thank you enough for sharing this for free. It's been a godsend..." - C. Nicholas

"Every day, I forward the NewsTarget Insider to probably five friends, and they love it!" - C. Engel

"... there's at least one really good article for me to read every day, and I read it and follow it." - N. Post

"I'm still not sure why you don't charge \$79 a year for this like all the other health newsletters..." - M. White

"Just wanted to say thank you from the bottom of my heart. You have a special place in my prayers for your gift of this newsletter." - O. Davenport

"As a nutritionist and naturopath, I love your website. Mike Adams is spot on..." - A. Dunev, B.S., C.N., PhD

"I credit huge amounts to NewsTarget, which has provided me with education, humor, and courage to step away from the established medical assumptions which have actually been making me worse all these years." - A. O'Neal

"I am writing to tell you how much I appreciate your newsletter. I am an RN case manager and I regularly share the information I learn from your site with my patients. Thank you for doing such fine work." - L. Smith

"Your site is so interesting! I love what you have to say in every area. The articles on the real estate bubble are very clear and, I believe, right on target (thank goodness I own my house free and clear and don't have a second one). Your nutrition stuff is always excellent too, and the political stuff is so fun and right on "target". Keep up the great work!" - T. Miller

"Thank you for all the time and effort that's gone into the CWRC and Newstarget sites, I've spent the last two weeks or so plowing through them, and have come out the other side much more educated, and motivated to start paying a lot more attention to my own health." - Conrad

"Outstanding work! It has helped me to organize my confused ideas about many health topics, such as diabetes and high blood pressure. Doctors I have visited do not like to spend the time educating you. I have only learned through your many written articles. I copy them to my Word files for future reference and study. Congratulations and thanks for your help!" - C. Noguera

"Thanks for all the wonderful information which I constantly receive. I am so sated with knowledge at the moment, I am euphoric." - C. Tinder-Smith

"I subscribe to your newsletter and forward them to friends and family. I'm always thankful for reading anything that is written in the best interest of people as opposed to big companies." - L. Harter
