Mother Jailed, Put On Trial for Curing Her Son of Melanoma *October 3, 2007*

Posted by *angryscientist* in [Bad Science](#), [Whistleblower Corner](#).
[trackback](#)

An unholy alliance of California Child Protective Services (CPS) with a hostile doctor and judge is attempting to railroad Laurie Jessop, framed as a threat to her son and the establishment for finding a way to cure him of malignant melanoma. She is now on trial, under a gag order, since she had gone to the press. When she was arrested, she was put in maximum security, solitary confinement, in the Orange County, CA jail. They claim that everything about her says anti-Establishment, so she was told, as she was considered a threat in starting a riot.

On the morning of Sept. 12, Gary Null read on KPFK, a Pacifica station in Los Angeles, an e-mail from Ron Miller, who had met Ms. Jessop at the Cancer Control Society annual convention during the Labor Day weekend. They had discussed this persecution by Big Brother in the guise of saving her son from this evil mother who has failed to protect him! She disobeyed doctor's orders and found a natural way to cure her son. These forces arrayed against her and insisted he must have the cancer removed surgically and attacked with the standard chemical fare. The cancer is gone, but nobody in authority will accept that because her doctor doesn't believe that's possible.

The initial biopsy of the mole was done in February. Their regular doctor was on leave when test results came in. A nurse informed them of the bad news. On May 8, Chad Jessop had a follow up appointment with a medical group doctor, by the name of Dr. Masciana, who insisted he needed surgery to excise the site within a week, or he could die any day now! This doctor is a general practitioner, not an oncologist or qualified to do cancer diagnosis or surgery. Chad and his mom decided to pursue holistic treatment for him. Incensed, the doctor reported her to Child Protective Services on the grounds of gross negligent child endangerment. She yelled at Laurie "all of you Jehovah's Witnesses are all the same," never mind Laurie and Chad are not Jehovah's witnesses. Dr. Masciana also told Laurie, with her son present, that his death was imminent. At the close of the appointment, Dr. Masciana informed Laurie that she was referring the case to Social Services. In further investigation, Child Protective Social Services is a misnamed government agency whose employees get paid bonuses every time they take children away from their parents.

That evening Laurie called an attorney who advised her that she had 48 hours or less before Social Services showed up. If she could not prove she was following doctor's orders, they'd take her son. Since Dr. Masciana had created such a traumatic experience for Chad, he feared the doctors and threatened to run away. In honoring Chad's wishes for continued holistic care, Laurie took her son to San Diego to continue holistic care using a number of various alternative treatments such as: ozone, hyperbaric oxygen chamber, hydrogen peroxide, energy work, Rife, nutritional supplements, and deep emotional work. Laurie also used "black salve" that she purchased from Canada to remove the mole tissue. Black salve was developed by Native American Indians more than 200 years ago, and used in the treatment of skin lesions, cancers, warts, and moles. Figures our FDA banned it, because it works.

When Chad insisted on hitting the road to continue alternative therapies and getting further diagnostics, that left a question as to where Laurie's daughter Crystal would go. A close friend of the family and Crystal's best friend agreed, and this felt like a perfect fit under the circumstances, so Laurie legally signed Crystal over to the family and gave them all the necessary medical insurance information. On May 22, the local sheriff and CPS had taken her daughter out of class, interrogating her mercilessly, telling her lies about her mother, trying to force her to reveal where Laurie and Chad had gone, and then forced her to go on a police joy ride and show them where they reside. All of this was done against her will and carried on for six hours!

They applied "Black Salve" directly to the area in question, thus giving Chad a holistic version of a large border excision. It took about two and a half weeks for the wound to heal. When it was healed Laurie took Chad to a Del Mar dermatologist for a biopsy. The test results were negative of any signs of melanoma! The next two weeks were concentrated on once again healing the tissue to get another biopsy. Upon the wound site being healed, a melanoma specialist did a punch biopsy and a

complete lab analysis on Friday, June 15. Again, no sign of cancer could be found in the biopsy and the blood work was in healthy ranges with no distinguishing markers that would otherwise be present in a patient that would have advanced stage four melanoma, as had been previously reported! Was it a miracle, or an activated immune system in a healthy young man, with some useful help, that healed the melanoma?

The following Monday, June 18th, Laurie and Chad turned themselves in to the San Diego Social Services office, with all of their documentation. They were detained for 4 hours, then told that arrest warrants for Laurie and Chad were issued from Orange County. Chad was locked up at the Palenskie Center in San Diego for one night. He had 2 guards watching him around the clock, since he was considered a flight risk. When Laurie went to visit Chad they could not have any privacy, as both guards listened to every word that was said. Laurie spent over nine thousand bucks in San Diego for the treatments done over the five week period of time, and has all the receipts as proof. A new social worker, David Harper, was put on the case. He picked Chad up in San Diego transporting him to Orangewood Children's Home in Orange County for the next two weeks, where he got fed spaghetti and meat balls, food not fitting one healing from cancer. One aspect of Chad's treatment was a healthy diet of living foods, but Ms. Jessop's requests of this social worker that Chad get proper food fell on deaf ears. He did tell her she was allowed to see her daughter graduate from Junior High School. She told him nobody could keep her away without a court order, and that she would be there! The social worker informed Laurie that he completed the paper work to lift the warrant order on her.

After her daughter's graduation, on June 21st Laurie went to make academic arrangements for her son, having missed five weeks of school. Laurie showed the documentation to the principal and vice principal. The Vice Principal knew Chad well, as Chad did his Eagle Scout project for him at the high school. Chad is now an advanced Eagle Scout. No matter, the VP called police to arrest Laurie at the school and haul her off to the county jail. The arresting deputy harassed her. When Laurie protested, the officer told her she didn't have to like her or be nice to her. After arriving at the county jail, her first telephone call had been to the social worker, David Harper, although he did nothing to get her out of jail, nor was he willing to help correct the record. Laurie was physically abused, they spread her legs twisting her knee, when she complained they called out "Resisting...Resisting" then they pushed her violently to a cell wall (behind the cameras) causing her to twist her neck, shoulder and arm. After being worked over, they took away her jacket, shoes, socks, and toilet paper, and locked her up. Her holding cell was extremely cold and she was deliberately denied toilet paper. She asked for toilet paper, only to be answered it must have been taken for good reason and she was not getting any. She was denied toilet paper from approximately 3:30pm until 11:00pm. One has to wonder, what was she going to do with the toilet paper, hang herself? By 11:00 pm Laurie got taken to be assessed. She asked "is this a madhouse run by animals, who is running this place?" Laurie told this officer her story for half an hour. He let her talk, then said he sees all kinds of characters, his job is to ascertain threats. He told her she has the fire, the spirit and the power to overturn the system and create a riot. He informed her she'd be put in solitary confinement, but she might get a roommate, probably a drug offender. She was forced to take a chest X-ray against her will, without any explanation and ridicule from the officers. Laurie and her two children have never been in any type of trouble with the law, but were treated like hardened criminals. She was shocked to learn women taking showers have no privacy, that male guards are watching. The next night she got a 58-year old roommate charged with kidnapping her children from her husband 20 years ago, after being extradited from Tennessee on outdated bogus charges tagged with 200 thousand bail. It would appear that Orange County is desperately trying to maintain job security at the expense of the innocent!

Laurie was released on the streets of Santa Ana after midnight, in an unsafe area of Southern California for a woman, after five days of incarceration. Upon Laurie's arrest, officers impounded her van and turned it upside down looking for drugs. She had to pay over 300 dollars in impound fees to get the van back.

Social Services approved the foster families that Laurie had arranged for Chad and Crystal. Now Laurie is on trial, forbidden to speak under a gag order, by the very judge that had issued the bench warrant for her arrest, because she refused to go along with orthodox medicine. The dermatologist, appointed by Social Services, testified in court that the melanoma is playing hide and go seek, that they'd have to subject Chad to unnecessary and dangerous further biopsies and medical procedures to find where it migrated to. The dermatologist further stated that the melanoma had become even more deadly, claiming it has now traveled to different organs. The prescription for surgery is a large border excision to the skullbone. Chad says he is old enough to defend this country's freedoms, but he is denied that same freedom of choice when it comes to his own health and he is also under gag order. Ms. Jessop intends to sue anyone who touches her son against their wishes. All Chad's blood tests are consistent with a healthy 17 year old 6'2" young man. They refuse to tolerate anyone trying to clear their conscience at his expense. Laurie says her record stands, she will not back down, and she wants parents to know **they do not have to be intimidated by this system!** The judge has stated twice that she doesn't want Chad to die while she is on the bench; which sounds like she has bias in the case! Surgery and chemotherapy had been intended for the following week. The doctor is still of the mind Chad could die any day now. When giving testimony, the dermatologist was asked if he could perform surgery on Chad, knowing that Chad would not cooperate with any Western medical butchery. His answer was emphatic No, he could not perform an operation on anyone against their will.

What Big Brother has been doing to Ms. Jessop and her children is unconscionable, beyond outrageous, a gross miscarriage of justice and an abuse of authority. Many families have been torn apart by lesser abuses of CPS and modern medicine. The Jessop family is very united and strong in their convictions, very aware of their constitutional rights, and will not give up to

our corrupt system. Being a single parent for the last 11 years, Laurie has done herself proud raising her children and is extremely close to both of them. Laurie and her children have stood the test and this hellish ordeal has brought them closer together as a family. She said at the press conference, "I am a mama bear and no one is messing with my cubs!"

Laurie's deadbeat ex-husband, Marcus, has never voluntarily paid for child support or any of the children's medical bills, even though he is legally bound to pay for half according to their divorce agreement. She has had to drag him into court to get a judgment and garnish his wages in order to collect on past due medical bills. It so happens Marcus is in agreement with the state, he wants his son, (having had no contact for the last 10 years) to be butchered and drugged to eliminate this incredible cancer, that refuses to carry out its death sentence and is too clever to show up on tests. Marcus is in court with his own public defender, pushing for this even though he has no legal or physical custody, not even any visitation rights. If he was in agreement with Laurie's medical beliefs, this court probably wouldn't allow him in the courtroom. Our tax dollars, hard at work!

In the state of Virginia, a brilliant 17 year old young man went through a very similar ordeal, but won his battle with CPS. Once his case was over, he was instrumental in passing a new law in the state of Virginia. Abraham's Law, that gives a minor the right to make their own medical decisions when they are bright and understand their choices. Laurie wants to get her story out and push through a similar bill in California, called "Chad's Law," so that other families do not have to go through the abusive nature of a department that is supposed to be protecting our children. As "Roy of Hollywood" stated on KPFF recently, who is protecting us from the Child Protective Social Services Department? Pushing through a bill like this may be very expensive, but once Laurie makes up her mind that she is doing something, she is all steel, determined, and will persevere to find a way to make this happen. If you can help her in any way, please contact me via e-mail.

Orthodox medicine is unwilling to admit it does not know everything, and it hates competition. Its methods of treating cancer are not the only ways that can work. Ms. Jessop believed she could find another way, and her son, given a diagnosis of imminent death, is now free of cancer. Never mind, the doctor is sure it's still there, so Big Brother intends to make an example of her as an unfit mother for disobeying her doctor, putting her son in mortal danger. That's not happening, but truth often doesn't matter to Big Brother, as is apparent in most government policy. If Chad were actually endangered by not getting conventional treatment, the authorities might have a leg to stand on, but in this case, it's not his mother putting him in jeopardy, it's the system! The doctor has egg on her face, because she was sure Chad would die quickly without aggressive conventional treatment, and she has been proven wrong! Instead of learning from her error, she wants to make Ms. Jessop and her son pay for showing her up!

I'm helping her get her story out. One newspaper did a story, but in general, very little has been reported so far. I tried to find the story online, but no luck. A press conference was held on Sept. 6th, just before court. Two of the major TV news stations and one of the largest AM radio all news stations showed up. KFVB radio ran the story immediately that day. As soon as court started the judge announced that there was a gag order on this case and threatened jail time and contempt of court to anyone (including the minor in question), that spoke to the press or anyone else for that matter. One of the TV news stations didn't want to run the story without interviewing Chad and getting his viewpoints. The judge denied a continuance six different times, ignoring all six times valid reasons for the requests. The judge also denied Laurie the right to hire her own attorney! She retained a law firm with her own money, but the judge insisted she has to keep her Public Defender, presumably as a public servant easier to control than a private attorney not so dependent on the system.

If anyone reading this wants to help get the story out, feel free to blog away. I could give out phone numbers for Ms. Jessop or Mr. Miller if you send me a note at alexwren@pacbell.net This blog is angrystscientist.wordpress.com. Laurie can't risk violating the gag order, but she'd appreciate your prayers and support in her very difficult time of fighting our corrupt system in order to keep her family together. Thanks for taking the time to read this long story. Now that you know what sort of injustice masquerades as protecting children, you can do something to help wake up sleepwalking friends and neighbors, trusting "The System" to know what's best for the children, and adults too.

This sentence of misspelled names is to assist searchers to have a better chance to find this information: Lori Jessop; Lori Jessup; Laurie Jessup; Chad Jessup; L. Jessop; L. Jessup; Lauri Jessup; Lauri Jessop; Laura Jessup; Laura Jessop.

1. Nicolette Amoroso - October 4, 2007

I am one of the people who did energy work on Chad and Laurie at the time they were in San Diego. It makes my stomach turn to hear what they have been experiencing, but I do trust that it is happening for a divine reason and that many people will have their eyes spread wide open as a result and we can start taking back our power as people!

I spent my time 'serving' this country so I have a LOT OF FIRE within me because I know first hand that what we do to 'protect' our country is a bunch of B...S...

[...] This is about a client we originally worked on and as a result helped achieve a clean biopsy. This case is ultra important and we cannot afford to allow it to get by us. Do what ever you can to assist this or the next time it might be you or one of your family members. This article was posted by “angriscientist” in Bad Science, Whistleblower Corner. I would like to contact you to help.
This may be an important piece of humanity’s work for health freedom rights.
Best regards,

[4. Rose Cherrix](#) - October 26, 2007

I am Rose Cherrix. Abraham Cherrix is my son. I know what it is like to go through this. Even though returning calls and answering emails is hard, it is important to send your support to this family. Even though the case cannot be discussed by the family and people involved as they told us due to a gag order, the public issues that have already happened and is knowledge can’t be stopped. The public has a right to know. Yes it is hard to deal with but I too believe that it is for a greater purpose that we have had to endure what we have. I welcome anyone to email me. I will talk to anyone. This family has the support of Abraham and myself. They need more.

[5. Abraham Cherrix](#) - October 26, 2007

Luckily I woke up this morning to find my mother had still left this web page open in my browser.

This is very similar to the experience I went through with CPS a while back, although I tend to think my experience was nothing near as horrifying as what Laurie and Chad went through. One must wonder, is this really the medical community that we we all knew, or “thought” we knew? Apparently the government is against alternative medicine, but is that because they think it won’t work or they know IT WILL?? I think the latter.

I used to tell people when I was being pushed through this case, that if you don’t have any rights over your own health care or what you do with your own body, what rights do you have? If the system is going to railroad you into their methods and call themselves doctors (The word doctor came from dek, meaning something proper and acceptable, useful. HAHA.), then those are the kinds of people who need to get cancer, find out chemo failed, and see if they don’t try something else!

If you are in contact with these folks, and they are able to, please have them contact me. Maybe someday America can really be free.

[6. Catherine Clark](#) - October 31, 2007

This is a travesty! Our medical system is broken and needs to be overhauled and injected with compassion and objectivity, rather than staying in a box! They have proven, and many have proven that there are better methods of dealing with cancer than poisonous drugs. What a horrible thing for this family to go through! My compassion is all for her, and I hope that these “doctors” who are not true physicians, will learn to “First, do no harm,” which used to be the creed of the medical profession. But I guess that doesn’t make any money, and that is what today’s medical profession boils down to now - making money hand over fist for doctors and the pharmaceutical industry, which has way too much influence. Every time I see a commercial on television for a drug I gag and then mute it. They throw drugs at everything, rather than using their brains and finding causes. They will get their just reward in the next life, and it is one I don’t think they will like!

Catherine F. Clark
Chicago, IL

[7. Panda](#) - October 31, 2007

I know what lengths the pharmaceutical industry will go to, to get their dreadfully poisonous drugs into as many of us as possible... we must ALL fight this until we finally win our right to have the natural health we all deserve!

[8. northern](#) - November 1, 2007

I am Gobsmacked at the disgusting underhand tactics of big pharma to keep us all sick and dying!! I have posted this story EVERYWHERE!!

9. Daptain Shays - November 1, 2007

Warning to all those who support government funded health care. You will lose more freedom over your choices if it ever comes about.

This is the real difference between an administration run by Ron Paul and one that is run by Hillary Clinton or John Edwards.

Do you want freedom? Or, do you want government goons to make all your choices for you?

Choose now and get involved today or you may be next.

10. secured party - November 1, 2007

this lady needs to free herself, her "all capital" letters means she is a product. She needs to become what we all were born as, a Sovereign American national. Through the UCC (uniform commercial code) redemption process, this action can be stopped.

You are all on the wrong track. UCC 1-207, 1-103, & 1-308., look them up and start freeing yourselves. 25 million Sovereigns have done so.

Bar association (british accredited registry) all lawyers are foreigners, agents of the British crown. (bench (as in bench warrant) is the latin term for BANK. Educate yourselves and be free. Public defender, private att'y are one and the same. Look up Corpus Juris Secum dum. They are first and foremost, officers of the court, second, loyal to the public, THIRD, to the client. Wake up. Att'y is not the answer.

one website: moorishrepublic.com can help.

don't play their game, end it.

good luck.

this is more than we had when we went thru our own situation, so appreciate this as a gift from our creator. Become a secured party, a creditor, and own your strawman, (all capital letters) who is a debtor.

educate, educate, educate yourselves. god bless!

11. Narendra - November 1, 2007

We need to collect support signares and fight the big brother before he bacomes too big !

12. Marjean - November 1, 2007

My heart goes out to both the families and I so appreciate their stand for those of us that don't 'buy in' to everything the medical establishment wants. I fail to see the 'Health' in the Health-Care System.

Obviously you aren't some of our 'dumbed-down' citizenry caused by mercury in vaccines. I don't believe in advertizing drugs that need to be prescribed, either.

Thank you so much for what you are doing for the rest of us that want the right to make alternative choices. Bless you.

13. Cheryl Rounds - November 1, 2007

This country is no longer about freedom and human rights. It is controlled by corporations who put profit above everything else, including human life There is an excellent website www.cancertutor.com that discusses the politics of cancer as well as alternate treatments and other information. On this site they make the point that if the government really wanted to find a cure for cancer, you would see alternative treatments tested against Western medical treatments, which is currently considered the only viable treatment, However, because they know that the cut, burn and poison methods they use would stand up poorly against alternative methods, this testing is not done. And when alternative treatments show promise they are quickly made illegal in this country (Hoxley, laetrile, black salve, etc.)

Because the medical mafia is always on the look out for people who are cutting into their business - the wisest course of action is to always seek treatment from people other than MDs. In my state it is currently legal to chose a Naturopathic Doctor as a primary care physician, so I have gone this route form my daughter. If you are a parent and live in a state that this also applies, I strongly urge you to go this route even if your medical insurance will not cover the cost. Your health freedom may depend on it. And lets get this story out to everyone we know - if it happened to this family it could happen to any one of us

14. Kent B - November 1, 2007

If you get a chance, Watch "Big Bucks Big Pharma" * Marketing Disease & Pushing Drugs. A multi-billion dollar pharmaceutical industry exposed of the insidious ways that illness is used, manipulated and created, for capital gain.

a short clip of it is below:

<http://video.google.com/videoplay?docid=-634917600336592397> also watch

I want to extend help. I have connections that can help combat the system.

15. Ingrid Naiman - November 1, 2007

I am the author of the book *Cancer Salves: A Botanical Approach to Treatment*. One of the most disturbing aspects of the research that I put into the book was the 350-year battle over patents for cancer cures. Perhaps the struggle is more ancient, but it became totally clear to me that the interests of "professionals" might often violate the interests of patients.

Without taking a lot of space in this blog, I would like to make a few brief comments.

First, Jane Heimlich, wife of Henry Heimlich, and author of the book "What Your Doctor Won't Tell You" advised me to write as much as possible on the history of this particular cancer treatment. I owe her a great deal of credit because my life was irrevocably changed by what I discovered.

Second, a former student who has gone on to achieve great tasks, Kenny Ausubel, produced a film called "When Healing Becomes a Crime," also about this method of treatment. It was nominated for an Oscar but did not win as best documentary. Still, it was a contender for this recognition. The film later came out as a book and DVD.

Third, a British film producer is in the process of making a similar film that focuses more on the medical implications of the treatment than the political.

Four, this method of treatment is probably the safest and best strategy for addressing melanomas so the Jessops appear to have done their homework well.

My book took an enormously long time to write. Friends and advisors urged me not to publish the formulae, but once I understood the suffering that has ensued as a result of greed and misplaced egos, I defied their well-intentioned advice and put everything in reach of all who need the information.

The fact that the Jessops are facing the problems they are having in a state that recently granted citizens freedom is deeply disappointing, I hope not discouraging. Our health care system is in a profound state of disrepair, but no family should have to go through the double or triple agony of cancer, legal hassles, and financial stress. This is frankly shameful. Our Nation must awaken to its responsibility to its citizens and become an ally rather than an adversary of the People.

16. S-J Walsh - November 1, 2007

That poor family. OMG. I am disgusted that Laurie even got arrested and lost her children in the first place. I was a single Mom once and even though I'm in Canada, I feel her pain and her children's pain. That Chad was cured by holistic medicine scares the heck out of the medical society because it doesn't line their pockets. It's the same in Canada. They don't like the fact that perhaps they are not needed for certain treatments. If Chad was healed by holistic means, then so be it. What can I do to help???? S-J

17. Patick Judge - November 1, 2007

These people tore a family apart

time for to show our support so it dont happen again

horrible thing to happen

these people who did this have to be exposed

let them see the pressure maybe lsoe their jobs

what goes round comes round

18. billy m - November 1, 2007

the longer a doctor keeps you sick the more money he makes.giving drugs does not cure only masked the problem.

now about the lady and her son. a plan of attack (turn the tables)

lets put the doctor on the hot seat! the lady should claim her son never had cancer! claim the doctor is a quack.if the doctor is claiming the son had cancer and the lady didn't cure the son.but the cancer is gone..the doctor lied to the lady, for scam profits.in other words two can play the game.

next a malpractice suit is in order.the suit must be in place before the trial starts.but the lady has to drop that she cured her son.she needs to demand trial by jury. in court when asked if she cured her son ?she has to say NO! that will force the doctor to prove she son had cancer.you can't prove something thats not there.also she has to tell she didn't trust his judgement.malpractice suit helps in two ways,

1# shows the jury she stands behind her charge of malpractice .

2# beating him in court will make the malpractice suit a cinch to win.
