

A **Cryptome DVD** is offered by [Cryptome](#). Donate \$25 for a DVD of the Cryptome 11-years archives of 41,000 files from June 1996 to June 2007 (~4.4 GB). Click Paypal or mail check/MO made out to John Young, 251 West 89th Street, New York, NY 10024. Archives include all files of cryptome.org, jya.com, cartome.org, eyeball-series.org and iraq-kill-maim.org. Cryptome offers with the Cryptome DVD an INSCOM DVD of about 18,000 pages of counter-intelligence dossiers declassified by the US Army Information and Security Command, dating from 1945 to 1985. No additional contribution required -- \$25 for both. The DVDs will be sent anywhere worldwide without extra cost.

19 December 2007

A sends:

Subject: NSA-affiliated IPs/DNS as of 19 Dec 2007 05:57hrsGMT

Date: Tue, 18 Dec 2007 23:40:38 -0700 (MST)

Just learned following within the past few days:

Certain privacy/full session SSL email hosting services have been purchased/changed operational control by NSA and affiliates within the past few months, through private intermediary entities.

Hushmail: now fully owned by private entity NSA affiliate; has had informal relationship with NSA for a number of years that effectively provided NSA with real time access to Hushmail's hosting servers.

Safe-mail.net: Israeli-based, ironically privately lauded by NSA and US military several years ago for its sound implementation of SendMail with SSL webmail GUI frontend. Now provides mail server info to NSA in real time.

Guardster.com (SSH/SSL proxy): NSA contractors have "bought" full access rights to Guardster servers a few days ago. Separate but related: facilitated port sniffing of hosting servers at Everyones Internet, on NSA affiliates' behalf, has been ongoing for a number of months now.

More info on industry Windows security software:

Zone Alarm, Symantec, MacAfee: All facilitate Microsoft's NSA-controlled remote admin access via IP/TCP ports 1024 through 1030; ie will allow access without security flag. Unknown whether or not software port forward routing by these same programs will defeat NSA access.

I will continue to provide more info on the above and related topics upon discovery.
