## Department of Veterans Affairs Reports 73 Thousand U.S. Gulf War Deaths

*By Clive Boustred*

More Gulf War Veterans have died than Vietnam Veterans:  
The Department of Veterans Affairs, May 2007, Gulf War  
Veterans Information System reports the following:

### **Total U.S. Military Gulf War Deaths: 73,846**

- Deaths amongst Deployed: 17,847
- Deaths amongst Non-Deployed: 55,999

Total "Undiagnosed Illness" (UDX) claims: 14,874  
Total number of disability claims filed: 1,620,906  
- Disability Claims amongst Deployed: 407,911  
- Disability Claims amongst Non-Deployed: 1,212,995

Percentage of combat troops that filed Disability Claims 36%

NOTE: Soldiers, by nature, typically don't complain.  
In other words, the real impact of those who are  
disabled from the US invasions in Iraq, Afghanistan  
and other Nations, is not fully reflected in the official  
Veterans Affairs numbers. When soldiers are sent to  
murder women and children they tend to never be  
able to live normal lives there after.

How come the government numbers of 3,777 as of 9/7/7 are so  
low? The answer is simple, the government does not want the  
73,000 dead to be compared to the 55,000 U.S. soldiers killed  
in Vietnam Iraq = Vietnam. What the government is doing is  
only counting the soldiers that die in action before they can get  
them into a helicopter or ambulance. Any soldier who is shot  
but they get into a helicopter before he dies is not counted.

73,000 dead amongst the U.S. soldiers for this scale operation  
using weapons of mass destruction is not high - we expect the  
great majority of U.S. soldiers who took part in the invasion of  
Iraq to die of uranium poisoning, which can take decades to kill.

From a victors perspective, above any major war in history, The  
Gulf War has taken the severest toll on soldiers.

More than 1,820 tons of radio active nuclear waste uranium  
were exploded into Iraq alone in the form of armor piercing  
rounds and bunker busters, representing the worlds worst man  
made ecological disaster ever. 64 kg of uranium were used in  
the Hiroshima bomb. The U.S. Iraq Nuclear Holocaust  
represents far more than fourteen thousand Hiroshima's. The  
nuclear waste the U.S. has exploded into the Middle East will  
continue killing for billions of years and can wipe out more than

a third of life on earth. Gulf War Veterans who have ingested the uranium will continue to die off over a number of years.

So far more than one million people have been slaughtered in the illegal invasion of Iraq by the U.S. Birth defects are up 600% in Iraq – the same will apply to U.S. Veterans.

Statistics and evidence published by the government and mainstream media in no way reflect the extreme gravity of the situation.

Those working for the government and media must wake up and take responsibility for immediately reversing this U.S. Holocaust. Understanding who is manipulating all of us is critical for all of us.
