The Japan Iceland Norway Whale Hunt Slaughter

Never in the history of the world has one nation done more to destroy the world's oceans than has **Japan!** Massive drift nets indiscriminately vacuum clean the seas of all life, while thundering bottom trawling nets destroy habitat, endangered species, and countless millions upon millions of tons of rare corals. However, the greatest insult of all is Japan's utterly ruthless and determined efforts to kill off all the world's whales, and they have the absolute gaul and audacity to do so in the name of research!

Shafts of sunlight stream down into the inky black fathomless depths, and through this cathedral of light and every shade of blue imaginable is a pod of whales whose songs fill the deep more resplendently than any choir on land ever could. In unison with glittering spout blasts soaring high up into the sunlight their glistening barnacle-encrusted backs began to break the surface, but as the whales prepared to dive back into the deep their magnificent tail flukes beginning to rise high a whump followed by a thump shattered the moment. Blood erupted in a ugly stain across the tossing seas as the harpoon detonated deep within, and everything that was wonderful about the moment before was lost forever in an instant. Still alive after a hour of pain, heartless men dragged the huge body up the main ramp, and then with warm sticky blood drenching every thing in sight they in the name of 'research' methodically and scientifically butchered this magnificent Leviathan of the deep!

Forget North Korea Iran Saudi Arabia or China, the four most evil nations on earth are the so called civilized nations better known as Japan Norway Iceland and Canada (seals and fur). An axis of evil the likes of which the world has rarely seen. Rogue nations who have and seemingly will always have a complete and total contempt for

the environment and the animals of the sea, and not to mention everything else that is beautiful and wonderful about this blue planet earth. For them the world is there for their benefit only, a cash cow that can be milked to extinction.

Japanese whale butchers have killed the first of 60 whales in their 2005 coastal slaughter off the polluted toxic north coast of Japan, which started early in September. The Icelandic 2005 whale blood fest ends with 39 whales butchered, most while still alive. And in a desperate blood lust of insanity to reach their self-allocated whaling quota of 796 chopped up Minke whales, Norway's ghoulish bureaucrats have extended the whaling season by yet another month. This being motivated primarily by a bloody need to give the rest of the world the finger, and tell them all to go screw themselves!! The above insanity costing these monstrous empires of evil a staggering \$80 million dollars in subsidies for these allegedly scientific research blood ventures!! Not unlike another evil nation towards the sea Canada, who subsidizes a yearly [seal hunt](#) to the tune of \$77 million (seal penises being the primary cash export to Japan and China). And for what, keeping a handful of oafish brutes off the welfare roles, and a few exotic food freaks blubbery souls happily intoxicated (most whale meat being highly contaminated)??

Whale meat a delicacy? Japanese citizens clearly couldn't give a hoot about whales' huge value to the tourism industry, seeing that they'd rather eat anything from the sea than look at it, and this despite making the world's best cameras and the world's most inaccurate harpoons. The mindless cruelty of the hunt clearly only adds value to whale meat for these sick people, seeing that whale meat is about as tasty and appetizing as deep fried shoe leather. Needless to say scientific research whale meat will be back in greater supply on the menus of Iceland, Norway and Japan this season for no other reason than demonic pride.

Japanese diplomats argue that whales are no more intelligent than cows, which makes a lie of their statement that these magnificent animals are only being killed for scientific purposes. The first thing any scientist recognizes when doing research on whales is their incredible intelligence, intelligence which is obviously far greater than that possessed by these blubbery and highly idiotic spokespersons!

Like Canada's infitessimal Sealing Lobby, Japan's tiny Whaling lobby now threatens to isolate the nation utterly, if only people would wakeup and boycott everything made in Japan. Next time you pick up something made in Japan Norway Iceland or Canada, think of a butchered whale or a Seal's hacked off penis, and then reverently put the blood item back on the shelf to collect dust as it so rightly deserves.

We hear this argument that the hunt is needed to stop the whale population from growing so large that it devours huge stocks of fish. [Bimbo Canada](#) uses the exact same argument for seals who we are told ate all the Cod. Stand that argument on it's head and you'll need a hunt to stop the Japanese population from growing so large that it devours all stocks of fish to the point of extinction. This argument anyway being totally refuted by all non governmental scientists worldwide!! Japan has almost single handily swept the seas almost empty of all life with it's massive drift nets, but fishermen like farmers need to be subsidized at all cost no mater what the cost to the environment and the wild animals who inhabit it! The only way to stop these pirates and pillagers of the seas who would slaughter these magnificent Leviathans of the deep is to Boycott them and consign them all to eternal damnation!

Everyone should also boycott the asinine backwards brain dead little nations of St Kitts and Nevis, St Lucia, St Vincent, Grenada, Dominica and Antigua. Idiotically governed totally morally bereft little places that wildly assert that whales are eating all the fish in

the Caribbean, and therefore need to be killed off (same stupid argument used by Bimbo Canada to justify the slaughter of half a million baby seals every year). As everyone knows they have all been bought off by the world's most evil self centered and greedy pig headed nation Japan (is it any wonder that more people commit suicide in Japan than anywhere else on earth, because of the shame before God of how their country is so wantonly and mindlessly defiling this once beautiful and bountiful blue planet).

Iceland and Norway both being pathetically backward nations governed by monstrously evil persons who pander shamelessly on behalf of their brain dead fishermen who they treat as Gods because they allegedly uphold a proud heritage of mindless slaughter on the high seas. Other countries subsidize their evil chemical Frankenstein farmers, so they feel that they have to do the same by subsidizing their callously wicked viciously heartless ghoulish fishermen. Anyone who visits Iceland Norway or Japan is a very sick and satanically selfish person who has nothing but contempt for God and all his wondrous creations. If you have a ounce of human decency within in you then please stand up for God, and boycott the plundering butchering harpooning clubbing skinning alive slaughtering nations of Japan Norway Iceland and Canada.

"Can you draw out Leviathan with a hook? Or press down his tongue with a cord? Can you put a hook into his nose? Or bore his jaw through with a bridle ring? Will he make many supplications to you? Will he speak soft words to you? Will he make a covenant with you? Will you take him for a servant forever? Will you play with him as with a bird? Or will you bind him for your girls? Shall traders heap up payment for him? Shall they divide him among the merchants? Can you fill his skin with barbed irons? Or his head with fish spears? Lay your hand upon him, you will no more think of fighting! Behold, the hope of him is in vain; shall not one be cast down even at the sight of him? None is so fierce that dare stir him up; who then is able to stand before Me? Who has a claim on Me from before, that I should repay him? Whatever is under the whole heaven is Mine." (Iyov 40:25-41:3)

The Japan Whale Hunt

In Japan whales are a tasteless buffet,
While elsewhere they splash and play.

In Japan sea scientists are twisted and fake,
While elsewhere they are forthright and awake.

In Japan they rejoice in the glorious Whale Hunt,
While elsewhere they weep at this nefarious stunt.

In Japan brutish brain dead thugs are subsidized,
While elsewhere they are so righteously demonized.

In Japan they eat wormy whale meat and are thick,
While elsewhere the mere thought makes them sick.

In Japan whale meat is exotic and blubberingly terrific,
While elsewhere it is despotic and flubberingly horrific.

In Japan most citizens do nothing and are defiant Sods,
While elsewhere they take action and are fearless Gods.

In Japan the tradition is to kill and eat whales wantonly,
While elsewhere the mission is to save them unconditionally.

In Japan sea life other than human is thought meaningless,
While elsewhere it is dreams of a curiosity so fathomless.

In Japan they godlessly manage the fisheries to extinction,
While elsewhere they fearlessly nurture them to distinction.

In Japan whales and all sea life are ruthlessly destroyed,
While elsewhere it is marvelled at and wondrously enjoyed.

In Japan the politicians are corrupt and possessed by greed,
While elsewhere they are selflessly honest and never mislead.

In Japan children stand before lifeless seas in a empty trance,
While elsewhere before tossing seas they merrily laugh and dance.

In Japan the sea spume is drenched in a blood so soullessly red,
While elsewhere it is wrenched white from the seas agelessly wed.

In Japan heartless souls wear gloves soaked in unjust wickedness,
While elsewhere kind hearts know profound loves of deep sacredness.

In Japan drift nets entangle whales in a long tortured web of death,
While elsewhere cameras angle upon whales in the moment of a breath.

In Japan the trawler nets sweep the depths clean with a mighty roar,
While elsewhere they resonate with wondrous enchanted songs that soar.

Stop Japan's bloody whale hunt and save the seven seas for the next generation!
Vacation elsewhere in the world, and buy not from Japan to avert an aberration!
