WEATHER CONTROL

It's happening right now as you read this and it affects everyone. Data4science is performing extensive research this topic and a major report is being compiled. New information not on the web will be revealed. Check back soon!

AMMUNITION TO FIGHT CELL TOWERS

People everywhere are waking up to the RF-induced misery from cell towers -

then they fight back and win!

Common cell tower RF energy complaints include:

- * Clusters of cancer
- * Lack of sleep and insomnia
- * Noises induced into the head and other health problems.

Several decades ago, mind control experiments proved that microwave energy is detected by the brain.

Many are actively fighting these structures as cell companies attempt to place them dangerously near schools, playgrounds and homes. Here are a few victory stories from the USA and UK which prove that people are finally realizing these health hazards and are fighting back:

Lawsuit - Cell-Hell Tower dropping volumes of plastic pine needles which nearby neighbor has been picking up in his yard. Now he has bags of the needles. The installation also has loud air conditioning that keeps them awake all night, along with an RF induced sound in their heads:
