Israeli Co Is New Pentagon

The Israeli company for computer security Check Points has been appointed as the official supplier to the American Ministry of Defense. In particular, the company will supply American Federal agencies with a protection system for data stored on laptop computers. (Guysen.International.News) July 17, 2007

Whatever one may think of the old Protocols of the the Learned Elders of Zion, the protocols of the current elders seem to be working very efficiently. Let's see. They control Congress and the White House, security at all our major airports, through the Israeli company Amdocs they manage the billing of 90% of US private telephone companies, and now they have a direct line into the computers of every federal agency because one may be assured that if they have a system, they know how to bypass it. Of course, by calling it "Check Points," that is equivalent to the Nazis of an earlier generation calling their school yards, "Concentration Camps." Different era, same mentality.-JB

U.S. Nuclear Weapons Being "Guarded" by Israel

Publication time: 26 September 2007, 10:27

> American supporters of Israel were delighted to learn that an Israeli company, Magal

Security Systems-owned in part by the government of Israel-is in charge of security for the most sensitive nuclear power and weapons storage facilities in the United States.

The largest perimeter security company in the world, Magal started out as a division of Israeli Aircraft Industries (IAI)-which was owned in part by the government of Israel. In recent years, however, Magal evolved into a publicly-traded company, although IAI (and thus the government of Israel) still holds a substantial share in the highly successful firm.

What all of this means is that the government of Israel will actually have control over the security of America's nuclear weapons.

Supporters of Israel say that this is a splendid idea, since Israel is said to be perhaps America's closest ally on the face of the planet. However, there are some critics who question the propriety of America's super-sensitive nuclear security being in the hands of any foreign nation, particularly Israel which, even today, officially denies that it is engaged in the production of nuclear arms.

Be that as it may, however, Magal's global interests are quite broad-ranging. Having secured 90 percent of Israel's borders through a wide-ranging array of super-modern "space age" technology, Magal has now branched out internationally.

Not only does Magal provide security for American nuclear facilities, but it also does likewise for most major nuclear facilities in Western Europe and Asia. In addition, the Israeli firm also provides security for Chicago's O'Hare Airport and, for the last fifteen years, has kept watch on the Queen of England's famed Buckingham Palace in London. What's more, Magal provides security for 90% of the American prisons that utilize electronic systems. Magal brags that its other clients around the globe include: borders, airports, industrial sites, communication centers, military installations, correctional facilities, government agencies, VIP estates and residences, commercial buildings and storage yards.

There is hardly a major country or major enterprise that does not have Magal's security specialists keeping a close watch on their activities.

Clearly, Magal is no small enterprise. While 27% of its total sales are in the Israeli market, its largest market is in North America, which currently accounts for 35% of its sales.

However, Magal's American outreach is expected to increase substantially, especially now that firm has set up a Washington, D.C. office which will promote its products to federal agencies and to the members of Congress who provide funding for federally-supervised security projects across the country at all levels: local, state and national.

And with current U.S. Homeland Security Chief, Michael Chertoff, not only a strong supporter of Israel but also the son of a woman who has strong Israeli ties-even including service with EI Al, the national airline of Israel-Magal, owned in part by Israeli Aircraft Industries-will be a clear-cut favorite in the eyes of the power brokers in official Washington who have the power to grant lucrative security contracts.

At the moment, Magal has four U.S.-based subsidiaries: two in California, Stellar Security Products, Inc. and Perimeter Products Inc., as well as the New York-based Smart Interactive Systems, Inc., and the Virginia-based Dominion Wireless, Inc.

All told, the Israeli company holds a 40% share in the worldwide market in perimeter intrusion detection systems and is working to expand its business in the protection of oil pipelines.

Magal is also said to be quite interested in guarding water lines around the globe, particularly in the United States. In fact, Magal may have an inside shot at getting a monopoly in guarding America's water supplies.

On July 19, the Bush administration's Environmental Protection Agency announced a "partnership" with the Israeli Ministry of National Infrastructures to improve what they called "water supply system security in the United States and Israel." Since Magal is so highly respected in Israel, it's an even bet that Magal will soon be guarding the U.S. water supply.

let me add -- investigators forget that 87 Israelis with top secret clearance badges were at Dulles International (Flight 77 took off) and Reagan National (flight 77 may have landed after flying over the crash of missile -- the runway being only one mile beyond Pentagon crash point) These Israelis had access to every part of both airports. They were arrested and then deported quietly to Israel (reported in back pages of major media) by Ashcroft a few months following the false-flag attack. It is pitiful that the 9-11 investigators (Alex Jones and most of the others) continually ignore this established fact. I'm not the best investigators but I am the one with a memory not influenced by "Jewish sensitivities" to certain 9-11 facts. -- Dick Eastman

Before sending this out, I went to Google and did a search on ICTS and what I found made my stomach queasy. ICTS is indeed an Israel company and although Ezra Harel died in 2003, the company, still Israeli, has expanded its business with a particular focus on the US where under its dummy Huntleigh Corp. it remains in charge of security for 37 airports. I call it a dummy company because it has the same Israeli management and board of directors as does ICTS, but I guess we are the real dummies since, it occurred to me while reading this article and looking up ICTS, that I don't recall any investigation of airport security at any of the airports that were used on 9-11.

There seems to be no disputing that the Israeli messaging service Odigo did receive a message two hours before the first plane hit that an attack would be made, as reported both in Ha'aretz and the Washington Post with no follow-up, and whether or not the Odigo employees were aware that fellow Israelis were responsible for security at the US airports, one would think that such a message would have been reported to their government officials who would have passed it on to Washington unless they did and both governments were in cahoots.

Is it not curious that there was no follow-up on that story as there were no follow-ups on the reports of the Israelis who had been videoing the attack from across the river in New Jersey and were subsequently arrested and identified by name as Mossad agents working for a phony moving company in the Forward of March 15, 2002? No, of course, it isn't curious. It's simply par for the course where Israel is concerned and Israel and it's US supporters are in control of the course. Members of Congress are merely their caddies. I would suggest that those who have their doubts about this, go to the ICTS link below and then to the Huntleigh site.-JB

All 9/11 Airports Serviced by One Israeli Owned Company

It's one of those times when an innocuous comment in an unrelated news report triggers a revelation.

In the article at <http://afrocubaweb.com/news/israelispying.htm> there is the following paragraph:

"To make the situation worse, a private security company called ICTS, owned by an Israeli, Ezra Harel, and registered in the Netherlands, was employed at Charles de Gaulle airport to screen passengers boarding US planes. Most of its personnel are ex-Shin Bet officers. The company covers security at Boston's Logan airport, where the American Airlines plane came down after flight attendants and passengers overpowered Reid."

The point of the article was that ICTS knew shoe bomber Richard Reid was dangerous, but allowed him on board a flight from Tel Aviv to Paris. Maybe they did and maybe they didn't. But the idea that an Israeli owned

company had inside access to the airport used to launch an abortive terror attack brought to mind the strange message Odigo Systems, another Israeli owned company with offices near the World Trade Towers, received that http://www.whatreallyhappened.com/9-11_warnings_odigo.html warned of the impending attacks before the hijacked planes had even left the ground.

So, I went back to another story that had surfaced briefly, reported at http://www.worldnetdaily.com/news/article.asp?ARTICLE_ID=26626 about how at least one hijacker had smuggled a GUN aboard one of the hijacked planes. Even prior to 9-11, getting a gun on board a passenger plane represented a serious lapse of security. I wondered why this story of a gun was being concealed behind talk of box cutters and screwdrivers.

Then I went back to the <http://afrocubaweb.com/news/israelispying.htm> first article and its mention that ICTS handled security at Logan International Airport, from which two of the 9-11 hijacked planes had departed.

Sure enough, a visit to ICTS' own web site at <http://www.icts-int.com/> confirms that ICTS is in fact an Israeli owned company, and that it sells services to every airport from which the hijacked planes operated, including security, sometimes through wholly owned subsidiaries like Huntleigh USA Corporation.

It has been suggested that the incredible feat of hijacking four aircraft without a single arrest at the gate would require the resources of a nation-state. This is even more true with the revelation that at least one gun had managed to be aboard a hijacked plane. One company had automatic inside access to all of the airports from which hijacked planes departed on 9-11, and to the airports used by Richard Reid, the shoe bomber. An Israeli company. One that Mossad agents could easily find employment with without the management knowing who they were or what their purpose really was.

But one thing is clear. By virtue of the Odigo warning, someone knew enough about the planned attacks to warn Odigo before the planes had even departed the airport gates, yet they did not call the Israeli security company at the airports which could have stopped the flights from leaving.

Think about that one for a while.

Hours before the House version of the first Patriot Act went to a vote, "technical corrections" were inserted into the body of the legislation whereby foreign security companies such as ICTS-International would be immune from lawsuits related to the events of 9/11. Talk about not being available for deposition! This "Patriot" act legislative sleight of hand occurred before the inception of the 9/11 Commission when Fearless Leader George W. Bush was still resisting the very IDEA of an investigation into 9/11. Hence, in the face of an institutional cover-up, citizens were denied the possibility of a discovery process which is normally afforded to litigants. Without such discovery process, ICTS-International would never be compelled by a court of law to give testimony and show evidence related to the missing airport video surveillance tapes of 9/11 or any other aspect of security measures in place on 9/11. [<http://www.rense.com/general68/dutch.htm>rense.com]

"Evidence linking these Israelis to 9/11 is classified. I cannot tell you about evidence that has been gathered. It's classified information."

US official quoted in Carl Cameron's Fox News report on the <http://www.whatreallyhappened.com/spyiring.html> Israeli spy ring.

"Investigators within the DEA, INS and FBI have all told Fox News that to pursue or even suggest Israeli spying ... is considered career suicide."

Carl Cameron, as quoted in <http://atlanta.creativeloafing.com/2002-03-13/fishwrapper.html> The Spies Who Came In From The Art Sale

CRITICAL U.S. GOVERNMENT AND MILITARY COMPUTER NETWORKS USING ISRAELI "SECURITY" SOFTWARE

Christopher Bollyn - American Free Press

The most critical computer and communication networks used by the U.S. government and military are secured by encryption software written by an Israeli "code breaker" tied to an Israeli state-run scientific institution.

The National Security Agency (NSA), the U.S. intelligence agency with the mandate to protect government and military computer networks and provide secure communications for all branches of the U.S. government uses security software written by an Israeli code breaker whose home office is located at the Weizmann Institute in Israel.

A Bedford, Massachusetts- based company called RSA Security, Inc. issued a press release on March 28, 2006, which revealed that the NSA would be using its security software:

"U.S. Department of Defense Agency Selects RSA Security Encryption Software" was the headline of the company's press release which announced that the National Security Agency had selected its encryption software to be used in the agency's "classified communications project."

THE WEIZMANN INSTITUTE

RSA stands for the names of the founders of the company: Ronald L. Rivest, Adi Shamir, and Leonard M. Adleman. Adi Shamir, the lead theoretician, is an Israeli citizen and a professor at the Weizmann Institute, a scientific institution tied to the Israeli defense establishment.

"My main area of research is cryptography - making and breaking codes," Shamir's webpage at the Weizmann Institute says. "It is motivated by the explosive growth of computer networks and wireless communication. Without cryptographic protection, confidential information can be exposed to eavesdroppers, modified by hackers, or forged by criminals."

The NSA/Central Security Service defines itself as America's cryptologic organization, which "coordinates, directs, and performs highly specialized activities to protect U.S. government information systems and produce foreign signals intelligence information. "

RESPONSIBLE FOR PROTECTING THE MOST CRITICAL COMPUTER SYSTEMS

The fact that the federal intelligence agency responsible for protecting the most critical computer systems and communications networks used by all branches of the U.S. government and military is using Israeli-made encryption software should come as no surprise. The RSA press release is just the icing on the cake; the keys to the most critical computer networks in the United States have long been held in Israeli hands.

AFP inquired with the NSA about its use of Israeli-made security software for classified communications projects and asked why such outsourcing was not seen as a national security threat. Why is "America's cryptologic organization" using Israeli encryption codes?

NSA spokesman Ken White said that the agency is "researching" the matter and would respond in the coming week.

American Free Press has previously revealed that scores of "security software" companies - spawned and funded by the Mossad, the Israeli military intelligence agency - have proliferated in the United States. The "security" software products of many of these

usually short-lived Israeli-run companies have been integrated into the computer products which are provided to the U.S. government by leading suppliers such as Unisys.

Unisys integrated Israeli security software, provided by the Israel-based Check Point Software Technologies and Eurekify, into its own software, so that Israeli software, written by Mossad-linked companies, now "secures" the most sensitive computers in the U.S. government and commercial sector.

The Mossad-spawned computer security firms typically have a main office based in the U.S. while their research and development is done in Israel. The Mossad start-up firms usually have short lives before they are acquired for exaggerated sums of money by a larger company, enriching their Israeli owners in the process and integrating the Israeli directors and their Mossad-produced software into the parent company.

RSA, for example, an older security software company, acquired an Israeli-run security software company, named Cyota, at the end of 2005 for \$145 million.

In January 2005, Cyota, "the leading provider of online security and anti-fraud solutions for financial institutions" had announced that "security expert" Amit Yoran, had joined the company's board of directors. Prior to becoming a director at Cyota, Yoran, a 34-year old Israeli, had already been the national "Cyber Czar," having served as director of the Department of Homeland Security's National Cyber Security Division.

YORAN HAD BEEN APPOINTED "CYBER CZAR" AT AGE 32 BY PRESIDENT GEORGE W. BUSH IN SEPTEMBER 2003.

Before joining DHS, Yoran had been vice president for worldwide managed security services at Symantec. Prior to that, he had been the founder, president and CEO of Riptech, Inc., an information security management and monitoring firm, which Symantec acquired in 2002 for \$145 million.

Yoran and his brother Naftali Elad Yoran are graduates of the U.S. Military Academy at Westpoint. Elad graduated in 1991 and Amit in 1993. Along with their brother Dov, the Yoran brothers are key players in the security software market. Amit has also held critical positions in the U.S. government overseeing computer security for the very systems that apparently failed on 9/11.

Before founding Riptech in 1998, Yoran directed the vulnerability- assessment program within the computer emergency response team at the US Department of Defense. Yoran previously served as an officer in the United States Air Force as the Director of Vulnerability Programs for the Department of Defense's Computer Emergency Response Team and in support of the Assistant Secretary of Defense's Office.

In June 2005, Yoran joined the board of directors of Guardium, Inc., another Mossad-spawned "provider of database security solutions" based in Waltham, Massachusetts.

GUARDIUM IS LINKED WITH PTECH, AN APPARENT MOSSAD "CUT OUT" COMPUTER SECURITY COMPANY LINKED WITH THE 9/11 ATTACKS.

Ptech, a computer software company in Quincy, Mass., was supposedly a small start-up company founded by a Lebanese Muslim and funded by a Saudi millionaire. Yet Ptech's clients included all the key federal governmental agencies, including the U.S. Army, the U.S. Air Force, the U.S. Naval Air Command, Congress, the Department of Energy, the Federal Aviation Administration, the Internal Revenue Service, NATO, the Federal Bureau of Investigation, the Secret Service and even the White House.

The marketing manager at Ptech, Inc. when the company started in the mid-1990s, however, was not a Muslim or an Arab, but an American Jewish lawyer named Michael S. Goff who had suddenly quit his law firm for no apparent reason and joined the Arab-run start-up company.

Goff was the company's information systems manager and had single-handedly managed the company's marketing and "all procurement" of software, systems and peripherals. He also trained the employees. Goff was obviously the key person at Ptech.

9/11 & "INTEROPERABILITY ISSUES" BETWEEN THE FAA AND NORAD

In the wake of 9/11, during the Citizens' Commission hearings in New York, Indira Singh, a consultant who had worked on a Defense Advanced Research Project, pointed to Ptech and MITRE Corp. being involved in computer "interoperability issues" between the FAA and NORAD. At this time Ptech's ties to Arabs was the focus, and Goff was out of the picture.

"Ptech was with MITRE Corporation in the basement of the FAA for two years prior to 9/11," Singh said. "Their specific job is to look at interoperability issues the FAA had with NORAD and the Air Force in the case of an emergency. If anyone was in a position to know that the FAA - that there was a window of opportunity or to insert software or to change anything - it would have been Ptech along with MITRE."

The Mossad-run Gardium company is linked with Ptech through Goff Communications, the Holliston, Mass.-based public relations firm previously run by Michael S. Goff and his wife Marcia, which represents Gardium. Since being exposed in AFP in 2005, however, Michael's name no longer appears on the company website.

Photo [in original story]: Amit Yoran, the Israeli "Cyber Security Czar" appointed by President George W. Bush in 2003. Yoran has held various positions since the 1990s in which he oversaw computer security for the Dept. of Defense computers.

Although he and his brother reportedly grew up in Pound Ridge, New York during the 1970s and 1980s, the heads of the Jewish community told AFP that they had never heard of him. One said that she had conducted a survey of the Jews living in the small village of Pound Ridge in the 1970s and she would have remembered if a wealthy Israeli family named Yoran had been found.

WHY DID THE LOCALS IN POUND RIDGE NOT REMEMBER THE YORANS?

Probably because they were NOT in Pound Ridge - but in Israel. The Pound Ridge address was used to give the appearance that the Yorans were Americans. I spoke with Elad and he has a distinctive Israeli accent - not what you would expect for a guy who grew up in a posh Yankee village.

So who are the Yorans? Who are their parents and why did they come to the United States?

To raise a couple high-level moles to infiltrate the most sensitive U.S. computer networks?

HOW COULD THEY HAVE LIVED FOR 20 YEARS IN POUND RIDGE AND NOT BE REMEMBERED?

(**I am infuriated that this keeps happening in this country.* [ME TOO!] The Fourth Reich is here guys. I am posting this article from an emailed source and hope that there are none out there that still live under the delusion that your government cares at all about you.**)

Lies - - - - -Lies - - - - -Lies - - - - -and more - - - - -
Lies!

The Enemy and the ones who must be deceived must not know the truth! Why then are Americans not being told the truth and are the ones being deceived???

The Executive Branch is in insurrection against the Constitution.

The Legislative Branch is in insurrection against the Constitution. (When not chasing their male Page)

The High Court has been Neutered, by Executive Order.

The land (Nation) is being unlawfully invaded.

REMEDY AND RECOURSE

All powers not specifically delegated by the Constitution are reserved to the People themselves. Why? Because when government cannot or will not act, the People MUST! Granted Powers are not exclusive! The same Authority granting the Power, can lawfully exercise that power, at will.

Article 1 § 8, Clause (15), (Powers of Congress). U.S. Constitution.

"To provide for the calling forth of the Militia to execute the Laws of the Union, suppress insurrections and to repel invasions."

Congress is Not exercising their Power and should be tried for Treason!

Article 1 § 8 Clause (16), (Powers of Congress)

"To provide for organizing , arming ; and disciplining the militia and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively, the appointment of the Officers, and the authority of training the militia according to the disciplines prescribed by Congress."

Congress has NEVER lived up to this Constitutional responsibility. And now, Congress In conspiracy with the Executive Branch and the States of the Republic, are in open rebellion against the Constitution. And We the People must act to protect our liberty.

Our own Governments have now become our own worst enemy! We the People, must call forth the Militia ourselves, or default on our claim of freemen, because we are permitting by our consent, our beloved America to become the worst tyrannical System on the surface of the Earth.

Americans! Call forth TO:

- 1) Execute the Laws of the Union!
- 2) Suppress the Insurrection against our Constitution by those in Political Office and government Agencies!
- 3) Repel the massive Invasion of our Nation!
- 4) Support our Military by seeing to it, that they each one comes home to a Constitutional Republic and not to a Socialistic or Communist Democracy!

We the People are the Home Guard of our Liberty! Never give up your personal Firearms. Even, if you must enforce Amendment II, by exercising your right to defend your Life, Liberty, and Property.

AMERICANS! STAND YOUR GROUND!

"The Missionaries go forth to Christianize the Savages - as if the Savages weren't dangerous enough already."

Archbishop Tutu told once: "The imperialists invaded Africa with a rifle in the one hand and a

Bible in the other, and taught us to pray with our eyes closed, and when we opened them they had stolen

our country from around us". "This is what is happening again today. Now it is dressed in the

clothes of liberalism and human values and democracy".

"The tragedy of modern war is that the young men die fighting each other instead of their real enemy back home in the capital."

"Societies are like Stew. If you don't stir it up once in a while, then the scum rises to the top."

"The Patriot must always be ready to defend his Country against his government."

"Our neo conservatives are neither new or conservative, but old as Babylon and evil as Hell."

"Anarchism is not a romantic fall, but a hardheaded realization, based on five thousand years of experience, that we cannot entrust the management of our lives to Kings,

Priests, Politicians, Generals, or County Commissions."

"In Social Institutions, the whole is always less than the sum of its parts. There will never be a State as good as its people, or a Church worthy of its congregation, or a University equal to its Faculty and Students." Edward Aaron Abbey 1927 - 1989
