### What Is The Message Here?

[Comverse Technology](#) was a hyped up tech company, and Jakob Alexander was a 'Krakow Swindler'. The stock market has been kept up to keep Americans happy. But we are nearing the end of the Jewish cycle of intrigue, and the final act is a nuclear event in a US city, and an economic meltdown, that gets blame on the Arabs.

He has fled to Israel, and no one will dare say boo. Iran is the final act before the collapse, and that can't be too far in the distant future.

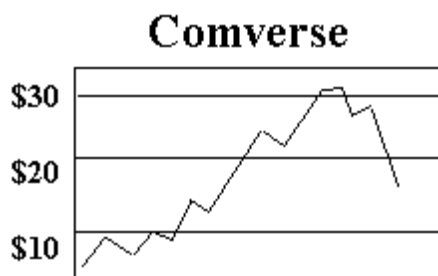

### What Did Alexander Do?

He predated his stock options so he could sell early.  
Why? Who knows, maybe there is some bad stock news, maybe there is a pregnant babysitter, or maybe he knows something about an Iran attack.

### Overpriced Stock

The stock sells at 60x earnings, but who knows how much Alexander fudged the books.

### Alexander's Compensation

He took [about \\$300 mill](#) since 1999

### How Stocks Are Valued

If the first 999 shares were bought for a \$1, and the 1,000th share was bought for \$10,000, the brokers tell you all of the shares are now worth a \$10,000 each.

Total shares	1000 shares
Last share price	x \$10,000
	=====
Company value	\$10,000,000

All that went in is \$10,999, and that's all that can come out. The \$10,000,000 number is a hoax.

## Other Stock Swindles

All you will hear about is the major ones like Enron, Tyco, Rite Aid, Health South, etc. There are countless smaller swindles, because of the people involved.

In New York there is an estimated \$20 billion in Medicare fraud, but no one is convicted.

## Presently Kobi Alaxander Is In Namibia

In 2006 Interpol arrested Kobi, and within hours the Namibia government gave him boil. He now sits in his seaside mansion, and the earliest extradition date is three years way. [3](#)

### **Kobi Is Suing Comverse**

Despite fighting extradition to the United States, Alexander announced on January 28, 2008 that he has filed suit against Comverse. Alexander claims the firm owes him \$72 million in severance, unexercised stock options, and bonus pay. [7](#)

### **This Is Just Another Zionist Scam**

They bought their stocks for \$2 and they will sell them for \$200. The money will come from IRAs, 401-Ks, and millions of little investors. The history books will say an Iranian attack caused the collapse.

Christopher Bollyn wrote an [interesting article](#) on Alexander's military connections, Odigo, and 9/11.
