I've linked directly to the story as reported by Corriere della Sera, a widely read Italian newspaper. The comments were published on November 30th.

Francesco Cossiga was prime minister of Italy from 1985 - 1992 and during that time he was forced to resign after revealing the existence of, and his part in setting up, Operation Gladio; a secret "stay behind" operation carried out by NATO in Italy after WW2.

I can only use google translate to get a bare bones translation of Cossigas comments. He is referring to an Osama Bin Laden video tape. The translation is as follows:

"From neighboring environments in Palazzo Chigi, nerve center of Italian intelligence direction, it points out that non-authenticity of the video is evidenced by the fact that Osama Bin Laden in it 'confesses' that Al Qaeda was the author of the assassination 11 September at two towers in New York, while all environments Democrats of America and Europe, with those at the forefront of Italian center, now know well that the disastrous attack was planned and carried out by the American CIA and the Mossad with the help of the Zionist world order accused the Arab countries and to induce the Western powers to intervene in Iraq and in Afghanistan."

If someone can speak Italian and wants to do a much better translation then that would be great. For those of you too impatient to wait for an Italian speaker to translate this then here is the link to the page translated by Google.

I found a wiki on Francesco Cossiga. Turns out he's also a professor of Law. He is certainly not a stupid individual...
