Rep. Marcy Kaptur (D-OH) warns the American people about Constitutional enemies of the Republic and the fraudulent trillion(s) dollar bailout...

*"My message to the American people don't let Congress seal this deal. High financial crimes have been committed."*

*"The normal legislative process has been shelved. Only a few insiders are doing the dealing, sounds like insider trading to me. These criminals have so much political power than can shut down the normal legislative process of the highest law making body of this land."*

*"We are Constitutionally sworn to protect and defend this Republic against all enemies foreign and **domestic**. And my friends there are **enemies**."*

*"The people pushing this deal are the very ones who are responsible for the implosion on Wall Street. They were fraudulent then and they are fraudulent now."*
