## GOOGLE'S 'ROBOTS' UNMASKED

May 7, 2008 at 8:30 am ([Censorship](#), [DesertPeace Editorial](#), [Internet](#), [Israel](#), [Palestine](#), [zionist harassment](#))

In Google's continuing attempt to silence the pro-Palestinian community on the Blogosphere, they have been claiming that it is 'Robots' that are locking blogs, not actual people. In a [post](#) I wrote yesterday I countered that claim with the charge that it is *a well organised cell of zionists at work*.

That very 'cell' I spoke of now openly confesses and are proud to make Google censor the anti-zionist websites!

*"In addition to illustrating the latest news and events listed on this Israel 60 mother of all blogs, we are optimizing this news and event blog as we do all news and feature content on the Israel News Agency. **The Israel 60 Birthday Website will combat Palestine, Iran, Nazi and Syria sites which have started to attack Israel's 60th birthday by enjoying a stronger search engine optimization (SEO) marketing and public relations ranking on Google and appearing throughout the Net using all of the tools of Web 2.0.**"*

The above is taken from the official site of [The Israeli News Agency](#). They further state that...

*A long list of celebrities will be coming to Israel for the Israel 60th birthday anniversary celebrations. They include: [...] , social networking Web site Facebook founder Mark Zuckerberg, **and Google co-founder Sergey Brin.***

So was I crying wolf? Was I creating some far fetched

conspiracy theory when I made my claim? I think the answer to that is pretty obvious. More on Google censorship can be read in [THIS](#) BBC report. A detailed report on how this censorship works is found [HERE](#), a most interesting read.

As I was writing this post, news of Google's latest 'victim' was made public... [Axis of Logic](#), another 'truthspreading medium' joins Uruknet in being removed from Google's News links. Just what are they trying to hide? The following is the announcement from their editors.

**Axis of Logic Cut Off From Google News**  
Vincenzo Viscuso, -URUKNET and Axis of Logic

**AXIS OF LOGIC**  
FINDING CLARITY IN THE 21<sup>ST</sup> CENTURY MEDIAPLEX

May 6, 2008

**Editor's Note:** Google News has again cut off URUKNET, one of the most reliable and important sources of news on the war in Iraq. Google has systematically and persistently sabotaged revolutionary websites like URUKNET, nor is URUKNET the only victim of their censorship. Axis of Logic has also been cut off from Google News distribution. We support this appeal from URUKNET as we have in the past. Please click on the link provided near the top of the article below to register your complaint. Bombard Google with emails until they reinstate both, URUKNET and Axis of Logic to Google News. Meanwhile, you as a reader can become a distributor of our articles by sending them to the millions in your collective list-serves and email correspondence. Thank you for your important participation to keep the alternative media free of censorship.

See: [Censorship of the Alternative Media on the Internet](#)

All Zion's little helpers will have to deal with the bed as they have made it. Laying down is easy. I see BIG fix in an as before un-thought of peril to mess up there little scams. A fix so effective this "ISRAEL" garbage as it is now will be all cleaned up. A fix the collective man will eventually have to enforce by force of mass peace.

If you want to help.... STOP helping zion builders and LEARN of the mess the world is in today. Your help is working as a whole to halt the Death/Greed cycles of now and the near future.

Zion is dead UNTIL the israeli gets the msg. about the need to be good ABOVE all other.
