Israel Is Terrified Americans Will Write-In Ron Paul
by x *Saturday, Sep. 13, 2008 at 10:02 AM*

Last Chance.

The movement to write-in Ron Paul instead of electing the two israeli/mormon candidates is picking up speed, and this is just something that is happening of its own accord, as the israeli media tries to push the unbelievable and despicable on Americans once again. People are waking up to the bush/israeli treason and, in fact, Americans are getting their noses shoved in it, even the idiot fundamentalists who put bush in and are now trying to deny they had anything to do with it.

Every time those lying fools go to the gas station they must now face their folly, and their own treason, whether they like it or not. These holier than thou twits put lords and kings above Americas well being and now we have a depression as well as a police state and ultra surveillance everywhere.

The phone companies are now using their blanket immunity to spy in new and pervasive ways, they are like kids in a candy shop and the unAmerican anti-privacy of companies like valley telecommunications, the mormon controlled phone company here in sw nm, is putting new bugs and wiretaps EVERYWHERE. Video cams with monitors are being installed on activists as well, by the israeli party and the operatives of their two Candidates.

NM is known for the mormon welfare state here, and most of those types are being paid by dhs to spy and snitch on their neighbors for their lord. Many web sites are experiencing disruption, and many netizens are now seeing that a lot of this has been just a concerted attack on the net, to disrupt commerce and deny activists a means of making a living.

As israels next dramatic charade nears (The elections) expect much more spying by the mormon church and their israeli counterparts here (Mossad/CIA/KGB/FBI/DHS/SUK/ASS). Also, watch israel do their best to start more wars and create false flag terrorism. Many sites are being harassed, passwords stolen, and worse. To understand the true measure of israels mind control police state here and now, read the book DEVILVISION:

http://www.luxefaire.com/devilvision/tableofcontents.html

http://www.theedgeam.com/interviews/Thursday_1st_May_2008.mp3

And do write in Ron Paul. Tell everyone you know. Last chance, America.
