PROOF OKC BOMBING FBI ATF Govt OP April 19th 1995

April 19, 2008

PROOF OF OKC APRIL 19TH 1995 WAS AN FBI / ATF BOMBING SPECIAL OPERATION

Dr Bill Deagle MD

April 18th 2008

May 1st 2008 is a special day for Jesse C. Trentadue. This is the day he finds out if a Federal Judge permits an already mandated Video Deposition to take place of Terry Lynn Nichols.

In Feb 2007, Jesse C. Trentadue Attorney, spent one and one-half days with Terry Lynn Nichols, obtaining his deposition. In it, he stated that there were many other parties involved and that the operations were overseen by FBI. Jesse won a Federal injunction allowing a video deposition of Terry Lynn, but the US Dept of Prisons and FBI had filed motions to quash his video deposition of Terry. May 1st 2008 is May Day for the Old World Disorder, as this Video evidence will demand finally a Grand Jury, that will make complicit two and possibly three Presidencies, FBI, ATF, and US State's Attorney in Colorado, Arapahoe County Sherriff, and many more.

"On March 20, 2008, Plaintiff receive from the FBI's Philadelphia Office documents relate to information provided by informants to the FBI regarding: Tim McVeigh, Elohim City, the Aryan Republican Army or 'ARA', OKBOMB, BOMBROB, Richard Lee Guthrie and the Mid-West Bank Robbers, one of whom was Mark Thomas." ... " Donna Marazoff is or was the girlfriend of Mark Thomas and the mother of two of his children. The Court will recall that Thomas was a member of the Mid-West Bank Robbery Gang, a member of the Aryan Republican Army."

"With this background, the Marazoff 302 is very significant. In this 302, the FBI documents that Marazoff reported that prior to February of 1995, she and Thomas had been discussing the federal government's involvement in Waco and Ruby Ridge. According to Marazoff, Thomas became "very irritated" during that conversation and said: "We are going to get them. We are going to hit one of their buildings during the middle of the day. It's going to be a federal building. We will get sympathy if we bomb the building"[T]he people who will lose their loved ones, will realize how bad it feels." (Marazoff 302) (emphasis added).

"Interestingly, Thomas and the other Elohim City, ARA and Mid-West Bank Robbers crowd do not seem to have been subjects of interest to the FBI when it came to the bombing of the Murrah Building, and one has to wonder. Why? The answer to that question may likewise be the basis for the FBI Defendants' suspicious of Plaintiff's reason for advising the Court about this recent release of additional informant documents. This Saturday will be the 13th anniversary of the Bombing. That attack was the biggest act of domestic terrorism in the 20th Century and resulted in the deaths of 168 people, including 19 toddlers as well as hundreds of injured victims. Perhaps this approaching anniversary is why FBI Defendants' are so suspicious and wary of the motive behind Plaintiff's filing of the Notice of Release. But, if Plaintiff wante to present FBI Defendants in a bad light, he would have included the Marazoff 302 and similar FBI documents in his Notice of Release of additional informant documents. Dated this 17th day of April, 2008. -- Jesse C. Trentadue; Pro Se Plaintiff "

As Exit Medical Examiner at CCOM, St. Francis Hospital, I personally examined all five Special Ops Bomb Forensics Military Officers. One of the officers spent several hours provided extreme details of the scene, cause of the demolition and operational control of the site by Wakenhut Security. He wanted further testing from positive radiation exposure, and told me how the entire operation was run by FBI and ATF and how all their bags were weighed and scanned for radiation traces of removed debris particles and chunks. They were warned, "Don't remove any material from the site or we will track and kill you." When it became evident that he told me this information, he was court-martialed and I was summarily fired and threatened.

Your stomach wretches when you read the attached Marazoff 302 documents, the depos of Terry Lynn Nichols, death row Oklahoma cohabitant David Paul Hammer, Kevin Lagan, etc. and the news of additional bombs removed from the US Federal Murrah Building by local news. It is evident that a comprehensive criminal cover-up was and had been continued by FBI and the Dept of Prisons trying to block the video deposition of Terry Lynn Nichols. Terry's deposition is quite damning, and lined up

with my affidavit attached and these other documents. We need a Grand Jury to obtain suppressed videotapes around the building and safe harbor for other whistleblowers to come forward for a new OKC Murrah Demolition investigation.

As we remember the Battles of Lexington and Concord on April 19th, 2008, Patriot's Day, remember it also memorialized the dates of OKC, Ruby Ridge and Waco in our souls. Only with a Grand Jury and indictments will we be free of future OKCs, 911s, and the nukes activated in multiple US Cities or release of pandemic death. OKC Murrah revelations are the 'can-opener' of 911 WTC Demolition. National crimes were committed with advanced explosives, micro-nukes, and thermate. A 'real 911 WTC Full Grand Jury Investigation' must follow swiftly and in parallel with the OKC revelations presented here on the 13th Anniversary of the OKC Murrah Demolition. It was the self-inflicted wound of OKC and 911 that propelled the USA into two and now a possible third unjustified and illegal war, blown the US Dollar and economy, and brought the world to the brink of WWII.

Let us take a deep breath of hope, and invigorated with courage step forwarded into a tomorrow. A day when the 'terror state' is dismantled, national IDs and North American Union are bad memories and adventurous wars promulgated on self inflicted terror will never more happen in this great United States of America.

Jesse Trentadue - Sunday, April 13th 2008:

"This story about my brother's murder and that crime being linked to the Oklahoma City Bombing is not lengthy. Neither does it contain much detail. But it is significant. It is significant because it is an Associated Press story relating this account of my Brother 's murder and the complicity of the federal government both in that crime and the Bombing. This would have been unheard of just a short while ago. It shows how far we have come in getting the truth out." eMail Sunday, April 13th 2008 to Dr Bill Deagle MD ... Pull full Documents NOW !

Micronuclear Devices Used in OKC Bombing: Explosives Placed by FBI, ATF

Sent to Jesse Trentadue, Atty re Suit Against FBI and US Gov't for Wrongful Death of His Brother by FBI in 1995 around OKC Gov't Sponsored Bombings

Dr. Bill Deagle MD | September 8 2004

Note: This article is presented as it was received, with no editing. www.PrisonPlanet.com Postng Alex Jones Show

In 1995 I worked at Penrose St. Francis Hospital in Colorado Springs, as an Occupational Physician for CCOM. We had many of the most classified contracts in the Colorado Springs area, including Falcon Air Force Base program employees, NORAD employees and classified ATMEL and Symbios Logic, etc. EMP proof and Supercomputer chip classified manufacturers.

My director, Dr. George Swinder MD, was unavailable when the Military Expert Forensic team was sent from Fort Carson to Oklahoma city and was just returning to the Springs for exit examinations. This duty fell to me to perform exit physicals and testing, for all five members of the team. One of the team requested sperm testing, stating, "I want to have kids." I replied sarcastically, "Go ahead, and have kids." He said, "No, you don't understand." I said, "What do you mean?" "Doc, you really don't know what happened at Oklahoma City do you?" I said, "Well I heard that an ammonium nitrate bomb was reported to have exploded killing 168 people."

He leaned forward, "See this rash on my arms, and chest, and legs. Check me doc. I want all the blood tests and do a sperm test." I was irritated now, "Now just a minute, I'm the doctor. If you don't come clean and tell me what you were exposed to I can't possibly know what type of tests to order. I was a biochemistry major, before going into medicine, and we do toxicology testing when there is suspected industrial exposures that put an employee in danger." He said, "You won't release my name or put this in your report to my superiors, will you. I know about doctor-patient confidentiality." "Well," I said, "I won't release your name, but if affects others, I can't say I won't release the information to the correct authorities."

"Doc, what happened in Oklahoma City wasn't caused by ammonium nitrate bomb in the small truck they say was parked by the building." "What are you saying?", I snapped back. "See this rash, it was caused by radiation. We broke three radiation detectors there. See, we were the same team that was sent to Riyadh, Saudi Arabia and the bomb only blew the windows into the building. We estimated the explosion was by our calculations to be seven times more ammonium nitrate in that truck bomb. The whole front of the building was sheared off doc in Oklahoma; cleanest controlled detonation our munitions expert forensic team has seen ever." "What!!", I blurted. "Yeah, we were examining the building site under Wakenhut armed guard, and told not to take any radioactive debris off the site, or they were ordered to shoot on site to kill. All our bags were searched and put through a detector, to make sure we didn't take any off site, or away from the place where they buried and concrete capped all the debris, again under armed Wakenhut guard." "You are telling me that the building was exploded with a nuclear device?", I said. Shaking with a now very pale and distant face, he grunted, "Yeah!". "Oh my God!, and how did this happen?", I inquired.

"There were micronuclear bombs placed on support pillars in the walls of the Federal Building, by special units of the ATF and FBI. They were paged out not to enter the building on the morning of the detonation, and the Federal Judge was warned to cancel court that day. We removed to undetonated softball sized micronuclear bombs, and one C4 pineapple bomb, attached to the pillars of the remaining building." "I can't believe this story!", I blurted. "Well, doc are you going to test me?", now sweating and shaking more violently with anguish at these revelations. "I will order some more tests of your blood cells that will rule out radiation effects on your blood cells and bone marrow. As for the sperm count and morphology testing, you need to just go to your primary family doctor's office, and I am sure he will do this for you. Call me with the results, and I can interpret if there are any abnormalities." "Ok" Looking relieved, "thanks for listening to what happened to us doc."

This story dialogue was very disturbing, and I told my wife Michelle that night, placed the information of the 'shelf', and hoped that he was lying, but I had an aching feeling of serious doubt that continued until other events proved to me he was right on with the details of the Oklahoma Murah Building detonation by the NWO.

ADDENDUM:

April 23rd 2007

During my interview with the Special Ops officer mentioned that there were high velocity cutting charges in the building, placed by special ops wacco units of FBI and ATF. This same officer requested recommendations for testing to rule out damage from radiation exposure. He had used three radiation detectors that had gone off the scale and they also had identified Tritium isotopes confirming micronuclear devices. He identified them as US Army Corp of Engineers 1/10th Kiloton Micronukes with low yield radiation, high EMP and blast to crush to nanoparticles the building concrete and materials. Two unexploded micronuclear devices were removed of this type from the building. All the debris was removed under armed Wachenhut private guard, and he was told that if he removed any radioactive debris, all his personal equipment and uniforms were scanned and weighed on and off the OKC site. This officer stated that if he removed any materials he would be tracked and killed by direct threat from the senior FBI and ATF. Months later, October 1995, when he was found to have leaked

this information to me my colleague Dr Ogradnick MD was cracking jokes cocking his finger that "Your dead Deagle... They know what happened when Schwinder was away.." . He was apparently court-martialed and the next day I was fired, after a discussion, "I want a letter of reference and a check and if you kill me I have a safe of classified materials I will drop on you from the grave. If you come within 500 miles of me or my family, I have friends who will be very upset and they will take action..". This conversation was directly with Major George Schwinder MD face to face.

This is as close as I can recall the truth of the time sequence of event after the OKC Ft. Carson Speial Ops Forensic Munitions team returned for exit examinations from the scene of the OKC Murrah Bldg. in April 1995.

Hammer David Paul - Secrets Worth Dying For - Timothy James McVeigh and the Oklahoma City Bombing

Timothy James McVeigh provided the information contained within this book to us during the time he spent with us here on death row at the United States Penitentiary in Terre Haute, Indiana. We engaged in various projects on Tim's behalf, and at some risk to ourselves, in order to gain his trust or a semblance thereof, and his cooperation with the writing of this book. Some might even say that we bartered with him. Our associations were not always amiable, there were intense disputes and allegations of broken promises and even treachery, but in the end the necessity for cooperation won out. This was needed to advance McVeigh's agenda.

Our conversations took on many forms during the twenty-three months spent living together in a unit designed for the condemned. These conversations and communications ranged from debates, arguments, chatter, gossip, idle conversation, explanations, question and answer sessions, and even confessions by McVeigh.

It stands to reason, given the segregation of those housed on this unit, that we spent more time with McVeigh, than anyone else, during the last two years of his life. Some of the information revealed to us was previously provided to outside sources in February of 2000, by way of tape-recorded telephone calls. Additionally, we provided information to reporters by way of letters in late 1999 and early 2000. This all occurred just prior to the January 2000 face-to-face interviews between reporters Lou Michel, Dan Herbeck and McVeigh. Those interviews were conducted here on January 14, 17 and 18, 2000.

It should be noted that Tim McVeigh was fully aware of our intentions to write this book about our interactions with him. His agreement to assist us and to provide details was contingent upon our not writing about, or publishing the information in book form, prior to the publication of his 'authorized biography,' which he wanted to be titled 'American Patriot.' That book, written by reporters Michel and Herbeck in early 2001, was instead titled, 'American Terrorist.' While it was not the exact biography McVeigh had hoped for, it did contain a version of events portraying him as a 'lone wolf terrorist,' responsible for planning, financing, and carrying out the Oklahoma City bombing almost single-handedly. That is the picture he wanted the public to believe while he was alive, for, in his mind, he would remain a true and loyal soldier until the very end.

We have honored all aspects of our agreement with Tim McVeigh. That includes naming a chapter in this book "Blood Makes the Grass Grow." This title comes from the cadence uttered by his platoon, during basic training at Fort Banning, Georgia. We have elected to leave out the "Kill, Kill, Kill!" line of that cadence.

Wherever possible, the authors have attempted to verify the information provided to us by McVeigh. We have done so via our contacts on the outside. Because of our incarceration and the slow process of verification, this book has taken almost three years to write. We offer this version of events relating to the bombing of the Alfred P. Murrah Federal Building in Oklahoma City, Oklahoma on April 19, 1995, because the public has just as much right to know McVeigh's secrets as they have to know his so-called 'authorized lone wolf version.' We offer his accounts only for what they are worth, that value is left up to you, the reader, to decide.

DEPOSITION TO JESSE TRENTADUE IMPLICATING TIMOTHY McVEIGH WITH FBI OKC BOMBING IS ATTACHED IN pdf FORMAT !

[OKC Nichols Feb 2007 Depo Trentadue FBI INVOLVED !](#)

This deposition was taken by Jesse Trentadue Atty from Terry Lynn Nichols who supports FBI total control and complicit control of Timothy McVeigh in completion of the OKC Murrah Bldg April 1995 Bombing. Video Deposition Orders were filed Sept 21st 2007 by Trentadue in Federal Court and granted by the court Federal Judge to proceed with David Paul Hammer and Jesse Trentadue.

[OKC Peter Kevin Langan Depo FBI OKC Bombing Involvement](#)

Peter Kevin Langan provided his deposition to Jesse Trentadue Atty providing evidence for Timothy McVeigh Federal involvement in OKC Murrah April 1995 bombing. This correlates with Terry Lynn Nichols and David Paul Hammer's and my affidavit filed in Spril 2007 and sent to Jesse Trentadue to obtain Video Deposition Federal Orders which he succeeded in Sept 21st 2007, for Terry Lynn Nichols and David Paul Hammer to provide further video evidence of Video proofs supporting written depositions provided by these men, now in US Federal Penitentiary Systems, and affiliated in direct and indirect ways to Timothy McVeigh.
