## 1,280 Architects and Engineers Launch Third Light Beam into NYC Night Skyline on 9th Anniversary of September 11th

### Represents WTC Bldg 7's still-officially-unexplained free fall collapse and explosive implications

NEW YORK, Sept. 11 /PRNewswire-USNewswire/ -- At 9:11 p.m. on the 9th anniversary of the September attacks, the members of the 1,280-strong [Architects & Engineers for 9/11 Truth](#) (AE911Truth) lit up the skies over Manhattan with a towering 2-billion-candlepower beam of light to raise public awareness that *three*, not just two, World Trade Center high-rise buildings collapsed symmetrically at near free-fall acceleration on 9/11, though only two were hit by planes. Three Beams image at [www.ae911truth.org](http://www.ae911truth.org), main page upper left.

"Why is there a *Third* Beam in my skyline?" New Yorkers are asking themselves tonight.

AE911Truth founder Richard Gage, AIA, answered that question earlier in the day at a 2:00 press conference in front of the entrance to the now-rebuilt WTC 7 where he was joined by 9/11 victims' family members, members of [NYC CAN](#) (New York City Coalition for Accountability Now) and an audience of hundreds of concerned citizens from NYC and across the country.

"The people of New York need to see the light that a *third* WTC skyscraper not hit by any plane was destroyed on Sept. 11th and that they have been deceived about what happened on that terrible day," he said. "Tonight we are shining the spotlight, literally, on the fact that the official story of what happened at Ground Zero simply cannot be true and that a new, truly independent investigation is needed. This new investigation is needed both as a matter of national security and as the key to real justice for the victims of the Twin Towers."

"So look into the NYC evening skyline tonight at 9:11 and ask yourself this question: "What can I do to shine a light of truth and justice for the family members and first responders?"

Gage is in NYC Sept. 11 and 12 to speak at a live-streamed symposium on "[How the World Changed After 9/11](#)." This event at INN World Report, 56 Walker Street, Lower Manhattan, features national and international leaders of the 9/11 Truth and accountability movement.

"Architects & Engineers for 9/11 Truth are here to give any and all press and media all the technical support you need in order to break this story of the crime of the century," Gage said. "The real story is not about the Islamic Cultural Center, which is a red herring fed to the media to keep New Yorkers emotionally occupied while the crime of the century -- the explosive demolition of *three* World Trade Center skyscrapers on 9/11 -- goes almost completely unquestioned."

"Building 7 is a smoking gun of the WTC crime scene. We hope that after tonight, New Yorkers will realize this and see what happened here on September 11th in a whole new light."
