People need to wake up! Corexit is killing the Gulf at an alarming level and yet the corporate news is **still** taking very little notice. Recently, we have seen an influx of reports by local mainstream news, a clear sign that these chemicals are having such a profound effect that local news stations would basically become irrelevant if they didn't report on Corexit9500.

British Petroleum's own documents show that there are **TWO wells**. The American people are being lied to at every corner! The Intel Hub has received hundreds of tips from concerned citizens who are either sick themselves or personally know someone that is sick.

Scientists have concluded that orange blobs in the bodies of tiny Blue Crabs Larvae have detectable amounts of Corexit9500! The report went on to claim that the dispersant may actually do more harm than the oil would have done if it was left alone.

Meanwhile, Monty Graham, a biological oceanographer from Alabama has gone on the record with some startling information.

The dispersants used by BP are preauthorized for the handling of oil spills, but they're usually used to handle spills of 100 barrels or less, Graham said. According to media reports, more than 1.8 million gallons of dispersants have been applied to oil leaking from the Deepwater Horizon site.

"They're using them in quantities that have never been imagined," Graham said. [Article](#)

In the first part of the [article](#) that was posted on AmNews.com, the author, Ben Kleppinger had this to say:

Created partially by adding nearly 2 million gallons of secretive chemical dispersants to scores of millions of gallons of leaked oil, the monster floats beneath the surface, creating oxygen-free zones that are toxic to almost all life....

To top it off, The [Washington Post](#) published an article titled, " Documents indicate heavy use of

advertisement

Dispersants in gulf oil spill." While this article mainly focuses on the BP's refusal to stop the aerial spraying of Corexit9500, it at the very least brings this danger to the forefront.

Aaron Viles, at the Louisiana-based Gulf Restoration Network, said the Obama administration gave the impression of controlling the controversial dispersants while allowing their use to continue. The result, he said, was that more oil sank out of sight and out of reach of the cleanup operation.

How much longer are the people of America going to take the outright chemical rape of the Gulf?

You will “never get me to hate the british people”! I for 1, was born in Stradfordshire,England!
 Anyways, it's all about, “Trans-National Corporations”, not disimilar, to “The United States of America,
 Corporation.

Based in a ‘state within a state’, washington, d.c.. This being founded in 1861. And NOT, 1776!

I want to tell you a story. It's about the Revolutionary War. During that time, Queen Elizardbeth couldn't
 get the British soldiers to go to America, to fight/kill their relatives. So, H.M. hired Khazars, to replace
 the British soldiers. Knowing that the Khazars, were “blood thirsty warriors, without a conscience”! And
 the rest, is history.....

Its a horrible injustice that has happened in the Gulf region. The American Government has been totally
 taken over by the International Bankers and their Illuminati kingpins who will eventually rule the whole
 world and make all of those who survive the wars; to take their zombie making and mind controlling
 mark of the beast chip in their foreheads or right hands.

But before this will happen; these hell bound devils will collaspe the economy of Amnerica so that they
 can totally enslave us and make us their zombie like creatures of dependance and serdom.

But don't worry!! The Great God of Heaven will allow them to even kill and martyr His Children who
 wouldn't take their zombie making mark of the beast chip. And then He will rain down His mighty
 plagues upon them and their beast chipped zombie subjects and slaves. And even their trillions and
 trillions of dollars in stolen loot; won't be able to deliver them from these mighty plagues!!

And we that know Jesus and have died will be looking down at this great tribulation period and we will
 be living like gods and goddesses in heaven. Until we return from heaven to earth with Jesus Christ and
 His mighty angelic armies. And we will defeat them all in hours; and have them before our Almighty
 Father Gods Great White Throne Judgment. And then the great lake of fire and brimstone will be

scorching them and making them scream in the greatest agonies imaginable forever and ever and ever!!

The entire Board of Directors of BP needs to be given a boat ride out to the Gulf, given life preservers and then summarily thrown overboard. That will be a small retribution for the carnage they have caused.

If they can swim back to the boat, fine. If they by chance succumb to the chemicals and toxic fumes, oh well. It's what they had in mind for everyone else. You know, the 'small people'.

this is not what you are being told. the true agenda is the destruction of the human food chain and is a longterm plan, part of the "generated crisis" foretold by biden before the election of the usurper muslim you now have as your president. The queen of england owns b.p, and is the head repto who ordered this crisis. The rest is pure smoke and mirrors. the destruction of the human race is the goal, and will be accomplished by mass poisoning of the ocean. Once the eco system of the sea collapses, the land will follow quickly. This operation is being conducted on purpose. wake up.

Corexit's essentially anti-freeze ethylene glycol; those blue crab-imbedded orange globules ARE the VISIBLY detectable amounts of radiator Coolant toxins. Compare the color yourself in your new car reservoir, then read the label, TOXIC to pets and wildlife; not to mention, US!
