A retired [FBI agent](#) has come forward with evidence that [President John F. Kennedy](#) was not killed by Lee Harvey Oswald in [Dallas, Texas](#) on Nov 22, 1963.

The Korean War veteran and retired FBI agent, Don Adams, was interviewed by a FOX 8 news reporter. He told the reporter that he worked as an FBI field agent in Thomasville, [Georgia](#).

Adams, who is now 80-years-old, told the reporter that one of his assignments was to investigate "one of the most violent men in the country," Joseph Milteer.

Adams had an informer who recorded a conversation with Milteer just weeks before the assassination. In the tapes the extreme right radical, with links to the KKK and States Right Party, can be heard talking about the best way to shoot the President. He says the prime location "is from an office building with a high powered rifle."

Agent Adams and his team located Milteer in Quintan, Georgia on November 27, 1963 but the Senior Agent would not allow a proper investigation.

"I said, 'Boss wait a minute, we have an opportunity to elicit tremendous information from him' and he replied 'five questions and nothing more'," said Adams.

Milteer was asked if the President was going to be assassinated. He replied "Oh yes. It's in the works."

It is Adams belief that this information should have been enough for the FBI and the [Secret Service](#) to have stop President Kennedy and his wife from travelling.

After the assassination had been carried out Milteer was "jubilant" and bragged about it. He said "You thought I was kidding when I said he would be killed from a window with a high powered rifle."

Milteer was never mentioned in the Warren Commission Report which investigated the assassination. The report from FOX 8 said "Adams suspects Milteer was definitely involved in President Kennedy's death, but he says Oswald absolutely was not."

WatchJackie, correction: Jackie's body guard was SSA Clint Hill, not Clint Walker.

WatchJackie, All major nations know how to use scapegoats (false flag operations), NOT only Israel. Why do you feel the need to "scapegoat" Israel in the JFK assassination?--As for the JFK assassination, the proof that it wasn't Israel is the Secret Service stand down. Google: altgens photo. In the first photo, JFK can be seen to have already been hit in the throat (you can see JFK's hands holding his neck), while his Secret Service (SSA) protection traveling in the chase car are either looking directly at JFK as the president struggles, or are playing dumb by looking behind them (or to the side in the case of one SSA). Of course, standard operating procedure would have JFK's SSA run to JFK's limousine to protect JFK from any further bullets. One SSA does run to JFK's limousine, but only AFTER JFK's head is blown off, and only because Jackie has crawled out of her seat onto the back of the limousine. By the way, the SSA that does run to the limousine (though when it's too late) was SSA Clint Walker. SSA Clint Walker was Jackie Kennedy's body guard, which means not one of JFK's body guards in the chase car moved one muscle to assist the President. They remained in the chase car (or standing on the side foot stands) until arriving at Parkland Hospital.

Zionists know how to use scapegoats like they did Islam on 9-11; I wouldn't put it past them to use right-wingers in Dallas (J.D. Tippit?) as snipers. Lots of low lives were involved. LBJ may even have recruited Jackie herself. (Watch her closely on the Z film in slo-mo.) American Hero Oswald was shutting down CIA anti-Castro guerilla training camps in Fla so they took him down, too & Hoover looked the other way. U.S. transformed in a day, never to recover. R.I.P. U.S.A.

JFK's autopsy affirmed that the first bullet to strike Kennedy was between 45-60 degrees. The Warren Commission said it was 16 degrees. What did the Warren Commission know that Dr. Hume didn't? The commission knew that Oswald was the lone assassin, and 16 degrees was the angle that matched Oswald's position ...on the sixth floor of the TSBD with that of JFK's upper back! When the Secret Service returned JFK's limousine to Washington, D.C. they found two large bullet fragments still in the vehicle. One fragment was the top portion of a bullet and the other fragment was the rear portion of a bullet. The Secret Service said that both fragments came from different bullets. Well now, of the three bullets said to have been fired at JFK, one missed, and the third bullet disintegrated when it hit JFK's head. That leaves only one bullet left, the bullet that hit both JFK and Connally. Now, the Secret Service said the two bullet fragments found in JFK's limousine came from two different bullets, which means that only one of those fragments could have come from the bullet that hit both JFK and Connally. That means that there was a fourth bullet fired, which CONFIRMS a conspiracy to kill JFK.

"Miltreer has always been one of the "usual suspects" among conspiracy theorists. But since Adams has nothing but hearsay on his side, we'll just have to go on understanding that a Communist shot President Kennedy. Sorry, wingnuts! you're so funny--even the stock phrase "conspiracy theorists." The "Communists shot him" is the official theory and it's by far the silliest. I remember it. Shot at lunch time and all wrapped up by dinner. Yeah, right. You're the "nut." Or maybe just perpetrating disinfo. After the massive research done since the mid-60s by people who knew better than to trust the Warren Commission (stocked with JFK's enemies,btw), you'd be less nutty believing in the tooth fairy and than the Official Conspiracy Theory. btw, tooth-fairy-believer, Do they pay you or are you a comrade of E. Howard Hunt?
