CDC survey of Gulf residents finds 50% of households experiencing respiratory issues within the PAST 30 DAYS — Feds suggest to "focus on mental health"

SEPTEMBER 27TH, 2010 AT 08:50 AM

After oil spill, depression and stress levels rise in coastal Alabama, Press-Register, September 27, 2010:

12 tweets 37 Share retweet

Excerpts

An emergency survey\* conducted door-to-door in coastal Alabama confirmed elevated levels of depression and stress following the oil spill and also detected possible effects, such as respiratory ailments...

- At least half of the households queried in both counties had at least one member experiencing respiratory issues within the past 30 days. ...
Respondents were encountering more physically or mentally unhealthy days than people in earlier statewide surveys.
"The increased prevalence of negative quality-of-life indicators, depressive symptoms and symptoms of anxiety," according to the CDC report, "suggest that resources should focus on mental health intervention and follow-up surveillance."

\* The survey, by the Centers for Disease Control's national Center for Environmental Health, is based on responses from 128 households in south Mobile County and 168 in south Baldwin, both in Alabama.

When these folks start dying or developing cancer, I suppose that will be “mental health” issues as well. Hey, perhaps that’s why millions of fish and other aquatic animals have died as well! Mental health ... that explains it all! How could we have been so dense as to not notice this before!?

I am so thankful for our sagacious and compassionate American government. They really DO know better than we do! And to think I thought they were all corrupt, evil assholes who deserve a fate worse than death because of their sick, lying, sadistic, cock-sucking ways ... And all the time it was I who was mistaken!

Daniel Hughes  
I know you didn't intend to be humorous with this witty round of sarcasm, but LOL.  
But seriously, you made the point very nicely.

Wow, the CDC just gave us a “let them eat cake” experience.

Trust your direct experience.  
Slam your door in the faces of their “psychological help” what an insult to anyone’s sensibilities!  
Corporate caused DEATH, Illness, economic devastation is cause for direct prosecution of the criminal perpetrators.  
THIS WILL NEVER HAPPEN.  
They would have you visited by a psychologist than a DOCTOR or pay for your LOSSES which can never be repaid in dollars.  
They will not support DETOXING or do any recognizably decent cleanup or financial recompense which would add up to millions per person.  
Never allow these demons to define your reality.  
The Gulf in it’s entirety as a multi life form has been Genocided by corporate- domestic and international psychokillers.

Please flee the Gulf region, you are not only being poisoned to death, there is going to be a huge methane explosion and tidal wave that is going to kill millions, the concerns of geologists about huge methane deposits are true! Read Linda Newkirk’s prophecies at prophecies.org Book 12, Chapter 74.
