For those of you unfamiliar with the HAARP program, I quote the following from their website:

"HAARP is a scientific endeavor aimed at studying the properties and behavior of the ionosphere, with particular emphasis on being able to understand and use it to enhance communications and surveillance systems for both civilian and defense purposes.

The HAARP program is committed to developing a world class ionospheric research facility consisting of:

- * The Ionospheric Research Instrument (IRI), a high power transmitter facility operating in the High Frequency (HF) range. The IRI will be used to temporarily excite a limited area of the ionosphere for scientific study.
- * A sophisticated suite of scientific (or diagnostic) instruments that will be used to observe the physical processes that occur in the excited region.

Observation of the processes resulting from the use of the IRI in a controlled manner will allow scientists to better understand processes that occur continuously under the natural stimulation of the sun."

This is a video that explains how HAARP can cause Major Earthquakes:

"The United States Congressional record deals with the use of HAARP for penetrating the earth with signals bounced off of the ionosphere. These signals are used to look inside the planet to a depth of many kilometers in order to locate underground munitions, minerals and tunnels. The U.S. Senate set aside \$15 million dollars in 1996 to develop this ability alone -- earth-penetrating-tomography. The problem is that the frequency needed for earth-penetrating radiation is within the frequency range most cited for disruption of human mental functions. It may also have profound effects on migration patterns of fish and wild animals which rely on an undisturbed energy field to find their routes.

As if electromagnetic pulses in the sky and mental disruption were not enough, T. Eastlund bragged that the super-powerful ionospheric heater could control weather.

Begich and Manning brought to light government documents indicating that the military has weather-control technology. When HAARP is eventually built to its full power level, it could create weather effects over entire hemispheres. If one government experiments with the world's weather patterns, what is done in one place

will impact everyone else on the planet. Angels Don't Play This HAARP explains a principle behind some of Nikola Tesla's inventions -- resonance -- which affect planetary systems." [\(source\)](#)

What isn't mentioned above is the fact that the earth has its own magnetic field. The Illuminati know this, and try to locate their Capitals on the grid where the field is the strongest, believing that the location makes communication with the Spirit World more intense. In fact, almost every city in the world builds its street grid following the "ley lines", or lines on the grid which have the greatest electromagnetic energy. Usually, in the United States, this is Main Street and State Street. Just look for the street where many churches and fortune tellers are located.

So, HAARP takes huge amounts of energy directed at our ionosphere and bounces it back to earth. This disrupts the magnetic field and can cause a massive earthquake, like we just saw today in Chile. By the way, many of the recent earthquakes were preceded by colorful disruptions in the atmosphere characteristic of HAARP.

Recent Chinese Earthquake

HAARP Light Over Haiti before Earthquake:

Even More interesting than the lights that have appeared over the Japanese and Chile earthquakes (sorry no images yet) is the apparent strategic locations of these quakes. An unconfirmed report states that the Russians also know about this "earthquake weapon"

"According to an unconfirmed report by the Russian Northern Fleets, the tragic earthquake in Haiti was caused by a US navy earthquake weapon that went "horribly wrong," reports Press TV. The weapons test was originally supposed to be used against Iran but caused the cataclysmic earthquake in the Caribbean country.

The purpose of the earthquake weapon being used against Iran, according to the Russian report, was to topple the current Islamic system in the country.

Vive TV reports that the unconfirmed Russian report also suggests that the US instigated the 6.5 magnitude earthquake in the Pacific Ocean earlier this month. That earthquake did not cause any deaths or injuries but did damage many residential and commercial buildings.

The report further states that the system carrying out these tests is the High Frequency Active Auroral Research Program (HAARP). The data also coincides with a previous report that associates the 2008 7.8 magnitude earthquake in China with HAARP.

Although Russia has accused the US of holding such a type of weapon, a Georgia Green Party leader claimed that Moscow, allegedly possessing similar weapons, caused an earthquake on Georgian territory several years ago." [\(source\)](#)

Now for the analysis:

1. **Japan is Moving Towards Breaking Ties with the US:** the earthquake took place the day after the article broke. The video above shows that Japan has been threatened before by our "earthquake machine". This one could have also been a "Russian" HAARP job that targeted the Okinawa military installation.
2. Haiti was possibly a test. Or it could have been the result of the Illuminati Psychopaths to continue their campaign of eradicating the Black race. The lack of an immediate response to the disaster makes this a very real possibility.
3. This Chile Earthquake will generate Tsunami waves that hit will Russia and China and possibly Japan very hard. It could have been a US HAARP event, or a Chinese one targeting Japan. I would tend to believe that the Chinese and Russians also want to send the Japanese a message.

If I am right, we are in for a whole slew of retaliatory HAARP induced earthquakes and **Yellowstone** will be a primary target.

I am almost near 100% certain on this one Folks. You better make sure you are prepared.
