Franz J. T. Lee: The weather weapon now used in the 'Oil World Wars' is HAARP

VHeadline commentator, University of Los Andes (ULA) political sciences professor, Dr. Franz J. T. Lee writes: Here in Venezuela, scientifically many of us know that capitalism as a mode of self-destruction will and cannot last forever. What we could not imagine was the horrendous magnitude of its current terrorist demise, of its collapse in all spheres of terrestrial life. It brought about total social lawlessness, political chaos and economic anarchy; the whole globe has been converted into devastating tsunamis and floods, into scorching droughts and scorching hell fires, oil drilling and oil spilling. Furthermore, corporate giants are ripping the sea-beds apart; toxic gases devour human lungs and dig huge holes into the ozone heavens.

All over we are sleeping on ticking time-bombs, on erupting volcanoes; under the contaminated dust of the falling 'Twin Towers,' under the debris of permanent tremors and earthquakes.

For millions in Haiti, Honduras, North Korea, in Baghdad, Kabul, Beirut, Gaza, Tehran, Maputo, La Paz or Caracas, life under capitalism is becoming a perpetual nightmare, in fear, subconsciously many millions living around Louisiana are dreaming about a possible detonation of a huge methane pressure cooker, about a restless Mount Everest underneath the Gulf of Mexico.

We never imagined that we would live to see one gigantic Behemoth, which was set loose by the megalomania, avarice, greed, treachery, arrogance and ignorance of homo homini lupus, of a small powerful elite, armed to the teeth with mortal weapons of mass destruction. The 'Bilderberg group' or the 'Club of Rome' do not even care about their own lives and that of their own kith and kin. They dream about a 'One World Government,' of Orwellian global fascism. This barbarism would result in their own death knell.

What confronts billions is a huge, corporate, imperialist Leviathan, which is surpassing all the horrors which mankind ever has experienced till now. This is not the moment to explain the following evil projects in detail to a very badly informed world public, but the internet is full of erudite scholarly investigations of the Nazi ingredients of a global corporate conspiracy against natural and social life on planet Earth, which may end up with the total destruction of the experiment humanity.

The belligerent trails towards this capitalist conflagration we could follow across the millennia, especially after the international division of labor, of the construction of the world market, of that 'Triangle of Bermudas' which now over the next decades is threatening to devour nearly seven billion human beings.

The current bellicose apocalyptic situation can be traced back to the 'Second Imperialist World War,' to the famous 'Manhattan Project' of the "Allies" to stop the rapid expansion of Nazism across Europe, Asia and Africa. The arms race in the second half of the world war was ... at all costs, by hook or by crook, across 'gentlemen agreements,' like the 'Hitler-Stalin Pact' ... to be ahead of the other imperialist contenders, rapidly to attain world hegemony and eventually thereafter to form an Orwellian authoritarian, totalitarian and dictatorial 'One World Government'. The genocidal plan, which nipped in the bud tens of millions of precious human lives, was first to develop and produce more sophisticated conventional weapons and in the first place, nuclear bombs. Then it was projected mercilessly and indiscriminately to throw these atomic bombs on cities of the 'enemy' and therewith brutally to kill hundred thousands of innocent workers, women and children.

Towards mid-1945, it was clear that the war would end with the victory of the 'allied forces' ... in other words, it was not necessary to throw the nuclear bombs on Hiroshima and Nagasaki. Power drunk North American hawks with their respective European vultures, decided to test their nuclear weapons and to demonstrate to the world their 'democratic' heroism.

What followed after the war was the continuation of the above with

more heinous belligerent projects of mass self-destruction, ranging from 'Operation Paper-Clip' to 'HAARP' and far beyond, from genome experiments to nano-technology, to Tesla-technology, to 'Pentagon Aliens' under Los Alamos. (1)

For obvious reasons, most of the grim military realities, projects and experiments mentioned here are practically unknown to the general public. While the current navigation fun still lasts, also our Twitter and Facebook joy, we can safely find scientific materials on the Internet via search machines. We better hurry up to inform and enlighten ourselves before these web sites could suffer the same fate of censorship as some 70 000 blogs which the other day were simply thrown off the world wide web in the United States without any previous notice. Our darkest night, void of information, is already being planned.

In the secret "Operation Paper-Clip" after the war thousands of Nazi scientists either fled to the United States of America, South America and South Africa, or they were secretly recruited to the USA to continue with their deadly war experiments. Similar military experiments continue till this very day.

Everybody wants to know the truth. Do we still have nerves and brains to know the truth, to become free?

Over the last years we also have informed our readers, our friends and comrades here in Venezuela, about the various 'Philadelphia Experiments,' Mkultra, the 'Manchurian Candidate,' HAARP, Pentagon Aliens, Chemtrails, Tesla's free energy technology, electro-magnetic weapons, Wilhelm Reich's orgone, US scramjets, scalar waves, ELF (Extra Low Frequency) waves and the current, invisible, stealth war submarines of Germany and France, etc. All these concern arms of mass control and elimination.

With reference to the current oil world wars, and the corresponding deadly weapons, long ago, Michel Chossudovsky, Professor of Economics, University of Ottawa, warned that "in addition to the devastating impacts of greenhouse gas emissions on the ozone layer, the World's climate can now be modified as part of a new generation of sophisticated 'non-lethal weapons.'" (2)

In various articles, Jutta Schmitt also explained the dangers of geophysical weapons of mass destruction and projects like HAARP, which could direct hurricanes, cause floods, droughts, earthquakes and dramatic changes of the climate. (3)

In fact, as I explained in other writings, long ago already the Pentagon and the Kremlin had developed weapons to manipulate the world's climate. For example, already in the Vietnam War, the USA had used them against the Vietcong. In the USA, this kind of war technology is being used in the High-frequency Active Auroral Research Program (HAARP) as part of the (Star Wars) Strategic Defence Initiative (SDI), which till this day is being propagated as part of the 'Project for a New American Century'.

Furthermore, according to Thomas Bearden, ever since 1970, in the very USA no normal, natural, weather conditions exist anymore. This is the current situation on a world scale. Meanwhile in Russia, Pakistan, Canada or Venezuela the weather is totally chaotic, it also will never be the same again. The weather of the whole planet, like the whole capitalist system, is already in chaos.

An article of Sorcha Faal, and as reported to her Western Subscribers, verifies what we suspect; she claims that "Obama's 'Weather War' Plunges World Into Chaos." (4)

Let us get some vital things very clear.

In reality, even a gigantic nuclear world war cannot stop the inherent cancerous decay of global capitalism. Even total fascist wars have become absurd and bizarre. They would serve no cui bono, no purpose anymore. Nuclear world wars would just prolong the agony of moribund capitalism. They would leave a planet behind that would be incapable ever to sustain socialism. In this case, dialectically, a post nuclear war epoch would not even be able to bring about the negation of human socialism, that is, of beastly capitalism. Corporate imperialism itself would not survive total nuclear wars.

Who still dreams about a peaceful 'transition' to u-topia, to no-place, to no-where?

Political warmongery and economic irrationality have reached such a dramatic level that the very essence of the world order, war and big business, that is, capital, profits and exchange values, the very foundations of ruling class power are becoming useless, senseless, without any use-value. This is the real world in which we live here and now.

Exploitation, domination, racism, genocide and alienation (*namely capitalism*) launched against billions of global workers have a limit, beyond it, in barbarism, the bourgeois, capitalist or imperialist himself is perishing, he dies together with his 'speaking tool,' with his wage slave. This is what the final collapse, the paradox of capitalism, of globalization, mean. This is barbarism, is what has to be halted, to be avoided at all costs.

Among other hair-raising things, Faal writes: "A new report prepared for Prime Minister Putin by Russia's foreign military

intelligence directorate (GRU) states that a former top United States Senator, Ted Stevens, was assassinated this week after he attempted to gather evidence 'proving' that President Obama has unleashed America's devastating 'weather weapons' against the World."

* This 'weather weapon,' now used in the Oil World Wars' is HAARP.

More and more, "experts are stating their belief that the extreme weather chaos currently battering our Planet is being caused by the Tesla technology based weapons systems directed from Alaska's High Frequency Active Auroral Research Program, otherwise known as HAARP." (5)

Years ago, concerning Venezuela, about the Vargas catastrophe, we already warned that HAARP may have caused the huge disaster of sinister floods, which probably killed more than 100,000 people.

- More gruesome materials can be read in Faal's article, but what we indicated is sufficient to warn that we find ourselves on the brink of total global disaster, as the result of a dying, decaying capitalist mode of self-destruction.

To be able to still halt all this presupposes scientific knowledge about what is to be done, about what needs immediate, constant action, praxis. To avoid blind activism, we need sound thinking and thought, philosophic theory. Within the parameters and paradigms of this universal, closed, capitalist system there is no hope whatsoever to avoid extinction of humanity.

Out of it, finding the exit, by means of a true, real exodus, an evolution, we have a myriad of anticipatory and emancipatory possibilities.

Basically, we have to learn what is capitalism, what is its negation, socialism, and how to transcend both, without any pacifist 'truth commissions,' ideological and religious illusions, 'peaceful dialogues,' without summit meeting to summit boredom, 'transition' or 'democratic reform,' that is, we have to transcend directly, straight to human emancipation. it is now or never in a million years!

Our editorial statement reads:

VHeadline.com Venezuela is a wholly independent e-publication promoting democracy in its fullest expression and the inalienable right of all Venezuelans to self-determination and the pursuit of sovereign independence without interference. Our stance is decidedly **pro-governance** (defined as being contrary to anarchy) and **pro-government** to the extent that we support all and any government policies aimed at consolidating and improving the living conditions and future prosperity of **ALL** Venezuelans, regardless of race, color or creed. We also seek to shed an international spotlight on nefarious practices and corruption which, for decades, has strangled this South American nation's development and progress. In every respect VHeadline Venezuela's declared editorial bias is most definitely **pro-Constitutional, pro-Democracy and pro-VENEZUELA**.
