ILLUMINATI'S BIGGEST CRIME? Suppressing Tesla Technology

June 6, 2010

Nikola Tesla, 1856-1943, the man who invented the "flying saucer"

**by Christian Soderberg
(for henrymakow.com)**

In 1911, Nikola Tesla revealed he was working on an anti gravity "flying machine".

"My flying machine will have neither wings nor propellers. You might see it on the ground and you would never guess that it was a flying machine. Yet it will be able to move at

will through the air in any direction with perfect safety, at higher speeds than have yet been reached, regardless of weather and oblivious of "holes in the air" or downward currents. It will ascend in such currents if desired. It can remain absolutely stationary in the air, even in a wind, for great length of time. Its lifting power will not depend upon any such delicate devices as the bird has to employ, but upon positive mechanical action." - Nikola Tesla in *New York Herald Tribune*, Oct. 15, 1911

<http://www.tfcbooks.com/tesla/1911-10-15.htm>

What happened to this anti-gravity craft of Tesla's?

When we understand that Tesla's "flying saucer" was powered by a so called "free energy system", a.k.a. 'over unity'-system (you get more energy out than you put in) at a time when the fledgling aviation and motor car industry

was based on the oil and petroleum, it is quite easy to understand what happened to these inventions.

Extracting energy from the Aether, and the so called 'aether physics', is based on the cosmos being 'all filled with substance', which is in constant, perpetual motion.

Because there is no empty space in the cosmos, every time the "aether" gets disturbed, which is all the time, 'replacement' takes place, and so the whole cosmos is in constant motion, energized by the so called Zero Point Radiation (ZPR), the electromagnetic-radiation between all particles of the cosmos, which comes in various frequencies, effecting the different particles accordingly.

The same way the atoms of our bodies are in constant motion, oscillating, and being 'kept together and separate' by electromagnetism, so it is also with this 'all permeating medium', the aether, which transmits the ZPR to the atomic matter, so energizing it.

In "layman's terms"; the craft excludes itself from the gravity of planetary bodies with high frequency and high voltage electromagnetic radiation, and propels itself in the aether-medium with these HF-electromagnetic waves. Because the craft is excluded from the planetary gravity, the crafts are capable of fantastic acceleration and sharp turns in high speed without the crew inside the craft feeling any G-force effects.

Not only did the so called Illuminati (industrialist-banking cabal) steal this "aether physics"-technology, they also changed the "human knowledge of physics", replacing the knowledge of this aether-cosmos with Einstein's theories, now promoted everywhere.

..to name few benefiting from this theft.

- J P Morgan (banking, energy, railroads, US Steel)
- Edison & General Electric (oil & energy, railroads, aviation, war industrials, banking)
- Rockefeller (oil, banking, Nazi connections through IG Farben)
- Rothschilds (banking, oil & natural resources ..connections to Kuhn Loeb & company through Jacob Schiff)
- Ford motors (motors, war industrials)
- Brown Brothers Harriman & Co (banking, ship yards, railroads, IG Farben)
- Du Ponts (chemicals& war industrials, General Motors, IG Farben)
- Vanderbilts (railroads, ship yards)
- Boeing Company (aviation)
- Lockheed (aviation)

... Oil & energy, steel and other natural resources, railroads, ship yards,

aviation, car industry, spare parts, logistics, banking & finance, war industrial complex ..are some of the reasons to steal and keep this technology hidden.

The official excuse behind this technology theft by this industrialist-banking cabal would be, of course; "In the interest of national security" .."if Al CIA-da got hold of these..".

Hiding this technology "for national security" has cost humanity trillions and trillions of dollars and wrecked the health of humanity and the planet.

Comments for "Illuminati's Biggest Crime? Suppressing Tesla Technology"

Tony Blizzard said (June 6, 2010):

We tend to think it's sad that Westinghouse refused to finance Testla's bid to electrify the earth, more or less, wirelessly (and freely) because Westinghouse had a monopoly stance on copper wire.

But suppose Testla had been successful in that quest. Most of us today would be overjoyed as most are with all the wireless gadgets coming into use. Not me. I know that all those beams of energy go through our bodies in a concentrated, unnatural state, on their way to our conveniences. Some people have developed mysterious life threatening sicknesses which have been completely overcome by getting rid of wireless gadgets. Am I the only one who has noticed that there seems to be a proportionate amount of poor health in those countries with the most wireless equipment, including radio, tv, etc.?

What about all the modern "crowd control," and worse, weaponry based on Testla's insights into nature?

These things are truly "science fiction"-turned-to-fact, scary. I suppose "less deadly" tasers can be included in that category.

It has been recorded that Tesla tried out a new setup on the same day as the "huge meteor" hit in Siberia, which flattened all those trees, etc. Tesla never admitted to causing that disaster but he did shortly dismantle that equipment.

Today almost everyone but myself in my orbit uses a cellphone constantly. Warnings that they have caused brain tumors (cancer) in habitual users go unheeded - unknown to most as the media refuses to properly inform of the danger. Same thing with microwave ovens, which do terrible things to the blood of people who immediately eat food cooked in them.

Using nature's building blocks to make life easier for ourselves sounds like a good idea but we'd better be damned sure of unintentional results. There are many ways to pollute our environment. Messing with the natural atmosphere may be worse than polluting the earth or the water as electrical pollution is usually invisible as well as insidious.

Paul said (June 6, 2010):

Just thought I'd write in and comment on the most recent article I see posted on your Web site, the one concerning "Illuminati" suppression of Tesla free energy devices.

First: two modern authors who write on this topic (free energy, etc) with great authority are Joseph Farrell and Paul LaViolette. Both are respected scholars, and both have PhDs (Farrell from Oxford University). I would invite your reads to explore the works of both these authors in more depth. Carmen Boulter, also a PhD, also has extremely interesting insights into free energy (and alchemy, which is the ancient name for "free energy"), although her focus concerns more directly the Egyptian pyramids.

There are excellent YouTube interviews of all these authors out there.

Secondly, although I find the Illuminati agenda to be largely distasteful, I do understand what they are doing in suppressing free energy technology and why. Free energy isn't just like turning on a faucet and getting running water. With free energy, you're tinkering with some extremely powerful forces, indeed the most powerful forces known in the cosmos. During WWII, the Nazis shunted work from their (probably more-or-less successful, although that's not what history "teaches" us) atom bomb project, so they could focus their efforts full time on free energy, their logic being that free energy made a hydrogen bomb look like a kitchen match.

Which, indeed it does.

So the question is, do you want to put this power which is greater than an atom bomb into the hands of every man, woman and child out there? Do you want to put the "red button" launching thermonuclear war into every home in America? Churchill said the best argument against democracy is a "five minute conversation w/ the average voter".. How much more does this argument prove that these people should not have free energy available at their fingertips?

If we did this, how long would it take before there was a second asteroid belt in the Solar System, where planet Earth used to be?

I'll close by drawing attention to a recent movie that addresses these issues quite poignantly: the 2009 film "The Watchmen".. Those who have seen the film will understand the connections w/ free energy. And a key to understanding it that might not be obvious: In the High Occult, the words "Manhattan" and "Jesus" are synonymous. Both words indicate the identical symbol. "Jesus" means "fire in the flesh" or "fleshy incarnation of fire".. the "fire" here being the "fire" of the Sun god, which Jesus represents (born on Dec. 25, etc). "Manhattan" means the identical thing, again, like Jesus, deriving from ancient Egypt: it's the Man-Aton. That is to say, Aton is the Egyptian Sun god, and Man-Aton is what happens when the "fire" of the Sun-God Aton incarnates as a "man"..

This explains the Dr. Manhattan character in the film.

It also explains why the Americans chose to name their atom bomb project the Manhattan Project: it had nothing to do w/ an island in New York City. Rather, in the Manhattan Project, "man" was, for the first time (in recent memory, at any rate), reaching out to seize the power of "Aton" (the Sun god, powered by nuclear fusion), and to bring the power of Aton (the Sun) down here to Earth, where Man lives... it was, quite appropriately, the Man-Aton (Manhattan) project.

The message is longer than I wanted it to be, but lots of points to cover.

David said (June 6, 2010):

re. Alcuin Bramerton [below]

Most of the things he has written here are quite true and correct. Of course, if he had been a Pleiadian extraterrestrial, he would not have suffered from many of Tesla's handicaps. Though a most brilliant man with a profound understanding of electromagnetism, Tesla was never able to express his ideas in mathematical language: he disliked algebra and calculus, and one will never find a single formula in any of his writings, which are all qualitative. For this reason his ideas never caught on very widely in the physics community, so in this way he actually helped the Illuminati suppress his work.

Fortunately this physics had already been cast in modern scientific form by J. C. Maxwell, but because those early ideas were altered through the influence of other physicists and the Illuminati, they are no longer taught and only a mutilated form of electromagnetism is taught in universities and colleges, which works, to a limited degree, but the things Tesla described cannot be done, exactly as the Illuminati wished.

If Tesla's work had not been suppressed, we might have "free energy" of a sort today (though one should never underestimate the ability of the Illuminati to exploit any situation to their advantage), but any claims that war could be avoided for any length of time in this world are foolish: human beings will always find something to fight over.

Of course, the suppression of Tesla technology was not the Illuminati's greatest crime: they have committed so many! Most of these involved the killing of very, very many people, as, for example, during WWII.

Alciun said (June 6, 2010):

From Alcuin Bramerton

Nikola Tesla (1856-1943) was a Serbian scientist who became an American citizen. He was also a benign Pleiadian extraterrestrial in human form. He brought an astonishing range of new technologies to Earth. Every one of these was suppressed by the US Government. Had we adopted and developed Tesla's ideas, by now our planet would have had free energy and no wars for a century.

Nikola Tesla was perceived by the world's ruling élites to be a threat to the established scientific and political order of the day. His free energy technology, if developed, would cause the US government to lose control over the people by removing the need for fossil fuels.

J.P.Morgan arranged for Thomas Edison to steal Tesla's alternating current technology and claim it as his own. They burned Tesla's Colorado Springs laboratory to the ground. The media were told to trash Tesla's free-energy car. The US government rejected Tesla's free-energy system for home lighting and heating.

The US government also refused to implement his defensive scalar technologies which, if deployed, would have stopped all wars.

Nikola Tesla lost J.P.Morgan's funding for his research, lost his assets, and died a lonely and penniless man. He was murdered by the Morgan/Edison syndicate and his research was destroyed and buried from

public knowledge by the cabal.
