Dead fish for miles

Miles of Dead Fish in lower Plaquemines

This photo (sorry about the quality) was delivered to me by a brave little pelican which he took 3 days ago, bless his heart. This is just a small glimpse of miles of dead rotting fish being ignored and dismissed by "BP" affiliates in lower Plaquemines Parish. Many types of fish

are floating on the water off South Pass @ the mouth of the Mississippi River at (Garden Island). Surface "OIL" is also covering our waterways @ Main Pass and Passaloutre and there is oil creeping up Main Pass as I type this. I wish I had a photo of the oil but for some "mysterious reason" many boats were grounded today and my little pelican didn't make it to the scene. BP is telling us the oil is gone... Yeah right, ok, whatever you say! Are they wearing blinders instead of safety glasses? BP is ignoring this and they expect our fisherman to do the same. We need these bayous and marshlands. The dispersants are killing our fish, and making the oil sink, SO IT'S NOT SEEN! Well, I guess it's time to spray again BP because it's surfacing! Our hired fishing boats are getting layed off but there's cleanup to be done!! C'mon now... this is our way of life, our living, our future. Please, do something already!!!!

I sure wish I could. It was taken with the birds cell phone, and he didn't know how to adjust the picture size.

Little pelican's photo is too small to see anything. Any chance you can post a bigger photo?
