Deepwater Horizon

[Intel Hub](#)

Shepard Ambellas

Stopping the press is exactly what the establishment has done in regards to the BP oil disaster (or should I say military operation) The media blackout is not even the half of it. The more we dig deeper into this situation the scarier it actually gets. The true scope and scale of this massive military operation is hard to digest. There are clearly some red flags triggering questions that must be raised, and this is where it gets strange.

Nine days after the apparent Deepwater accident, [Obama announced](#) that the oil spill would become a [Dept. of Defense operation](#) and that the Department of the Interior had dispatched SWAT teams to the Gulf to inspect all platforms and rigs. Obama also noted on the 29th of April that DHS has deemed the [spill of national significance](#), something DHS and the coast guard were training to combat in March of 2010.

The fact that this has been deemed a military operation is scary, especially when you couple it together with multiple other red flags. The massive hole in the heli-pad of the Deepwater Horizon rig, along with the fact that oil rigs are [designed to burn forever](#) has raised many eyebrows. One must also ask, what is with the [no-fly zone order](#) issued for the Gulf region on June 9, 2010?

Advertisement

Why make the Gulf a no-fly zone, unless you are hiding something? Why impose \$ 40,000 fines and federal prison terms on U.S. citizens for filming or taking pictures near the Gulf shoreline? Why direct away 39 countries that were willing to help anyway they can? Why has the media lied, and downplayed the spill? Why was the use of massive quantities of deadly chemicals ignored for over two months? Why is a CIA front company company and the D.O.D. openly spraying under what has been dubbed a military operation? Why has there been staged press shoots and photo OPS along oil soaked beaches?

Something is going on in the Gulf and it could be far more sinister, or a bigger threat then we all know. Are they conducting wartime operations against the American people, are they hiding something, or our they looking out for the best interest of the American people?

the reason is simple we allow it. I am willing to bet that other than commenting on videos etc not one person who reads this has picked up the phone and made calls or e mailed their elected officials or media and in such we are as guilty as bp simply for allowing it and doing nothing plain and simple and as a result things here are only sure to get even worse

2. [BuelahMan](#) says:
[August 26, 2010 at 3:58 am](#)

And Casey would lose his bet quickly.

3. [Jack Sparrow](#) says:
[August 26, 2010 at 8:07 am](#)

Seriously, do Really believe calling your Rep will have any impact on what the elite choose to do.....

4. [TEXAS GIRL](#) says:

Actually Casey, several in my family, including myself have...
 attached is a link the has all the States Governors and Reps listed with fax numbers. Hopefully people will use them...<http://www.conservativeusa.org/mega-cong.htm>

One good definition of insanity is doing the same thing over and over again and expecting a different result. Every election we prove how guillable, simple minded and insane we really are. It will not change without catalysmic upheaval.

6. [pngui](#) says:
[August 29, 2010 at 2:06 pm](#)

Whoops it looks like my simple mind spelt cataclysmic wrong and even got my own 'name' wrong.

7. [pngui](#) says:
[August 29, 2010 at 2:09 pm](#)

This is a repeat of a comment that may or may not have disappeared.

One good definition of insanity is repeating the same thing over and over again and expecting a different result. Every election we prove just how guillable, simple minded and insane we really are. It won't change without cataclysmic upheaval.

no news here. just speculation. let's speculate with little or no data. that's worse then what wall street did.

BTW....in your last sentence, you have "or our they..." and you might want to correct to "or are they".

Worse than the oil is the neurotoxin Corexit being sprayed all over and around the gulf. Massive die off of fish. Genetic damage and depopulation for people? This is not beyond the elites. They have been irradiating Iraqis and Afghans now for 10 years with uranium-based weaponry. They know what this does to DNA. They don't care.

I don't think the situation in the GOM is difficult to understand. Matt Simmons said that BP was a "good company" up until the last ("I want my life back")CEO, what's his (name?)took over, 15 years ago, with

a guiding philosophy of

“faster, cheaper”. Then the company went to Hell. BP then drilled into a very dangerous formation with predictable results which we will be living with for years. Fishing in the Gulf has been destroyed and will not recover for many years. BP is responsible for this catastrophe and would be liable for more than the hundreds of \$billions that the company is worth. This would destroy a major contributor to toy boy Obama and a major supplier to the military!

I have an idea what BP is hiding — the fact that they drilled two wells and lied to the government about it. Thad Allen has admitted that he gets 100% of his information directly from BP, and the company remains in charge of all operations. You can read about how BP applied to drill two wells, drilled both then lied to everyone, complete with videos of the well which does not exist:

<http://jailthebanksters.blogspot.com/2010/08/hypotenuse.html>

The government declared war on the American people a long time ago but the average American is to stupid to realize it.

Waked up you morons!

Here is a classic example if you need some proof.

Crime is out of control. But instead of doing anything about it the cops are writing you speeding tickets. What is wrong with that you ask? You are paying that punks salary to protect and serve you but instead of harassing the criminals that asshole is harassing you. We need to just stop supporting any and all police department budgets because they are not working for us. If we stop paying these punks to harass us then we can take care of crime ourselves the old fashioned way. Armed citizens are more effective than renta cops any day. They actually think in their warped minds that they are fighting crime by writing reports about it. Writing a report about someone getting robbed raped or murdered does not stop or deter crime in any way. Because they never even investigate it anymore.

Criminals are not afraid of a vacation with room and board payed for by you the hard working tax paying citizens. The only thing the criminals are scared of are armed citizens who are ready and able to defend themselves and others. When you shoot a criminal you end their criminal career and they cannot victimize anyone else.

casey nunez,

until the tax payments to employ the swindlers ceases and RESISTANCE begins- forget it, its over.

Disconnect the cable. Stop driving the car, buy only local as much as possible etc.

Hit the corporations in the pocket book. Organize your neighbors to confront. As things worsen, more forceful countermeasures need be adopted. And force does NOT equal violence. It means strong and EFFECTIVE ACTION.

...Few people realize the true scope of the BP oil spill in the Gulf of Mexico. The extent of the cover-up is outstanding. Over two months ago someone measured radioactivity with a Geiger counter in a sample of oil from the beach and found it to be radioactive. Nobody has posted new measurements of radioactivity in the spilled oil, which is really hard to believe given the importance of this matter. Specially because there are very clear reasons to believe that the radioactivity of this spilled oil is greater than in any other oil ever found. Radioactivity in oils is due to dissolved isotopes from the uranium to thorium chain of decay as well as from radon gas from radium, etc. The concentration of these radioactive isotopes in any oil sample has been consistently found to parallel the amount of methane gas released when the oil is extracted. Most oils average a 5 percent of methane gas. Oils with more than 10 percent methane are an extreme oddity. The more methane they have, the more radioactive they are. The BP spilled oil has above 40 percent methane concentration when it is extracted. It breaks all the records!. This in itself signifies that this oil must be extremely radioactive. Some of us think that the extraordinary amounts of the very toxic dispersant Corexit has been consistently added in large amounts because British Petroleum is aware that this oil is very radioactive. If this oil is indeed as radioactive as we think it is (more measurements are badly needed now!), then all living organisms in this world are going to die of cancer as soon as this oil is assimilated onto the biosphere.
