launches construction works in 31 settlements in the West Bank

17/10/2009

OCCUPIED JERUSALEM, (PIC)-- The Israeli occupation authority (IOA) has embarked on construction works in 31 settlements in the West Bank despite understandings with the USA to the contrary.

Hebrew daily Ha'aretz reported on Friday that the IOA had agreed in an understanding with the USA on completing the construction of 2,500 settlement units in West Bank settlements, but the ongoing construction works were exceeding that understanding.

The paper said that minister of transportation Yisrael Katz had endorsed a series of projects to construct new roads inside those settlements and between them.
