### Dr. Orly Taitz' Federal Lawsuits Exposed to the "Flu Pandemic"

August 4, 2009

By Don Nicoloff

<http://directlightproductions.com>

The Obama citizenship-eligibility lawsuits filed by Dr. Orly Taitz, DDS in the U.S. Supreme Court have suddenly become stricken by the bird/swine/human flu "pandemic."

Taitz recently released a facsimile of Obama's alleged Kenyan "Certified Copy of Registration of Life Birth" to WorldNetDaily.

WND's article, "[Is this really smoking gun of Obama's Kenyan birth?](http://www.wnd.com/index.php?fa=PAGE.view&pageId=105764#)" (<http://www.wnd.com/index.php?fa=PAGE.view&pageId=105764#>, August 2, 2009) shows three photographic representations of the birth document. The document, itself, is obviously fraudulent, though Taitz claims to have filed a motion in U.S. District Court to determine its authenticity. The source of the document and how it was obtained by Dr. Taitz was not disclosed, though it was implied that its sender, a Kenyan citizen, "feared for his life."

Taitz, a practicing dentist, attorney, and licensed real estate agent who lives in Southern California's posh, coastline community, Mission Viejo, has filed numerous lawsuits and legal motions on behalf of former U.S. Senate candidate Alan Keyes (and others) demanding proof of Barack Hussein Obama, Jr.'s (aka Barry Soetoro, et al) citizenship eligibility to serve as president of the United States. Taitz recently published 'proof' that she had standing to practice law before the U.S. Supreme Court and claims to have "met personally" with Chief Justice John Roberts.

On recent radio shows across the U.S., Taitz disclosed "death threats" and "attempts on her life and that of her husband," Yosef Taitz, alluding to "tampering with critical systems" on the couple's automobiles. Taitz has also given numerous accounts of Internet blog-site attacks and other such types of interference.

Yosef Taitz is the self-described "CEO" of Daylight Chemical Information Systems, Inc., a private software company located in Mission Viejo, CA, Santa Fe, NM, and Cambridge, England. DCIS, Inc. is intimately involved with Novartis Pharmaceuticals (United States, Switzerland, Germany, France, England), the patent holder of the bird/swine flu vaccination. The "DayCart" software produced by DCIS, Inc. integrates ongoing research and development by Novartis and others using proprietary Oracle 8i technologies.

The following Internet posting reveals Yosef Taitz' relationship with Novartis Pharmaceuticals, manufacturer of the H1N1 (Influenza A) vaccine:

DayCart(tm) introduced by DAYLIGHT

Mission Viejo, Calif. USA - July 14, 2000 -- DAYLIGHT Chemical Information Systems, Inc. (USA) today introduces a new addition to the array of DAYLIGHT software products; DayCart(tm), an application using the unique extensibility features of Oracle8i(tm) designed to fully integrate the molecular structures and reactions in an Oracle8i database server environment. As an integrated module DayCart does not require any call-outs or other operations outside of the Oracle server, in order to perform its functions. DayCart delivers the speed, capacity and performance of Daylight tools throughout the organization. Use of DayCart with the Oracle8i server, unlocks the access of existing Oracle\* applications and tools (such as SQL, PL/SQL, Java, C, etc.) to the array of chemical information.

"DayCart was developed in close collaboration with Novartis' scientists and the architects of Oracle8i's extensibility framework. Thus, DayCart provides a practical and exceptionally efficient solution fully compliant with Oracle technology. Today DayCart delivers an extensive range of chemical information capabilities, such as fast direct storage and retrieval of 2D and 3D, structures, reactions and mixtures. Operations provided include high performance searching of full structure, sub-structure, super-structure, similarity and other structural operations. Our utilization of Unique SMILES and its indexing, delivers unparalleled speed and flexibility in storing, novelty checking and searching operations," stated Yosef Taitz, Chief Executive Officer of DAYLIGHT. "Utilizing the DayCart technology today, we deliver a corporate compound registration system handling archival, searching and retrieval of over 9 million compounds with lightning speed. A wide range of DayCart solutions are being produced, both by Daylight and by its development partners. We are providing a migration path for conversion and integration of existing data. Daylight chemical technology, tightly integrated with the Oracle8i database opens the door to groundbreaking 'informatics' solutions. This technology empowers users to bridge and expand the horizons of chemical information science, merge biological and chemical data, and provide solutions for data warehousing, compound acquisition, and more."

"The Oracle database is unique in its ability to singularly store, manage and secure relational data, files and unstructured data," said Jeremy Burton, senior vice president of iPlatform marketing, Oracle Corp. "By extending these data management capabilities, as DAYLIGHT Chemical Information Systems has with DayCart, technology continues to drive significant business and scientific advances. We are pleased to be a fundamental part of these advances."

"The Daylight Cartridge combines strong performance with interesting versatility through Daylight's typical toolkit approach. It enables Pharma R&D IT functions to adapt their systems flexibly to the new challenges in the business and scientific environments." Said Dr. Rene Ziegler the Head of Pharma Research Information Management at Novartis.

DAYLIGHT Chemical Information Systems, incorporated in 1987, is a privately held company headquartered in Mission Viejo, CA, with a research office in Santa Fe, NM and in Cambridge England. DAYLIGHT is a technology leader who provides high-performance chemical information processing tools (such as SMILES and Daylight ToolKit(tm)) for research chemists around the globe. Its software and tools are used by thousands of scientists at over 250 companies worldwide. For more information please e-mail to: [info@daylight.com](mailto:info@daylight.com) and visit DAYLIGHT's homepage at [www.daylight.com](http://www.daylight.com)

Summary by 李晓霞 on 2000-07-13

Last updated by 李晓霞 on 2000-07-13

Over the past year, we were suspicious of the unusual course Dr. Taitz' lawsuit was taking. As events unfolded, it became increasingly apparent that the "Hawaiian-Kenyan birth" myth was employed as a means of dividing the American people through a dialectical argument over two lies. Our research has revealed innumerable facts that dispel the myth of Barack Hussein Obama, Jr.'s (aka Barry Soetoro, et al) birthplace, documentation, and family photographs.

On a hunch, it seemed appropriate to investigate Dr. Taitz' husband, Yosef Taitz, in order to see where he might lead us. As a matter of fact, he led us straight to the (WHO/UN-sponsored) H1N1/H5N1 bird/swine/human flu "pandemic."
