

URGENT - H1N1 Vaccine Patent Filed (2007) Long Before the Swine Flue Virus Was Spread!
by Walter Burien
08/20/09

Pay special attention to the strains of the H1N1 noted in the 2007 filing. Coming to your hometown soon!

The following is my reply to John Perna per a US Patent Application filed, with one aspect of the patent being for the Swine Flue virus vaccine (H1N1). The patent application was filed long before the Mexican Swine Flu supposedly came forward as a new strain of virus coming out of a "Pig Farm" in Mexico.

In John's post copied in part below my reply, he thought the patent application for the H1N1 vaccine was from 2008 shortly before the swine flue broke out in Mexico.

I am familiar with patents, so I took a look at the US Patent and Trademark site to verify what he was bringing forward was correct and found he was in error. The original application was actually filed in 2007. Long before the virus was staged as an outbreak of "a new viral strain" in Mexico.

As far as I am concerned, this now verified information puts the last nail in the coffin for the immediate suspension of all forms of "civil" government in this country for reorganization under limited purview and then reinstatement. And I hope, no I pray that when done in end result they axe 85% or more of the attorneys from the system. That is 90% of the solution right there.

Sent FYI from,

Walter Burien - CAFR1.com

PS: Make the investment wealth of government directly benefit the people and taxation be gone! TRF now!

Any local government can be restructured to meet their annual budget needs "Without" taxes. TRF ([Tax Retirement Funds](#)) paying for every City, County, State's annual budgetary needs!

CAFR1 needs help in this corner: <http://CAFR1.com/DNT.html>

COMMUNICATION TO JOHN PERNA:

John:

Please send this to all of your contacts and media groups.

You are off on the filing date. It is not 08/28/2008 it is 08/28/2007 one year earlier! **A Much Bigger smoking gun then you thought...**

The 2008 date was when the Patent Application was put into final acceptance for examination. The filing date (when received in the PTO mail room) was exactly **one year earlier**. I put the links below from the US Patent and Trademark Office to verify this. You can also download any of the sections or copy from those pages and

I strongly recommend that you do so. (the patent could be by amendment classified as secrete and pulled)

Here is the US Patent office link to see that patent - <http://appft.uspto.gov/netacgi/nph-Parser?Sect1=PTO2&Sect2=HITOFF&p=1&u=%2Fnetacgi%2FPTO%2Fsearch-bool.html&r=3&f=G&l=50&co1=AND&d=PG01&s1=Kistner.IN.&OS=IN/Kistner&RS=IN/Kistner>

And yes the the Swine Flu virus H1N1 is listed "with many others" as copied from the Patent Application here at: [0056] "A vaccine can be used e.g. for an injection as a prophylactic means against a virus associated disease. In particular preferred embodiments the composition or vaccine comprises more than one antigen, e.g. 2, 3, 4, 5, 6, 7 or 8, in particular of different virus strains, subtypes or types such as influenza A and influenza B, in particular selected from of one or more of the human H1N1, H2N2, H3N2, H5N1, H7N7, H1N2, H9N2, H7N2, H7N3, H10N7 subtypes, of the pig flu H1N1, H1N2, H3N1 and H3N2 subtypes, of the dog or horse flu H7N7, H3N8 subtypes or of the avian H5N1, H7N2, H1N7, H7N3, H13N6, H5N9, H11N6, H3N8, H9N2, H5N2, H4N8, H10N7, H2N2, H8N4, H14N5, H6N5, H12N5 subtypes. "

My additional concern is all the others virus vaccines listed but not yet promoted yet, get my point? !!

You may want to get this into a few specialists hands for comment immediately.

The following link is the most important. It shows that the original application was filed in 08/28/2007.

Start off from here <http://portal.uspto.gov/external/portal/pair> and when you get to the search page make sure "application number" is checked off and in the search field put in the application number of: **60/966,724**

When it opens the page click on the tab "**Image File Wrapper**" then select "**Specifications**" and go to page "13" of the specifications. Here you will see the virus references to the viruses as noted above and it did so on "**08/28/07**" long before the virus was promoted as a "**New and Deadly Strain**" morphed out of a pig farm in Mexico.

So, upon my personal reflection of the matter: They can take that vaccine and shove it up their A** and what can't fit they can do the same to the US Propaganda ministry and their talking head wh***s in the syndicated news media that have promoted the swine flu frenzy.

HERE IS THE "SMOKING GUN" ON THE PHONY FLU SCARE:

Kistner Pharm filed the patent of H1N1 vaccine on 28 AUG 2008 before the virus was spread!

This is the US Patent office document:

Go to Page 7 #0056 and see for yourself!

<http://www.theoneclickgroup.co.uk/documents/vaccines/Baxter%20Vaccine%20Patent%20Application.pdf>

How could the vaccine come before the virus?

Don't believe me, look it up for yourself!

Repost and email everywhere!

<http://nbgazette.com/index.php?entry=entry090802-133304>

QUESTION:

What is the difference between a needle shot in your arm and a bullet shot through your brain?

ANSWER:

With a bullet shot through your brain, your death will be quick and painless.

With a needle shot in your arm, your death will be slow, painful, and very profitable for drug and health care companies of which the predominate collective stock holders in those companies who will profit the most is your own government as your tax revenue is funneled into them to the tune of hundreds of billions of dollars. More people have died from the vaccination than from swine flu.
